OBJECTIVE:
Install equipment in Node 1 Midbay area to support installation on Node 3 on Node 1 Port. New equipment includes cables, hoses, ducting, IMV Valve, and a new Closeout Panel.

LOCATION:
Node 1

DURATION:
6 hours, 30 minutes (Two Crew - Mod Kit Install)
1 hour 10 minutes (One Crew - Access)

CREW:
Two

PARTS:
Node 1 Avionics and Fluids Modification Kit [Refer to Table 1]
Node 1 IMV Modification Kit [Refer to Table 1]

MATERIALS:
Velcro Ties
Dry Wipes
Nitrile Gloves
Clean Room Gloves
Kapton Tape
Dust Mask
ALSP Kit:
   Povidone Iodine Pads

TOOLS:
Flashlight
CSA-O2
Vacuum Cleaner
Digital Camera
Gamah Seal Maintenance Kit:
   Fluid Fitting Torque Device
   1.00" Drive Gear
   0.625" Reaction Gear
ISS IVA Toolbox:
Drawer 2:
   Driver Handle, 1/4" Drive
   Ratchet, 1/4" Drive
   Ratchet, 3/8" Drive
   3/8" Socket, 1/4" Drive
   5/32" Hex Head, 1/4" Drive
   4" Ext, 1/4" Drive
   6" Ext, 1/4" Drive
   10" Ext, 1/4" Drive
   1/4" Deep Socket, 1/4" Drive
   1/2" Deep Socket, 1/4" Drive
   (40-200 in-lbs) Trq Wrench, 3/8" Drive
1.100 NODE 1 PREP FOR NODE 3 – MIDBAY HARDWARE INSTALLATION

(10-50 in-lbs) Trq Wrench, 1/4" Drive
(5-35 in-lbs) Trq Driver, 1/4" Drive
1/4" to 3/8" Adapter
7/16" Deep Socket, 1/4" Drive

Drawer 3:
4" Common Tip Screwdriver
#6 Long Torq Driver, 3/8" Drive
6" Long, 3/8" Hex Head, 3/8" Drive

REFERENCED PROCEDURE(S):
1.401 SMOKE DETECTOR ACTIVATION
1.402 SMOKE DETECTOR DEACTIVATION
1.504 IMV FAN ACTIVATION/DEACTIVATION POST CCS
2.506 IMV VALVE RECONFIGURATION
A.2.1 FLUID FITTING TORQUE DEVICE (FFTD) ASSEMBLY AND USAGE
A.2.3 MATING GAMAH FITTING USING THE FFTD
A.2.13 GAMAH SEAL R&R

**WARNING**

CSA-O2 readings are required to insure O2 % is not above flammability levels or N2 pockets do not exist that can cause crew asphyxiation.

1.2 Perform CSA-O2 sampling in open cabin, then record: __________.

1.3 Comparison to MCA Sampling

US LAB: ECLSS: AR Rack: MCA

Lab MCA

(ORU 2) Mass Spectrometer Assembly

Record O2 %: __________

√ Difference between CSA-O2 and MCA O2 percentages is less than or equal to 1.1 %

1.4 Perform CSA-O2 sampling in areas where Closeout Panel was removed for 1 minute.

If O2 % is between 16.5 and 23.3 %, proceed.

1.5 √ NOD1P4 Rack rotation path unobstructed

NOD1P4 1.6 Disengage K-BAR Thumb Latches (two) from Standoff. Slowly rotate Rack down to a controlled stop. Temporarily restrain as required.
2. INSTALLING NODE 1 PORT-AFT IMV VALVE

Figure 5.- Node 1 Port Aft NPRV.

NOD1P2-Aft 2.1 Loosen, remove V-Band Clamp and stow on Bulkhead flange. Remove NPRV (Ratchet, 1/4" Drive; 4" Ext, 1/4" Drive; 7/16" Deep Socket, 1/4" Drive or 1/2" Deep Socket, 1/4" Drive). Temporarily stow NPRV. Refer to Figure 5.

2.2 Inspect Node 1 Port-Aft IMV flange for FOD or damage (Flashlight). If required, wipe sealing surface with Dry Wipe.

Figure 6.- IMV Valve RMO Flex Shaft Interface Noncaptive Fasteners.
2.3 Loosen (do not remove) IMV Valve RMO Flex Shaft Interface noncaptive fasteners (six) (Ratchet, 1/4" Drive; 5/32" Hex Head, 1/4" Drive). Refer to Figure 6.

2.4 Teflon Seal (two) on mating surface of IMV Valve flange clean, free of debris. Clean, if required, by wiping around circumference of seal (Dry Wipes). Refer to Figure 7.

2.5 Visually verify IMV Valve is in Closed position. Refer to Figure 8.

2.6 Don Nitrile Glove.

2.7 Apply small amount of Braycote to fingertip. Work Braycote between fingertips until a very thin film is achieved with no visible pieces of Braycote present.
2.8 Use lubricated fingertip to apply thin film of Braycote to seal crowns.

   If Glove begins to stick to seal surface
   Repeat step 2.7 for relubrication of Glove.

2.9 Verify no visible white Braycote clumps on seals; clumping can prevent proper seal performance.

2.10 Doff Nitrile Glove.

Figure 9.- IMV Valve Installed on Node 1 Port Bulkhead (Mockup in B9).

2.11 Align IMV Valve on Node 1 Port-Aft Bulkhead with mechanism housing and electronics assembly oriented slightly forward (12 degrees) of nadir. Minimize rubbing Teflon seals on Bulkhead. Refer to Figure 9.

2.12 RMO Flex Shaft will be routed between Node 1 Cabin Fan and Midbay structure. Rotate RMO Flex Shaft Interface to align with RMO Flex Shaft routing path: slightly starboard (11 degrees) of aft. Refer to Figure 9.

2.13 Install V-Band Clamp, tighten enough to keep IMV Valve in place but loose enough to allow IMV Valve rotation, if required, during RMO Flex Shaft connection (Ratchet, 1/4" Drive; 4" Ext, 1/4" Drive; 7/16" Deep Socket, 1/4" Drive or 1/2" Deep Socket, 1/4" Drive).
3. INSTALLING IMV VALVE REMOTE MANUAL OVERRIDE (RMO)

NOTE
New NOD1P3-01 Panel must be assembled prior to installation. Once assembled, upper and lower segments will not need to be separated for subsequent access to Node 1 Port Midbay.

3.1 Align new NOD1P3-01 upper and middle Closeout Panels.

3.2 Tighten, torque NOD1P3-01 fasteners (six) joining upper and lower panels to 27 in-lbs [Ratchet, 1/4" Drive; 5/32" Hex Head, 1/4" Drive; (10-50 in-lbs) Trq Wrench, 1/4" Drive].

3.3 Install new NOD1P3-01 Closeout Panel, fasteners (four) (Ratchet, 1/4" Drive; 5/32" Hex Head, 1/4" Drive).

3.4 Remove tethered cap from RMO Flex Shaft.

![Access to RMO Flex Shaft routing path](image1.png)

Figure 10.- Access Holes on Aft Side of Port Midbay.
1.100 NODE 1 PREP FOR NODE 3 – MIDBAY HARDWARE INSTALLATION
(ASSY OPS/ULF3/FIN 2)  Page 12 of 55 pages

Figure 11.- Node 1 Port Midbay.

CAUTION
RMO Flex Shaft cable has a minimum bend radius of 8 inches. To prevent hardware damage, do not subject Flex Shaft to a bend radius of less than 8 inches.

3.5 Position RMO Handle below new NOD1P3-01 Closeout Panel. Feed free end of RMO Flex Shaft between Node 1 Cabin Fan Wire Harnesses (W0307 and W0137). Using a second crewmember accessing midbay volume from aft and port sides, continue feeding RMO Flex Shaft around Node 1 Cabin Fan towards IMV Valve. Maintain RMO Flex Shaft bend radius > 8 inches. Refer to Figures 10 and 11.

3.6 Align RMO Handle with cutout in new NOD1P3-01. Snug RMO Handle attachment fasteners (four) (Ratchet, 1/4" Drive; 5/32" Hex Head, 1/4" Drive). Refer to Figures 10 and 11.
3.7 Deploy RMO Handle and align indicator with “C” in “CLOSED.” Refer to Green Line on Figure 12.

3.8 While maintaining RMO Flex Shaft bend radius > 8 inches, attempt alignment of the RMO Flex Shaft with IMV Valve RMO Flex Shaft Interface. If alignment is not possible while maintaining proper bend radius
   Rotate IMV RMO Flex Shaft Interface \( \bigcirc \) or \( \bigtriangledown \) relative to valve body as required.
   Loosen IMV Valve V-Band Clamp, rotate IMV Valve on Bulkhead flange for proper alignment (Ratchet, 1/4” Drive; 4” Ext, 1/4” Drive; 7/16” Deep Socket, 1/4” Drive or 1/2” Deep Socket, 1/4” Drive).
   Minimize scrubbing of IMV Valve Teflon seals.
   Tighten IMV Valve V-Band Clamp (Ratchet, 1/4” Drive; 4” Ext, 1/4” Drive; 7/16” Deep Socket, 1/4” Drive or 1/2” Deep Socket, 1/4” Drive).

3.9 Attach RMO Flex Shaft, fasteners (two) to IMV Valve. Tighten, torque to 39 in-lbs [Ratchet, 1/4” Drive; 10” Ext, 1/4” Drive; 6” Ext, 1/4” Drive; 4” Ext, 1/4” Drive; 5/32” Hex Head, 1/4” Drive; (10-50 in-lbs) Trq Wrench, 1/4” Drive]. Refer to Figure 10.

3.10 Snug all accessible IMV Valve RMO Flex Shaft Interface fasteners (Ratchet, 1/4” Drive; 5/32” Hex Head, 1/4” Drive).

3.11 Create alignment mark on IMV Valve and Node 1 Port Bulkhead to ensure IMV Valve could be reinstalled on Bulkhead in same position (Sharpie).
Figure 13.- RMO Checkout Overview.
4. **RMO CHECKOUT AND ADJUSTMENT**

<table>
<thead>
<tr>
<th>NOTE</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Figure 13 provides a graphical overview of the RMO Checkout and Adjustment activities performed in step 4.</td>
</tr>
<tr>
<td>2. The goal of step 4 is to adjust interface between the RMO and IMV Valve to enable manual actuation of the IMV Valve so that the physical position of the valve is fully open or fully closed. Until this step is completed, the RMO cannot be relied upon to fully close the IMV Valve or verify the valve position (via RMO Pointer).</td>
</tr>
</tbody>
</table>
| 3. The PCS Telemetry of valve position should be considered “truth”:  
  Open: IMV Valve is fully open  
  In Transit: IMV Valve is between fully open and fully closed (this indication does not require that the valve be in motion)  
  Closed: IMV Valve is fully closed |
| 4. If adjustments result in mismatch between RMO pointer and PCS telemetry, new RMO positions will be marked on the Closeout Panel. |
| 5. If multiple attempts to adjust the RMO are unsuccessful at matching both open and closed telemetry states, the minimal required configuration is adjustment so that the valve can be manually closed (as indicated on the PCS telemetry). It is less critical to have a manual open actuation be completely successful. |

Record whether pointer contacts “CLOSED” position range in Table 3.

4.20 Node 1 IMV Port Aft Vlv
Verify Position – Closed
Record PCS telemetry for “Manually Close” in Table 3.
4.21 Assessing RMO Functionality
For manual IMV Valve open and close attempts

   If telemetry matches for both manual inputs
      Go to step 4.42.

   If telemetry matches “OPEN” manual input only
      Go to step 4.22 to rotate IMV Valve RMO Flex Shaft Interface
      towards “OPEN” (∨) to hard stop.

   If telemetry matches “CLOSED” manual input only
      Go to step 4.22 to rotate IMV Valve RMO Flex Shaft Interface
      towards “CLOSED” (∧) to hard stop.

   If telemetry does not match for either manual input
      Go to step 4.28.

</table>

**MCC-H** 6.1 To inhibit Node 1 Smoke Detection, perform [1.402 SMOKE DETECTOR DEACTIVATION](#), step 1 for Node 1 SD1 and Node 1 SD2 (SODF: ECLSS: ACTIVATION AND CHECKOUT: FDS), then:

6.2 Configure Vacuum Cleaner in Node 1.
Use Vacuum Cleaner as required.

**Figure 18.** Original NOD1O2 IMV Duct.

NOD1OP2 6.3 **On MCC-H GO**

Loosen band clamps (four) holding original NOD1O2 IMV Ducting (Driver Handle, 1/4" Drive; 1/4" Deep Socket, 1/4" Drive; 4" Common Tip Screwdriver).
6.4 Move loosened Band Clamps away from IMV couplings and finger brackets.

6.5 Don Goggles, Dust Mask.

6.6 Position crewmembers at NOD1P2 and NOD1P4.

6.7 Remove original NOD1O2 IMV duct by rotating down and away from midbay ducting.
Once free of midbay ducting, slide original NOD1O2 IMV duct towards aft to release from Node 1 IMV Duct Valve 4 coupling.
Remove duct segment through NOD1P4 Rack bay area.

6.8 If original NOD1O2 IMV Duct is full of dust and FOD, cover both ends of duct (Ziplock Bags, Gray Tape).

6.9 Remove 4" Band Clamps (four) from original NOD1O2 IMV Duct.
Stow Band Clamps in Ziplock Bag labeled “Spare IMV Parts.”
Stow original NOD1O2 IMV duct.

6.10 Remove Flexible Coupling, 4" Band Clamp from Node 1 IMV Duct Valve 4 (Driver Handle, 1/4" Drive; 1/4" Deep Socket, 1/4" Drive; 4" Common Tip Screwdriver).
Stow Flexible Coupling, Band Clamp in Ziplock Bag labeled “Spare IMV Parts.”
Refer to Figure 17.

6.11 Loosely install new 4" Band Clamps (four) onto new NOD1O2 IMV Duct.
Three Band Clamps should be installed on long segment of duct, one Band Clamp should be installed on short curved segment of duct.
6.12 Performing opposite motion of step 6.6, install new NOD1O2 IMV Duct. When mating Flexible Coupling to Node 1 IMV Duct Valve 4, ensure minimum 1.25" overlap is present. Mate new NOD1O2 IMV Duct to midbay duct with a rotational motion, ensuring minimum 1.25" coupling overlap is present. Verify “T” outlet oriented Nadir.

6.13 Position 4” Band Clamps over Flexible Couplings and Finger Brackets. Snug Band Clamps (Driver Handle, 1/4” Drive; 1/4” Deep Socket, 1/4” Drive; 4” Common Tip Screwdriver).

6.14 Remove temporary covering from Port-Aft IMV Valve. Inspect IMV Valve for FOD or damage.

6.15 Loosely install new 4” Band Clamp onto Flexible end of new NOD1P2 IMV Duct. Loosely install IMV Duct Clamp (5” diameter) onto rigid end of new NOD1P2 IMV Duct.

6.16 Avoiding contact with Insulated LTL Line, install new NOD1P2 IMV Duct by guiding flexible segment behind secondary structure towards NOD1O2 IMV Duct “T” outlet. Rigid ducting will fit behind Hatch Track.
6.17 Overlap flexible couplings (two) between NOD1P2 IMV Duct and IMV Valve (NOD1O2 IMV Duct) by 1.25”. Snug Band Clamps (two) (Driver Handle, 1/4” Drive; 1/4” Deep Socket, 1/4” Drive; 4” Common Tip Screwdriver).

6.18 Tighten, torque Band Clamps (six) to 16 in-lbs [1/4” Deep Socket, 1/4” Drive; (5-35 in-lbs) Trq Driver, 1/4” Drive].

6.19 Doff Goggles, Dust Mask.

6.20 Photo document newly installed hardware (Digital Camera).

6.21 Install following Closeout Panels (Ratchet, 1/4” Drive; 5/32” Hex Head, 1/4” Drive).

NOD1P2-34 (twenty-four fasteners)
NOD1P2-33 (five fasteners)

7. INSTALLING NOD1P4 IMV DIFFUSER COVERS

7.1 Remove, discard temporary diffuser covers from NOD1OP3 and NOD1OP4 diffusers.

7.2 Remove Diffuser Grilles (two), fasteners (six each) from NOD1OP3 and NOD1OP4 (Ratchet, 1/4” Drive; 3/8” Socket, 1/4” Drive). Stow Diffuser Grilles.

7.3 Install Diffuser Covers (two), IMV Diffuser Gaskets (two), fasteners (six each) at NOD1OP3 and NOD1OP4 (Ratchet, 1/4” Drive; 3/8” Socket, 1/4” Drive).

Torque fasteners (six each) to 22 in-lbs [Ratchet, 1/4” Drive; 3/8” Socket, 1/4” Drive; (10-50 in-lbs) Trq Wrench, 1/4” Drive].

7.4 Photo document newly installed hardware.

8. ENABLING NODE 1 IMV FLOW

8.1 Node 1 IMV Duct Valve 4 → OPEN

Refer to Figure 17.

8.2 ISS ↓ MCC-H: “Node 1 Midbay IMV Reconfiguration complete. Ready for Node 1 IMV and Smoke Detector activation.”

8.3 To enable Node 1 Smoke Detection, perform 1.401 SMOKE DETECTOR ACTIVATION, steps 2 and 3 for Node 1 SD1 and Node 1 SD2 (SODF: ECLSS: ACTIVATION AND CHECKOUT: FDS), then:

8.4 To open Node 1 Aft Port IMV Valve, perform 2.506 IMV VALVE RECONFIGURATION, step 2 (SODF: ECLSS: NOMINAL: THC), then:

8.5 To turn on Node 1 Aft Port IMV Fan, perform 1.504 IMV FAN ACTIVATION/DEACTIVATION POST CCS, step 2.2 (SODF: ECLSS: ACTIVATION AND CHECKOUT: THC), then:
8.6 On MCC-H GO
Node 1 IMV Duct Valve 2 → Close
Refer to Figure 16.

8.7 Cover PMA1 IMV Duct Grill (Velcro cover).

8.8 Install NOD1O1-01 Closeout Panel, fasteners (eight) (Ratchet, 1/4" Drive; 5/32" Hex Head, 1/4" Drive).

9. FLUID HOSE ROUTING AND CONNECTION

Figure 21.- Routing of Fluid Hoses in NOD1OP2 Area.
9.1 Locate NOD1 Waste Water Hose and NOD1 Potable Water Hose. Stage hoses in NOD1P4 Rack bay.

**NOTE**
Proper routing of fluid hoses will ensure sufficient access to worksite for FFTD torquing of fluid fittings.

NOD1P4 9.2 Route 90-degree Gamah connector of NOD1 Waste Water Hose from NOD1P4 to NOD1OP2 Bulkhead connector J30 - Waste Water. Refer to Figures 21 and 22 for recommended routing.

NOD1OP2 9.3 Route 90-degree Gamah connector of NOD1 Potable Water Hose from NOD1P4 to NOD1OP2 Bulkhead connector J33 - Fuel Cell H2O. Refer to Figures 21 and 22 for recommended routing.

9.4 Verify hose routing will not interfere with installation of Closeout Panels.

9.5 Verify no sharp edges along hose routing path.

If sharp edge located
   Relocate hose or cover sharp edge with multiple layers of EVA Tape and wrap hose with EVA Tape to prevent abrasion.
9.6 Verify sufficient access to actuate J27, J29, J31 and J32 in subsequent steps.

**NOTE**
Gamah fitting and FFTD reference information can be found in:
- **A.2.1 FLUID FITTING TORQUE DEVICE (FFTD) ASSEMBLY AND USAGE** (SODF: IFM: REFERENCE: APPENDIX A: ISS IVA TOOLS)
- **A.2.3 MATING GAMAH FITTING USING THE FFTD** (SODF: IFM: REFERENCE: APPENDIX A: ISS IVA TOOLS)
- **A.2.13 GAMAH SEAL R&R** (SODF: IFM: REFERENCE: APPENDIX A: ISS IVA TOOLS) (Gamah Seal R&R is not expected for this activity)

9.7 Gamah Cap ←|→ J30 (Waste Water) on Bulkhead (by hand)
Gamah Plug ←|→ TO: NOD1 Port Bulkhead J30 on NOD1 Waste Water Hose (by hand)

Stow Gamah Caps in Ziplock Bag labeled “NOD 1 Mod Kit Caps and Plugs.”

9.8 NOD1 Waste Water Hose TO: NOD1 Port Bulkhead J30 →|← J30 (Waste Water) on Bulkhead
Hand Tighten.

**WARNING**
Skin contact with the fluid-contacting surfaces of the potable water system (i.e., “Fuel Cell Water”) QDs or gamah fittings can potentially lead to contamination of water supply and crew illness.

* If skin contact is made with fluid-contacting surface of potable water system
* Clean surfaces with Povidone Iodine Pads from the ALSP Kit.
* Notify MCC-H.

9.9 Don Clean Room Gloves.

9.10 Gamah Cap ←|→ J33 (Fuel Cell H2O) on Bulkhead (by hand)
Gamah Plug ←|→ TO: NOD1 Port Bulkhead J33 on NOD1 Potable Water Hose (by hand)

11. AVIONICS WIRE HARNESS ROUTING AND CONNECTION

<table>
<thead>
<tr>
<th>NOTE</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. During Wire Harness routing in subsequent steps, precautions must be taken to prevent Electromagnetic Interference (EMI) issues. Incompatible Wire Harnesses must be separated by 2 inches when routed parallel for more than 1 foot. Wire Harnesses must be separated by 3 inches when routed parallel for more than 3 feet. There are no constraints for the routing of the NOD1 Waste Water Hose or NOD1 Potable Water Hose.</td>
</tr>
<tr>
<td>2. While routing Wire Harnesses in this procedure, the following routing is recommended:</td>
</tr>
</tbody>
</table>
| a) NOD1 1553 CH A Cable (W9421)  
NOD1 Video/Audio Bus A Cable (W9423)  
NOD1 Wireless Audio Cable (W9425)  
NOD1 ISL Ethernet Cable (W9426) |
| These Wire Harnesses are compatible with each other and existing Node 1 1553 cabling. These Wire Harnesses will be bundled together and routed with existing 1553 lines. |
| b) NOD1 IMV Valve Power Cable (W9436)  
This Wire Harness is not compatible with others being installed in this procedure. This Wire Harness should be routed with existing Node 1 power Wire Harnesses. |
| c) NOD1 IMV Valve Data Cable (W9437)  
This Wire Harness is not compatible with others being installed in this procedure. This Wire Harness should be routed with existing Node 1 instrumentation Wire Harnesses. |
| d) Crossing of incompatible Wire Harnesses is acceptable as long as the Wire Harnesses are not within 2 inches of each other for more than 1 foot. |

11.1 For all cable routing, maintain Bend Radius greater than six times diameter of Harness. Prior to connector mating, inspect both connectors for FOD, damage.

11.2 Locate following Wire Harnesses:
| NOD1 1553 CH A Cable (W9421)  
NOD1 Video/Audio Bus A Cable (W9423)  
NOD1 Wireless Audio Cable (W9425)  
NOD1 ISL Ethernet Cable (W9426) |
| Stage Wire Harnesses in NOD1P4 Rack bay. |
1.100 NODE 1 PREP FOR NODE 3 – MIDBAY HARDWARE INSTALLATION

09 NOV 09

**CAUTION**

When routing and connecting NOD1 Video/Audio Bus A Cable (W9423), use caution to avoid damage to fiber optic lines. Do not subject Harness to bend radius less than six times cable diameter, compression or high tension forces.

NOD1P4  11.3 Locate P3 and P29 of NOD1 Video/Audio Bus A Cable (W9423). Route P3 and P29 from NOD1P4 to NOD1OP2 as shown in Figure 21.

NOD1OP2  11.4 Coil and stow P3 leg of NOD1 Video/Audio Bus A Cable (W9423) at location shown in Figure 21. Restrain coiled Harness loosely with Velcro Straps.

11.5 Route P29 leg of NOD1 Video/Audio Bus A Cable (W9423) to J29 of Bulkhead. Verify routing will not interfere with Closeout Panel installation.

**CCS Recovery Retry**

**cmd** BC Comm Fail – Enable **Execute** (√Ena)

13. PORT MIDBAY WIRE HARNESS ROUTING

***********************************************************************************
* If insufficient space is available in Standoff between Node 1 Port and
* Nadir Midbays to allow temporary placement of Wire Harnesses
* and fluid hoses during subsequent routing steps
* Partially rotate NOD1P4 up.
* Partially rotate NOD1D4 down.
* Avoid obstruction of Node 1 - PMA1 translation path.
* Pass end of Wire Harness between crewmembers.
* Temporarily stow coiled Harness behind Node 1 Deck Midbay.
* Partially rotate NOD1D4 up.
***********************************************************************************
13.1 NOD1P4 Rack rotated down

13.2 Route fluid hoses (two) from top to bottom of Node 1 Port Midbay; these hoses have no EMI routing constraints. Recommend routing per Figure 24, near red cables. Restrain to secondary structure, as required (Cable Ties).

13.3 Verify no sharp edges along hose routing path.

If sharp edge located

- Relocate hose or cover sharp edge with multiple layers of EVA Tape and wrap hose with EVA Tape to prevent abrasion.
13.4 Coil, temporarily restrain remaining fluid hose in Standoff between Port and Deck Midbays (Velcro Ties).

13.5 Bundle the following cables to aid routing in Node 1 Port Midbay:
   - NOD1 1553 CH A Cable (W9421)
   - NOD1 Video/Audio Bus A Cable (W9423)
   - NOD1 Wireless Audio Cable (W9425)
   - NOD1 ISL Ethernet Cable (W9426)

13.6 Route bundle as shown in Figure 24, following existing W0205 Harness from top to bottom of Node 1 Port Midbay. Keep bundle away from red-insulated wires to prevent EMI concerns. Restrain loosely to secondary structure as required (Cable Ties).

13.7 Coil, temporarily restrain remaining length of wire bundle in Standoff between Port and Deck Midbays (Velcro Ties).

13.8 Route NOD1 IMV Valve Power Cable (W9436) from newly installed IMV Valve to bottom of Node 1 Port Midbay as shown in Figure 24. Follow W0115 (red cables) to prevent EMI concerns. Restrain loosely to secondary structure as required (Cable Ties).

13.9 Coil, temporarily restrain remaining length of Wire Harness in Standoff between Port and Deck Midbays (Velcro Ties).

13.10 Route NOD1 IMV Valve Data Cable (W9437) from newly installed IMV Valve to bottom of Node 1 Port Midbay as shown in Figure 24. Follow W0303 (green cables) on Port face of Midbay structure to prevent EMI concerns. Restrain loosely to secondary structure, as required (Cable Ties).

13.11 Photo document cable routing (Digital Camera).

13.12 √ NOD1P4 Rack rotation path unobstructed
   - K-BAR Thumb Latches (two) → up position
   - Slowly rotate Rack up.
   - Engage K-BAR Thumb Latches (two) into Standoff Capture Mechanism.

</tbody>
</table>

15.2 Disengage left pinion one full turn until hard stop (Ratchet, 3/8" Drive; 6" Long, 3/8" Hex Head, 3/8" Drive).

15.3 Repeat steps 15.1, 15.2 for right Upper Attach Mechanism.

15.4 √NOD1D4 Rack rotation path unobstructed

15.5 Slowly rotate Rack Down to a controlled stop. Temporarily restrain as required.

15.6 Retrieve Wire Harnesses and hoses from Standoff between Node 1 Port and Deck Midbays.
15.7 Locate and route NOD1 Potable Water Hose to Fuel Cell Water Hose production break. Refer to Figure 26.

**WARNING**

Skin contact of the wetted surfaces of the potable water system (i.e., “Fuel Cell Water”) QDs or gamah fittings can potentially lead to contamination of water supply and crew illness.

* If skin contact is made with fluid-contacting surface of potable water system
* Clean surfaces with Povidone Iodine Pads from the ALSP Kit.
* Notify MCC-H.

15.8 Fuel Cell Water Hose ←|→ QD1E31 (Node 1 Production Break)

15.10 NOD1 Potable Water Hose →|← QD1E31 (Node 1 Production Break)

15.11 Route any excess length of NOD1 Potable Water Hose along secondary structure toward center of module. Restrained hose to secondary structure (Cable Ties).
15.12 Locate and route NOD1 Waste Water Hose to center of Nadir Midbay. Keeping hose to the port side of the Node 1 Nadir-aft IMV Valve, pass QD to second crewmember in Node 1 Deck Radial bay. Restrain NOD1 Waste Water Hose to currently installed hose at production break (QD1E30) (Velcro Tie). Do not reconfigure Waste Water QDs at this time. Refer to Figure 27.

Figure 27.- Node 1 Nadir Midbay, Forward Side.

Figure 28.- NOD1PD2 Area.
15.13 Locate and route the following three Harnesses from Deck Midbay to NOD1PD2 area:
- NOD1 Wireless Audio Cable (W9425)
- NOD1 IMV Valve Data Cable (W9437)
- NOD1 IMV Valve Power Cable (W9436)
Maintain 3 inch spacing between all adjacent parallel Wire Harnesses while routing forward through midbay.

15.14 Coil and restrain Wire Harnesses in NOD1PD2 area for later routing and connection.
During this temporary stowage, no EMI constraints exist, so cables may be positioned adjacent to any other Wire Harnesses.

Figure 29.- NOD1SD2 Area, Looking Aft.
1.100 NODE 1 PREP FOR NODE 3 – MIDBAY HARDWARE INSTALLATION

**NOTE**

NOD1 ISL Ethernet Cable (W9426), NOD1 1553 CH A Cable (W9421), and NOD1 Video/Audio A Cable (W9423) will initially be routed separately to allow management of excess Wire Harness length.

15.15 Locate and route J4 of NOD1 ISL Ethernet Cable (W9426) from Port to Starboard of Node 1 Nadir Midbay. Do not restrain Wire Harness at this time.

15.16 Route approximately 2 feet of NOD1 ISL Ethernet Cable (W9426) into NOD1SD2 area, staying outboard of secondary structure to avoid EMI concerns. Route along W0205 Wire Harness. Leave any excess cable in Nadir Midbay area.

09 NOV 09
15.17 Locate P4 of W5065 Node 1 ISL Ethernet Cable, which was coiled and stowed during Expedition 14. Refer to Figure 31.

<table>
<thead>
<tr>
<th>NOTE</th>

Stow Protective Caps in Ziplock Bag labeled “NOD 1 Mod Kit Caps and Plugs.”

15.19 W5065 P4 →|← J4 of NOD1 ISL Ethernet Cable (W9426)

15.20 Pull any excess wire length back into Node 1 Nadir Midbay.

15.21 Restrain NOD1 ISL Ethernet Cable (W9426) on same routing path as W0205 in NOD1SD2 area as shown in Figure 30.

Nadir Midbay

15.22 Route NOD1 ISL Ethernet Cable (W9426) along W0205, gathering excess wire length near center of Midbay.
Coil excess wire length, maintaining minimum bend radius of six times the harness diameter.
Coiled Wire Harness may cross any other Wire Harness without EMI risk.
Restrain Wire Harness to secondary structure (Cable Ties). Refer to Figure 26.
15.23 Locate and route J106 of NOD1 1553 CH A Cable (W9421) from Port to Starboard of Node 1 Nadir Midbay. Do not restrain Wire Harness at this time.

NOD1SD2 15.24 Route approximately 4 feet of NOD1 1553 CH A Cable (W9421) into NOD1SD2 area, staying outboard of secondary structure to avoid EMI concerns. Route along W0205 Wire Harness. Leave any excess cable in Nadir Midbay area.

15.25 MCC-H to verify 1553 bus safing complete per step 14

15.26 W0205 P106 ←|→ J106 of Nadir Bulkhead

15.27 Transfer Protective Cap from J106 of NOD1 1553 CH A Cable (W9421) to J106 of Nadir Bulkhead.

15.28 W0205 P106 →|← J106 of NOD1 1553 CH A Cable (W9421)

15.29 Pull any excess wire length into Node 1 Nadir Midbay.

15.30 Restrain NOD1 1553 CH A Cable (W9421) on same routing path as W0205 in NOD1SD2 area as shown in Figure 30.

Nadir Midbay 15.31 Route NOD1 1553 CH A Cable (W9421) along W0205, gathering excess wire length near center of Midbay. Coil excess wire length, maintaining minimum bend radius of six times the Harness diameter; coiled Wire Harness may cross any other Wire Harness without EMI risk. Restrain Wire Harness to secondary structure (Cable Ties). Refer to Figure 26.

15.32 Locate and route P78 of NOD1 Video/Audio Bus A Cable (W9423) from Port to Starboard of Node 1 Nadir Midbay. Do not restrain Wire Harness at this time.

NOD1SD2 15.33 Route approximately 4 feet of NOD1 Video/Audio Bus A Cable (W9423) into NOD1SD2 area, staying outboard of secondary structure to avoid EMI concerns. Route along W0205 Wire Harness. Leave any excess cable in Nadir Midbay area.

15.34 Stow P78 of NOD1 Video/Audio Bus A Cable (W9423) near J78 of starboard Bulkhead. Do not make connections at this time. In a subsequent procedure, P78 of NOD1 Video/Audio Bus A Cable will be connected to the starboard Bulkhead.

15.35 Pull any excess wire length into Node 1 Nadir Midbay.
15.36 Loosely restrain NOD1 Video/Audio Bus A Cable (W9423) on same routing path as W0205 in NOD1SD2 area as shown in Figure 31.

15.37 Route NOD1 Video/Audio Bus A Cable (W9423) along W0205, gathering excess wire length near center of Midbay.
Coil excess wire length, maintaining minimum bend radius of six times the Harness diameter; coiled Wire Harness may cross any other Wire Harness without EMI risk.
Restrain Wire Harness to secondary structure (Cable Ties).
Refer to Figure 26.

15.38 Photo document all routings and connections.

16. **NORMALIZING 1553 BUSES**

16.1 Use Table 4 to swap channels to A and enable channel switching.

```
sel [YY]  where [YY] = Bus Name from Table 4

[YY] Bus Status
  'Channel Selected'

  cmd Select Ch A  Execute (√A)
  'Auto Channel Switch Status'

  cmd Enable  Execute (√Ena)
Repeat
```

This Page Intentionally Blank
OBJECTIVE:
To perform installation of a portion of the Node 1 Modification Kit into the Node 1 Alcove area. The Mod Kit installs hardware into Node 1 to redirect Wire Harnesses, fluids, Intra Module Ventilation (IMV), and other utilities to allow Node 3 to be physically installed onto the Radial Port CBM instead of the Radial Nadir CBM. Installs hardware into the physical portion of the Node “Alcove” area, which is in the forward portion of Node 1.

LOCATION:
Node 1 Alcove, Node 1 Port Deck Radial area

DURATION:
6 hours (two crewmembers)

CREW:
Two

PARTS:
Node 1 Avionics and Fluids Modification Kit (Refer to Table 1.)
Node 1 IMV Modification Kit (Refer to Table 1.)

MATERIALS:
Kapton Tape
Aluminum Tape
Ziplock Bags
Sharpie
Clean Room Gloves
Braycote (from Mod Kit Midbay Hardware Bag)
Releasable Wire Tie (from Mod Kit Midbay Hardware Bag)

TOOLS:
Flashlight (crew preference)
Digital Camera
CSA-O2
MRK Fan (if required for added ventilation)
Fluid Fitting Torque Device and Gamah Seal Maintenance Kit:
Fluid Fitting Torque Device S/N 001
0.875" Drive Gear S/N 001
0.625" Reaction Gear S/N 001
Brass Picks (if required)

ISS IVA Toolbox:
Drawer 1:
1/4" Combination Wrench (if preferred to 1/4" Deep Socket)
5/16" Combination Wrench
5/16" Crowfoot Wrench, 1/4" Drive

Drawer 2:
Driver Handle, 1/4" Drive
Ratchet, 1/4" Drive
1/8" Hex Head
Ratchet, 3/8" Drive
1/4" to 3/8" Adapter
6" Ext, 1/4" Drive

09 NOV 09
1.102 NODE 1 PREP FOR NODE 3 – ALCOVE HARDWARE INSTALLATIONS

(ASSY OPS/ULF3/FIN 2)  Page 2 of 38 pages

10" Ext, 1/4" Drive 
5/32" Hex Head, 1/4" Drive 
Driver Handle, 1/4" Drive 
1/4" Deep Socket, 1/4" Drive 
5/16" Socket, 1/4" Drive 
7/16" Deep Socket, 1/4" Drive 
3/8" Socket, 1/4" Drive 
(10-50 in-lbs) Trq Wrench, 1/4" Drive 
(40-200 in-lbs) Trq Wrench, 1/4" Drive 

Drawer 3: 
#10 Long Torq Driver, 3/8" Drive

AR = As Required
Figure 1.- Node 1 Alcove Hardware Installation Overview.
1. SAFING AND RECONFIGURING IMV

NOTE
To stop airflow through Node 1 Port/Deck Alcove while IMV Fan is being removed and new IMV ducting is being installed, several IMV reconfiguration steps are required.

ISS 1.1 √MCC-H to confirm the following safing actions have been completed:
Verify Node 1 Port Fwd IMV Fan is deactivated.
Verify RPCM N13B C RPC 16 (N1 Port Fwd IMV Fan) is Open and Close command Inhibited.

PMA1 1.2 Open PMA1 IMV Duct Grill (Velcro cover).

MCC-H 1.3 To turn off LAB Aft Port IMV Fan, perform 1.504 IMV FAN ACTIVATION/DEACTIVATION POST CCS, step 3.1 (SODF: ECLSS: ACTIVATION AND CHECKOUT: THC), then:

1.4 To turn off Node 1 Aft Port IMV Fan, perform 1.504 IMV FAN ACTIVATION/DEACTIVATION POST CCS, step 3.1 (SODF: ECLSS: ACTIVATION AND CHECKOUT: THC), then:

1.5 To close Node 1 Aft Port IMV Valve, perform 2.506 IMV VALVE RECONFIGURATION, step 3 (SODF: ECLSS: NOMINAL: THC), then:
Figure 2.- Node 1 Closeout Panels to be Removed.
2. REMOVING CLOSEOUT PANELS AND CHECKING VENTILATION

NOD1 2.1 Relocate any items from front of affected Closeout Panels. Refer to Figure 2.

**WARNING**
CSA-O2 sampling is required to insure O2% is not above flammability levels or N2 pockets do not exist that can cause crew asphyxiation.

2.2 Perform CSA-O2 sampling in open cabin and record: ____________.

2.3 **Comparison to MCA sampling**

PCS US LAB: ECLSS: AR Rack: MCA
LAB MCA
‘(ORU2) Mass Spectrometer Assembly’

Record O2 %: ___________
√ Difference between CSA-O2 and MCA O2 percentage is less than or equal to 1.1

**NOTE**
1. Closeout Panels NOD1P2-11 and NOD1D2-16 are joined together with a seam support so panels should be removed together as a single unit.

2. Closeout Panels NOD1PD2-22(NOD1PD2-23) and NOD1PD2-26(NOD1PD2-27) are joined together with a T-shaped seam support and have L-shaped seam supports on either end. Both sets of panels should be able to be removed together as a single unit without removing any seam supports.

NOD1 2.4 Remove NOD1P2-11(NOD1D2-16) Closeout Panels, fasteners (eleven) (5/32" Hex Head, 1/4" Drive; Driver Handle, 1/4" Drive). Temporarily stow. Refer to Figure 2.

2.5 Remove the following Closeout Panels (5/32" Hex Head, 1/4" Drive; Driver Handle, 1/4" Drive):
NOD1PD2-22 and NOD1PD2-23 (together – three fasteners each)
NOD1PD2-26 and NOD1PD2-27 (together – three fasteners each)

Temporarily stow. Refer to Figure 2.
1.102 NODE 1 PREP FOR NODE 3 – ALCOVE HARDWARE INSTALLATIONS

ASSY OPS/ULF3/FIN 2

Page 8 of 38 pages

1. If required for removal of NOD1PD2-22, NOD1PD2-23, NOD1PD2-26, or NOD1PD2-27
   * Remove T-shaped Closeout Seam Support, fasteners (eight)
     (Ratchet, 1/4" Drive; 1/8" Hex Head).
   * Remove L-shaped Closeout Seam Supports (two), fasteners (four each) (Ratchet, 1/4" Drive; 1/8" Hex Head).

*****************************************************************************

2.6 Remove following Closeout Panels (5/32" Hex Head, 1/4" Drive; Driver Handle, 1/4" Drive):
   NOD1PD2-24 (eight fasteners)
   NOD1PD2-25 (eight fasteners)
   NOD1PD2-28 (fifteen fasteners)
   NOD1PD2-21 (fifteen fasteners)
   NOD1P2-13 (three fasteners)
   NOD1D1-01 (eight fasteners)
   NOD1P1-01 (twelve fasteners)

Temporarily stow.
Refer to Figure 2.

2.7 Perform CSA-O2 sampling in each area where a Closeout Panel was removed for 1 minute.

   If O2 % is between 16.5 to 23.3 %, proceed.

   If O2 % is not between 16.5 to 23.3 %
   √MCC-H

3. REMOVING NODE 1 PORT FORWARD IMV FAN AND SILENCERS

   NOTE
1. The Node 1 Port Forward IMV Fan and Silencers are being removed and replaced with new ducting. The IMV Fan will be kept onboard as a spare.

2. The duct couplings (P/N 1F89029-1) directly above and below the IMV Fan are wrapped with two layers of acoustic covering. The outer layer, consisting of two to three revolutions of acoustic insulation tape, covers the inner layer, consisting of two to three revolutions of acoustic isolator tape. It may be necessary to cut the insulation layer(s) in order to remove the duct couplings from the IMV Fan.
LAB1P1  3.1 Remove Insulation Jackets (eight total) (held in place with Velcro) in the following locations:
above top IMV Silencer (one),
above IMV Fan (two),
below IMV Fan (two),
around IMV Fan (one),
below bottom IMV Silencer (one),
between Tee Assembly and the RAMV (one).

Temporarily stow insulation.
Refer to Figure 3.
3.2 Loosen and remove Band Clamps (eleven total) (1/4" Deep Socket, 1/4" Drive; 6" Ext, 1/4" Drive; Ratchet, 1/4" Drive) in the following locations:
   - above upper IMV Silencer (two),
   - between upper IMV Silencer and IMV Fan (two),
   - between lower IMV Silencer and IMV Fan (two),
   - below lower IMV Silencer (two),
   - in middle of Tee Assembly (one),
   - connecting Tee Assembly (with Coupling) to the RAMV (one),
   - connecting Tee Assembly Coupling to diffuser (one).

Temporarily stow clamps [5.25" (seven) and 5.75" (four)].
Refer to Figure 4.
3.3 Free Coupling above upper IMV Silencer and remove from Silencer and duct. Temporarily stow. Refer to Figure 4.

3.4 Loosen upper IMV Silencer fasteners (four) and remove Silencer (5/16" Socket, 1/4" Drive; 10" Ext, 1/4" Drive; Ratchet, 1/4" Drive). Temporarily stow. Refer to Figure 4.

3.5 Free duct Coupling from top of IMV Fan and remove, cutting acoustic insulation wrapping(s), if required. Temporarily stow.

3.6 W0308 P412 ←|→ IMV Fan J1
W0308 P412 →|← Protective Cap (P/N NATC-PPC-N-11-0)
IMV Fan J1 →|← Protective Cap (P/N NATC-RPC-N-11-0)
W0136 P413 ←|→ IMV Fan J2
W0136 P413 →|← Protective Cap (P/N NATC-PPC-N-13-0)
IMV Fan J2 →|← Protective Cap (P/N NATC-RPC-N-13-0)

3.7 Loosen IMV Fan fasteners (four) and remove IMV Fan (7/16" Deep Socket, 1/4" Drive; 10" Ext, 1/4" Drive; Ratchet, 1/4" Drive). Temporarily stow.

3.8 Free Coupling from bottom of IMV Fan or from lower IMV Silencer. Temporarily stow.

3.9 Loosen lower IMV Silencer fasteners (four) and remove Silencer (5/16" Socket, 1/4" Drive; 10" Ext, 1/4" Drive; Ratchet, 1/4" Drive). Temporarily stow. Refer to Figure 4.

3.10 Free Coupling from top of Tee Assembly and remove from finger brackets holding it to structure. Temporarily stow. Refer to Figure 4.

3.11 Free Tee Assembly from RAMV leaving Coupling attached to Tee. Free Tee Assembly Coupling from Diffuser, which should allow entire Tee Assembly to be removed. If possible, loosen Band Clamps attaching Couplings to Tee Assembly. Temporarily stow. Refer to Figure 4.
3.12 Install Duct Cap (P/N BOE221-0016) onto RAMV duct opening where Tee Assembly was removed.
Install Band Clamp over Duct Cap, ensuring there is at least ~1/8" overlap from end of cap, and tighten (snug) (1/4" Deep Socket, 1/4" Drive; 6" Ext, 1/4" Drive; Ratchet, 1/4" Drive).

3.13 Loosen and remove noncaptive bolts and washers (eight) connecting Diffuser to square mounting plate (3/8" Socket, Ratchet, 1/4" Drive). Remove Diffuser from mounting plate, reinstall bolts and washers (eight) onto loose Diffuser and tighten (hand-tight). Temporarily stow Diffuser.

4. ROUTING MTL JUMPERS IN PORT ALCOVE

<table>
<thead>
<tr>
<th>NOTE</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Two Moderate Temperature Loop (MTL) hoses with Quick Disconnects (QD) on both ends will be routed in Port Alcove prior to installation of new IMV ducting for better access.</td>
</tr>
<tr>
<td>2. Only one end of MTL hoses will be connected in this procedure to QD ports in Port Alcove, which in turn connect to hoses that go to Node 1 Port bulkhead. Free end of MTL hoses will not be connected until after Node 3 is mated to Node 1 Port, lines in Node 1 and Node 3 have been filled with ITCS fluid, and reconfigurations have been made to allow transition of Node 1/Airlock MTL cooling from LAB to Node 3.</td>
</tr>
<tr>
<td>3. The new MTL hoses launched dry and the hoses that they are connecting to in Node 1 are dry since they were originally designated for High Temperature Loop (HTL) function that was never utilized (not filled with ITCS fluid).</td>
</tr>
<tr>
<td>4. New labels for MTL Supply and Return functions will be installed over existing High Temp labels on Node 1 Port bulkhead. Due to Node 3 becoming the ITCS MTL source, what was previously labeled as Supply becomes Return and vice versa.</td>
</tr>
<tr>
<td>5. New MTL labels are not wide enough to completely cover old labels so Aluminum Tape is used to cover old labels and then new labels are applied onto the tape.</td>
</tr>
</tbody>
</table>
Figure 5.- NOD1 MTL Supply and Return Hose Routing in N1 Port Alcove.

NOD1P1 4.1 Locate the oval shaped pass-thru on the forward face of the Port Alcove box structure.
Route NOD1 MTL Supply Hose (straight end) from area forward of box structure through pass-thru and into Port Alcove.
Refer to Figure 5.
4.2 QDIT12 Female Quick Disconnect ←|→ QDIT12 Male Fitting
Protective Cap ←|→ NOD1 MTL Supply Hose (straight end)
NOD1 MTL Supply Hose (straight end) ←|→ QDIT12 Female QD
Protective Cap →|← QDIT12 Male Fitting
Refer to Figure 5.

4.3 Route NOD1 MTL Return Hose (straight end) from area forward of box structure through pass-thru and into Port Alcove.
Refer to Figure 5.

4.4 QDIT11 Female Quick Disconnect ←|→ QDIT11 Male Fitting
Protective Cap ←|→ NOD1 MTL Return Hose (straight end)
NOD1 MTL Return Hose (straight end) ←|→ QDIT11 Female QD
Protective Cap →|← QDIT11 Male Fitting
Refer to Figure 5.

4.5 Place the NOD1 MTL Supply Hose (90 degree end) near QDIT03.
Place the NOD1 MTL Return Hose (90 degree end) near QDIT04.
Restrain hoses and connectors with Cable Ties or Releasable Wire Ties.
Refer to Figure 5.

Figure 6.- NOD1 MTL Supply and Return Label Replacement Locations.
4.6 Cover existing High Temp labels (Aluminum Tape).
Install new MTL Supply or MTL Return labels.
Refer to Figure 6.

5. **INSTALLING REPLACEMENT IMV DUCT**

<table>
<thead>
<tr>
<th>NOTE</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. A tape-reinforced Ziplock Bag is expected to be in place covering the IMV port in the deck Alcove where one end of the new duct is being installed. The cap originally intended to serve this function is launching on ULF-3 and will not arrive in time since the IMV Valve and ducting is expected to be removed prior to ULF-3 (prior to PMA 3 Relocate).</td>
</tr>
<tr>
<td>2. When installing duct couplers, try to have at least ~1.25&quot; of coupler surface installed onto duct.</td>
</tr>
<tr>
<td>3. Reuse of Band Clamps removed from IMV Fan and Silencers is allowed as long as clamps are undamaged, but new clamps (including extras) were flown and are preferred for installing new duct.</td>
</tr>
<tr>
<td>4. Installing Band Clamps around IMV duct support brackets is not required since these are for support during launch.</td>
</tr>
<tr>
<td>5. Two Duct Insulation Jackets removed from IMV Fan (Silencers) are reused and placed around both couplers on the new duct.</td>
</tr>
</tbody>
</table>
NOD1D1 5.1 Loosen and remove Band Clamp (one) holding tape-reinforced bag over Deck Alcove IMV Return duct (1/4" Deep Socket, 1/4" Drive; 6" Ext, 1/4" Drive; Ratchet, 1/4" Drive). Temporarily stow Band Clamp and trash Ziplock Bag. Refer to Figure 7.

5.2 Slide IMV Hose Clamp (5.25") onto 90 degree end of NOD1D1 to NOD1P1 IMV Duct. Install duct (90 degree end) onto Deck Alcove IMV Return duct by using attached coupler. Install Hose Clamp onto coupler, ensuring there is at least ~1/8" overlap from end of coupler and tighten (snug) (1/4" Deep Socket, 1/4" Drive; 6" Ext, 1/4" Drive; Ratchet, 1/4" Drive). Refer to Figure 7.

NOD1P1 5.3 Route remaining end of duct into Port Alcove through the x-shaped crossmembers.

5.4 Slide IMV Hose Clamp (5.25") onto end of duct. Install duct onto Port Alcove IMV Return duct by using attached coupler.
Install Hose Clamp onto coupler, ensuring there is at least ~1/8" overlap from end of coupler and tighten (snug) (1/4" Deep Socket, 1/4" Drive; 6" Ext, 1/4" Drive; Ratchet, 1/4" Drive). Refer to Figure 7.

5.5 Install duct Insulation Jacket (one) around duct coupler in Port Alcove (attached by Velcro). Repeat for duct coupler in Deck Alcove.

MCC-H

5.6 To open Node 1 Aft Port IMV Valve, perform 2.506 IMV VALVE RECONFIGURATION, step 2 (SODF: ECLSS: NOMINAL: THC), then:

5.7 To turn on LAB Aft Port IMV Fan, perform 1.504 IMV FAN ACTIVATION/DEACTIVATION POST CCS, step 2.2 (SODF: ECLSS: ACTIVATION AND CHECKOUT: THC), then:

5.8 To turn on Node 1 Aft Port IMV Fan, perform 1.504 IMV FAN ACTIVATION/DEACTIVATION POST CCS, step 2.2 (SODF: ECLSS: ACTIVATION AND CHECKOUT: THC), then:

PMA1

5.9 Cover PMA1 IMV Duct Grill (Velcro cover).
6. **ROUTING AND CONNECTING AIR SAMPLE, OXYGEN, AND NITROGEN HOSES**

<table>
<thead>
<tr>
<th>CAUTION</th>
</tr>
</thead>
<tbody>
<tr>
<td>Failure to prevent contact of metal braided ARS and O2/N2 hoses with power cables by proper routing or not using protective Glass Tape may cause hardware damage as hoses rub/chafe against power cables.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>NOTE</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. The Air Resource Sample (ARS) bulkhead feedthru connector contains a hose that was pre-integrated with the new feedthru. After feedthru was installed, hose was coiled and stowed in Node 1 Port/Deck radial area behind Closeout Panels. The steps below route hose to the Deck Alcove and connect to the ARS Valve.</td>
</tr>
<tr>
<td>2. The metal braided ARS, Oxygen (O2), and Nitrogen (N2) hoses should be kept at least 2 inches from any power cables, where possible. Power cables typically have red or yellow wire insulation.</td>
</tr>
<tr>
<td>3. O2 and N2 hoses have Gamah Fittings on one end that will be connected to bulkhead feedthrus that were installed previously. The other end of each hose has a Quick Disconnect that will be routed to the Deck Alcove but will not be connected until after Node 3 is installed. All of the Node 1 and Node 3 O2/N2 lines must be purged prior to connection into the O2/N2 system.</td>
</tr>
<tr>
<td>4. The N2 hose is connected before the O2 hose at Node 1 bulkhead in order to provide adequate access for the Fluid Fitting Torque Device (FFTD).</td>
</tr>
<tr>
<td>5. Torque input values for Gamah fittings in this step are written for the Prime FFTD (Serial Number 001).</td>
</tr>
</tbody>
</table>
| 6. Gamah fitting and FFTD reference information can be found in the following procedures:  
| A.2.1 FLUID FITTING TORQUE DEVICE (FFTD) ASSEMBLY AND USAGE  
| A.2.3 MATING GAMAH FITTING USING THE FFTD  
| 7. Hose routings depicted in the figures below have been chosen to provide the best potential for adequate clearance around power lines. |
Figure 8.- ARS and O2/N2 Hose Routing in Port Deck Radial Area.
Figure 9.- ARS and O2/N2 Hose Routing in Deck Alcove Area.

6.1 ARS HOSE ROUTING AND CONNECTION

6.1.1 Uncoil pre-positioned NOD1 Air Sample Hose (ARS) and route free end toward Deck Alcove area. Route hose just under the square-shaped diffuser bracket and into area between Port and Deck Alcoves. Refer to Figure 8.

6.1.2 Restrain hose, as necessary, with Cable Ties and wrap metal braided hose with Glass Tape anywhere it crosses or contacts other cables and hoses.

6.1.3 Route NOD1 Air Sample Hose (ARS) into Deck Alcove through zenith opening in the X-shaped structural member. Route NOD1 Air Sample Hose (ARS) hose parallel to new IMV duct installed in a previous step. Refer to Figure 9.

6.1.4 Node 1 Nadir Alcove ARS Valve is in “CLOSE” position (Switch rotated toward Starboard) Refer to Figure 9.

6.1.5 Existing ARS hose ←|→ Node 1 Nadir Alcove ARS Valve Inlet by loosening AN fitting (5/16” Combination Wrench) Refer to Figure 9.
6.1.6 ARS Protective Plug ←|→ NOD1 Air Sample Hose (ARS)
ARS Protective Plug →|← Existing ARS hose (hand-tight)

6.1.7 NOD1 Air Sample Hose (ARS) →|← Node 1 Nadir Alcove ARS Valve Inlet
Torque Inlet AN fitting to 70 in-lbs [5/16” Crowfoot Wrench, 1/4” Drive; (40-200 in-lbs) Trq Wrench, 1/4” Drive].

6.2 NITROGEN HOSE CONNECTION AND ROUTING
6.2.1 To set up Prime FFTD (S/N 001) utilizing 0.625” Reaction Gear and 0.875” Drive Gear (FFTD and Gamah Seal Maintenance Kit), perform A.2.1 FLUID FITTING TORQUE DEVICE (FFTD) ASSEMBLY AND USAGE, all (SODF: IFM: REFERENCE: APPENDIX A), then:

6.2.2 During Nitrogen and Oxygen hose connections steps
Inspect both sides of each gamah fitting for damage, debris before mating.
Report damage, debris to MCC-H.
Inspect male threads for absence of Braycote before mating.

NOD1PD2

6.2.3 Route NOD1 Nitrogen Hose P44 end (90 degree end) below Closeout Panel support bracket and above ducting or clamp bracket. Refer to Figure 8.

6.2.4 Don Clean Room Gloves.

6.2.5 3/8" Gamah Cap ←|→ J44 Nitrogen Feedthru (Node 1 Port Bulkhead) 3/8" Gamah Plug ←|→ NOD1 Nitrogen Hose P44 Stow cap and plug in Ziplock Bag. Refer to Figure 8 and Table 2.

If required, apply one drop of Braycote to exposed threads on bulkhead fitting; spread around threads by gloved hand.

6.2.6 NOD1 Nitrogen Hose P44 →|← J44 Nitrogen Feedthru Hand tighten Gamah fitting Refer to Figure 8 and Table 2.

6.2.7 Tighten, torque P44/J44 Nitrogen to 38 in-lbs (Input Torque) [Fluid Fitting Torque Device; 0.875" Drive Gear, 0.625" Reaction Gear; 1/4" to 3/8" Adapter, (10-50 in-lbs) Trq Wrench, 1/4" Drive]. Refer to Table 2.

6.2.8 Route NOD1 Oxygen Hose P45 end (90 degree end) below Closeout Panel support bracket and above ducting or clamp bracket. Refer to Figure 8 and Table 2.
6.3 OXYGEN HOSE CONNECTION AND O2/N2 HOSE ROUTING

**WARNING**

Failure to maintain clean environment during oxygen hose connection could result in a future fire hazard.

To prevent fire hazard during the Oxygen hose connection:
Minimize the time connectors and caps or plugs are open or cover using Teflon Bags or Disposable Gloves.

If Clean Room Gloves become contaminated or damaged
Replace immediately with new Clean Room Gloves.

If contaminants are found
   Notify MCC-H.
   Photo document (Digital Camera).
   Remove using Brass Picks and retain for return to ground.

If contaminants cannot be completely removed
   Reapply caps or plugs and hold for detailed MCC-H analysis.

6.3.1 3/8" Gamah Cap ←|→ J45 Oxygen Feedthru (Node 1 Port Bulkhead)
   3/8" Gamah Plug ←|→ NOD1 Oxygen Hose P45
   Stow cap and plug in Ziplock Bag.
   Refer to Figure 8 and Table 2.

   If required, apply one drop of Braycote to exposed threads on bulkhead fitting; spread around threads by gloved hand.

6.3.2 NOD1 Oxygen Hose P45 →|← J45 Oxygen Feedthru
   Hand tighten Gamah fitting.
   Refer to Figure 8 and Table 2.

6.3.3 Tighten, Torque P45/J45 Oxygen to 38 in-lbs (Input Torque)
   [Fluid Fitting Torque Device; 0.875" Drive Gear, 0.625" Reaction Gear; 1/4" to 3/8" Adapter, (10-50 in-lbs) Trq Wrench, 1/4" Drive].
   Refer to Table 2.

6.3.4 Doff Clean Room Gloves.

6.3.5 Route NOD1 Oxygen Hose and NOD1 Nitrogen Hose free ends toward Deck Alcove area.
Route hoses just under the square-shaped diffuser bracket and into area between Port and Deck Alcoves.
Refer to Figure 8 and Table 2.
6.3.6 Restrain hoses, as necessary, with Cable Ties and wrap metal braided hoses with Glass Tape anywhere hoses cross or contact other cables and hoses to prevent damage from rubbing or chafing.

NOD1D1 6.3.7 Route O2 and N2 hoses into Deck Alcove through aft opening in X-shaped structural member. Route both hoses on aft side of alcove box and position Quick Disconnects (QD) with enough slack to allow future connection to O2/N2 ports on aft port end of alcove box. Restrain hoses and QDs with Releasable Cable Ties, as necessary. Refer to Figure 9.

7. ROUTING AND CONNECTING IMV POWER AND DATA CABLES

<table>
<thead>
<tr>
<th>NOTE</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. The NOD1 IMV Valve Power Cable (W9436) and NOD1 IMV Valve Data Cable (W9437) were connected to the IMV Valve in the Midbay Hardware Installation procedure. The other ends of the cables are left stowed in the Node 1 Port Deck Radial area and the steps below route cables to the old IMV location in the Deck Alcove to make the final connections.</td>
</tr>
<tr>
<td>2. The IMV Power Cable (W9436) should be routed with at least 2 inch clearance from other cables when it is running parallel with other cables or metal braided hoses. The recommended routing in Port Deck area is in between the green cables running aft to forward.</td>
</tr>
<tr>
<td>3. The IMV Data Cable (W9437) can be routed near other cables of similar type (green cables). The recommended routing in Port Deck area is just above upper green cable.</td>
</tr>
</tbody>
</table>
Figure 10.- IMV Valve Power and Data Routing in Port Deck Area.
1.102 NODE 1 PREP FOR NODE 3 – ALCOVE HARDWARE INSTALLATIONS

NOD1PD2 7.1 Uncoil pre-positioned IMV Valve Power/Data Cables and route forward toward Deck Alcove area. Route cables under the square-shaped diffuser bracket and into area between Port and Deck Alcoves. Refer to Figure 10.

NOD1D1 7.2 Route cables into Deck Alcove through zenith opening in the X-shaped structural member. Route cables toward area where IMV Valve was removed. Refer to Figure 11.

7.3 Protective Cap ← | → W0136 P426
    Protective Cap ← | → NOD1 IMV Valve Power Cable (W9436) J426
    W0136 P426 → | ← NOD1 IMV Valve Power Cable (W9436) J426
    Temporarily stow caps. Refer to Figure 11.

7.4 Protective Cap ← | → W0308 P427
    Protective Cap ← | → NOD1 IMV Valve Data Cable (W9437) J427
    W0308 P427 → | ← NOD1 IMV Valve Data Cable (W9436) J427
    Temporarily stow caps. Refer to Figure 11.
7.5 Restrain cables with Cable Ties, as necessary, trying to keep at least a 2 inch separation around IMV Power Cable from other metal braided hoses and any of the green colored Wire Harnesses or the IMV Data Cable.

8. CONNECTING WIRELESS AUDIO CABLE (UHF)

**NOTE**

1. The NOD1 Wireless Audio Cable (W9425) was routed and a Loopback Plug was installed on one end of the cable in the Midbay Hardware Installation procedure. The other end of the cable is left stowed in the Node 1 Port Deck Radial area and the steps below make the final connections.

2. No safing is required for this cable connection and there are no known impacts to Wireless Audio (UHF) communication during the connection.

---

**Figure 12.** Wireless Audio Cable Connection in Port(Deck) Area.

8.1 Locate stowed coil of NOD1 Wireless Audio Cable (W9425) in Port Deck Radial area. Uncoil cable and route underneath Closeout Panel support brackets routing cable toward deck Hatch area. Route free end to proximity of J120 bulkhead connection. Refer to Figure 12.

8.2 W0404 P120 ←|→ J120 (Deck Bulkhead)

11. PHOTO DOCUMENTING INSTALLED HARDWARE
11.1 Prior to reinstallation of Closeout Panels, photo document all of the installed and reconfigured hardware (Digital Camera).

12. INSTALLING IMV GRILLE AND RMO COVERS ONTO CLOSEOUT PANELS
12.1 Loosen and remove noncaptive bolts, washers, and nuts (eight) holding square grille onto NOD1P2-11 Closeout Panel (#10 Long Torq Driver, 3/8" Drive; Ratchet, 3/8" Drive; 1/4" Deep Socket, 1/4" Drive; Ratchet, 1/4" Drive). Temporarily stow any bolts, washers, and nuts (will be reused).

12.2 Remove Grille from NOD1P2-11 Closeout Panel. Temporarily stow.

NOTE
1. The 1/4" Ratchet and 1/4" Deep Socket is called out to help remove/install nuts on inside of Closeout Panel since it is handy (used in previous steps). If a 1/4" Combination Wrench fits better or is preferred, it can be substituted.

2. During removal of Grille, using the 1/4" socket/wrench to remove nuts while using Torq Driver to prevent bolt turning can reduce potential of stripping the Torq bolt heads.
12.3 Install NOD1 IMV Diffuser Cover in place of removed grille (on cabin side of Closeout Panel) and use bolts, washers, and nuts (eight) removed from grille.
Tighten (snug) fasteners (eight) (#10 Long Torq Driver, 3/8" Drive; Ratchet, 3/8" Drive; 1/4" Deep Socket, 1/4" Drive; Ratchet, 1/4" Drive).

********************************************************************************
* If any of the Torq bolts are damaged or if any of the bolts, nuts, or washers are lost
* A full complement, including extras of each flown with the new Diffuser Cover, can be used to replace any damaged or missing parts.
********************************************************************************

12.4 Torque NOD1 IMV Diffuser Cover fasteners (eight) to 23 in-lbs [#10 Long Torq Driver, 3/8" Drive; 1/4" Deep Socket, 1/4" Drive; Ratchet; (10-50 in-lbs) Trq Wrench, 1/4" Drive; 1/4" to 3/8" Adapter (if required)].

NOD1PD2 12.5 Reinstall NOD1P2-11(NOD1D2-16) Closeout Panels, and tighten (snug) fasteners (eleven) (5/32" Hex Head, 1/4" Drive; Driver Handle, 1/4" Drive).
Refer to Figure 2.
1.102 NODE 1 PREP FOR NODE 3 – ALCOVE HARDWARE INSTALLATIONS

NOD1D2  12.6 Install Node 1 IMV Valve RMO Cover over location of removed IMV RMO on NOD1D2-14 Closeout Panel (attached by adhesive-backed Velcro).
Refer to Figure 16.

13. REINSTALLING REMAINING CLOSEOUT PANELS
13.1 Reinstall all remaining Closeout Panels from this procedure, and tighten (snug) fasteners (eleven) (5/32" Hex Head, 1/4" Drive; Driver Handle, 1/4" Drive).
Refer to Figure 2.

13.2 Reinstall any remaining Closeout Panels and tighten (snug) fasteners (eleven) (5/32" Hex Head, 1/4" Drive; Driver Handle, 1/4" Drive).
Refer to Figures 1, 2, and 3 in NODE 1 PREP FOR NODE 3 – ALCOVE HARDWARE INSTALLATIONS (SODF: ASSY OPS: ULF3).
14. **INSTALLING NEW NODE 3 LABELS**

14.1 Install new Node 3 label (arrow toward Hatch) over existing Cupola label on NOD1P2-34 Closeout Panel.
Install new Node 3 label (arrow toward Hatch) over existing Cupola label on NOD1P2-14 Closeout Panel.
Refer to Figure 17.

15. **CLEANUP**

15.1 Notify **MCC-H** of task completion.

15.2 Record IMV Fan Serial Number: ____________

15.3 Stow tools, materials.

15.4 Stow removed and extra Mod Kit hardware per Table 5.
Refer to official Stowage Note for final recommended stowage locations of Bags or CTBs.

</table>
OBJECTIVE:
To perform the final connection of the Video/Audio Bus Channel A cable. The routing of the cable was performed as part of the Midbay Hardware Installation procedure. The final connections of this cable were placed into a stand-alone procedure due to the safing and coordination required in order to make the connections since the Node 1 Forward Hatch is closed during the cable connections.

LOCATION:
Node 1 Starboard Deck Radial area, Node 1 Fwd Endcone (above Hatch)

DURATION:
90 minutes

PARTS:
Node 1 Avionics and Fluids Modification Kit:
  Wire Ties P/N T50R2HALC2

TOOLS:
Flashlight (crew preference)
Digital Camera
CSA-O2
ISS IVA Toolbox:
Drawer 2:
  Driver Handle, 1/4" Drive
  Ratchet, 1/4" Drive
  5/32" Hex Head, 1/4" Drive
  1/8" Hex Head, 1/4" Drive

REFERENCED PROCEDURE(S):
2.310 AUDIO DETAILED TROUBLESHOOTING
1. Prior to connection of NOD1 Video/Audio Bus A Cable (W9423), the Airlock Common Video Interface Unit (CVIU) and the Audio Bus Controller (ABC) in the Lab attached to audio channel A (ABC 1) will be deactivated and un-powered. This will result in a loss of redundancy for audio communication equipment and a loss of video from Airlock.

2. Deactivating ABC 1 will cause some downstream ORUs to declare a PBIT Fault associated with the loss of Fiber Optic A Channel. Downstream ORUs are completely functional with only Fiber Optic B (ABC 2) being active.

3. The NOD1 Video/Audio Bus A Cable (W9423) and the existing cabling it replaces (W0401) contain fiber optic cable; therefore, care should be taken to handle carefully and to prevent bending into a tight bend radius.

4. After the new Video/Audio Bus A Cable is connected, the CVIU and ABC will be reactivated. After reactivation, the fiber optic I/O is cycled in order to clear transient PBIT faults on ORUs. A short loss of communication with affected ORU is expected during this process.

   Remove Handrail from NOD1P1-02.
   Remove Seat Track brackets (two), fasteners (two each), (1/8" Hex
   Head, 1/4" Drive; Ratchet, 1/4" Drive).
   Remove NOD1P1-02 Closeout Panel, fasteners (eighteen), (5/32" Hex
   Head, 1/4" Drive; Driver Handle, 1/4" Drive).
   Temporarily stow Handrail, Seat Track brackets, Closeout Panel.
   Refer to Figure 1.

2.8 Perform CSA-O2 sampling in each area where a Closeout Panel was
   removed for 1 minute.
   If O2 % is between 15.7 to 24.1 %, proceed.

   If O2 % is not between 15.7 to 24.1 %
   ✓MCC-H

3. CONNECTING VIDEO/AUDIO A CABLE AT 1 STARBOARD

   NOTE
   1. The NOD1 Video/Audio Bus A Cable (W9423) was routed and the P78
      end of cable was stowed behind Closeout Panels near the final
      connection location.
   2. It should be possible to remove the two flat panels just under the Node 1
      Starboard Hatch in order to locate the connector on the bulkhead (J78).
3.1 W0401 P78 ←|→ J78 (Starboard bulkhead)
Protective Cap ←|→ NOD1 Video/Audio Bus A Cable (W9423) P78
Protective Cap →|← W0401 P78
NOD1 Video/Audio Bus A Cable (W9423) P78 →|← J78 (Starboard bulkhead)
Refer to Figure 2.

3.2 Stow W0401 P78 connector and restrain connector (Wire Ties).
Restrain Video/Audio Bus A Cable as necessary (Wire Ties).

3.3 Photo document new cable connection and stowage of old connector (Digital Camera).

4. ROUTING VIDEO/AUDIO A CABLE TOWARD FWD HATCH AREA

NOTE
1. The NOD1 Video/Audio Bus A Cable (W9423) was routed and the P3 end of cable was stowed in the Overhead Port Radial area.

2. The cable will be routed behind the Port Alcove area and over toward the Node 1 Forward Hatch. The cable will be routed to the area underneath the NOD1P1-02 Closeout Panel in preparation for closing the Node 1 Forward Hatch and removing the Closeout Panel above the Hatch.
1.103 NODE 1 PREP FOR NODE 3 – VIDEO/AUDIO BUS A CONNECTION

Locate stowed coil of NOD1 Video/Audio Bus A Cable (W9423) in Overhead Port Radial area. Uncoil cable and route behind Port Alcove box structure and around to forward endcone area to port of the Node 1 Forward Hatch. Refer to Figure 3.

WARNING

Removing NOD1O1-02 Closeout Panel requires moving Node 1 Forward Hatch to the closed position. Ensure crewmembers are not isolated from return vehicle.
1. Procedure is written to minimize time that Node 1 Forward Hatch is closed while cable reconfigurations above Hatch are being performed.

2. Past crews have had difficulty getting NOD1O1-02 Closeout Panel reinstalled. Rubber gaskets were noted to get wedged in between panel and other surrounding panels causing an extremely tight fit. It may be necessary to cut the rubber gaskets from panel in order to get panel reinstalled in a timely manner.

3. New Video/Audio Bus A cable should be restrained to the existing fiber optic cable (purple insulation) in the forward endcone because both cables are the same type/EMI classification.

5.1 Closing Node 1 Forward Hatch
✓ No Crewmembers in LAB, Node 2, JEM, or Columbus

Close Node 1 Forward Hatch per decal steps 1 to 3; do not engage Hatch Latches.

5.2 Removing Closeout Panel NOD1O1-02
Remove NOD1O1-02 Closeout Panel, fasteners (seven) (5/32” Hex Head, 1/4” Drive; Driver Handle, 1/4” Drive).
Temporarily stow.
Refer to Figure 1.

5.3 Perform CSA-O2 sampling behind Closeout Panel for 1 minute.
If O2 % is between 15.7 to 24.1 %, proceed.

If O2 % is not between 15.7 to 24.1 %

6. COMPLETING CABLE RESTRAINT AND PHOTO DOCUMENTATION

NOD1OP

6.1 Restrain cable as necessary with Wire Ties in Overhead Port Radial Area and behind Port Alcove to existing fiber optic cables (purple insulation). If necessary, any extra length of cable should be coiled into a round coil of bend radius at least 10 times diameter of cable with coil stowed in Overhead Port (Port Alcove) area. Restrain coil (Wire Ties).

6.2 Photo document finished routing and restraint of cables (Digital Camera).

7. INSTALLING CLOSEOUT PANELS

NOD1P1

7.1 Installing Closeout Panel NOD1P1-02
Install NOD1P1-02 Closeout Panel and tighten (snug) fasteners (eighteen) (5/32” Hex Head, 1/4” Drive; Driver Handle, 1/4” Drive). Install Seat Track brackets (two), tighten (snug) fasteners (two each), (1/8” Hex Head, 1/4” Drive; Ratchet, 1/4” Drive). Install Handrail on NOD1P1-02.

NOD1SD2

7.2 Install NOD1SD2-22(NOD1SD2-23) Closeout Panels and tighten (snug) fasteners (six) (5/32” Hex Head, 1/4” Drive; Driver Handle, 1/4” Drive).

NOD1OP

7.3 Install NOD1O2-11(NOD1P2-16) Closeout Panels and tighten (snug) fasteners (eleven) (5/32” Hex Head, 1/4” Drive; Driver Handle, 1/4” Drive).

7.4 Install the following Closeout Panels and tighten (snug) fasteners (5/32” Hex Head, 1/4” Drive; Driver Handle, 1/4” Drive):
NOD1OP2-25 (eight fasteners)
NOD1P1-01 (twelve fasteners)
NOD1P0-01 (three fasteners)
NOD1P0-02 (three fasteners)

8. CLEANUP

8.1 Notify MCC-H of task completion.

8.2 Stow tools.
OBJECTIVE:
During the ULF3 docked mission, remove Battery Charger Modules (BCM), BCM-3 and BCM-4 from the Airlock Avionics Rack (A/L1F1). Install the BCM removed from BCM-4 location in BCM-1 location (which is currently empty). Install two new BCMS launching on ULF3 in BCM-3 and BCM-4 locations. BCM R&R requires rotation of the A/L1F1 Rack.

LOCATION:
Installed: Airlock Avionics Rack (A/L1F1)

DURATION:
2 hours, 30 minutes total crew time
45 minutes to rotate A/L1F1 down
60 minutes to R&R BCMS
45 minutes to rotate A/L1F1 up

CREW:

3.1 Remove Airlock Closeout Panels in order per Table 1 (Ratchet, 1/4"
   Drive; 5/32" Hex Head, 1/4" Drive).

Figure 2.- J62 Connector Mounted to A/L1OF2 Closeout Panel.
3.2 Disengage J62 connector fasteners (four) on A/L1OF2 Closeout Panel (Ratchet, 1/4" Drive; 5/32" Hex Head, 1/4" Drive). Refer to Figure 2.

3.3 Remove A/L1OF2 Closeout Panel, fasteners (twelve) (Ratchet, 1/4" Drive; 5/32" Hex Head, 1/4" Drive).

4. **DISENGAGING LOWER LAUNCH RESTRAINTS**
Refer to Figures 3, 4.

**NOTE**
All directional references (up, down, left, right) are with respect to front face of Rack, as you face Rack.

Figure 3.- Location of Rack Attachment Mechanisms.
Figure 4.- Lower Launch Restraint (Left Side).

NOTE
1. Begin with Rack left Lower Launch Restraint.
2. Previous crews have indicated that left Lower Launch Restraint may require more force than expected to disengage.
3. Lower Launch Restraint locking screw is noncaptive. It is completely removed to prevent binding during Launch Restraint disengagement and then reinstalled.

4.1 Remove left Locking Screw (Ratchet, 3/8" Drive; 6" Long, 3/8" Hex Head, 3/8" Drive).
4.2 Disengage left Lower Launch Restraint 10 to 12 turns until hard stop (Ratchet, 3/8" Drive; 6" Long, 3/8" Hex Head, 3/8" Drive).
4.3 Install, snug left Locking Screw (Ratchet, 3/8" Drive; 6" Long, 3/8" Hex Head, 3/8" Drive).
4.4 Repeat steps 4.1 to 4.3 for right Lower Launch Restraint.
5. **DISENGAGING UPPER ATTACH MECHANISMS**  
Refer to Figures 3, 5.

![Image of Upper Attach Mechanism]

**Figure 5.- Left Upper Attach Mechanism.**

<table>

8. TEMPORARILY ROTATING RACK UP

8.1 Rack rotation path unobstructed

Remove any unnecessary equipment.

---

**CAUTION**

A/L1F1 does not have Pivot Fittings and will be free floating; care must be taken not to damage Rack umbilicals during Rack rotation.

---

8.2 Slowly rotate Rack up to a controlled stop.
Temporarily restrain Rack.

9. REMOVING BCM-3, BCM-4

---

Figure 7.- BCM Housing Assembly Captive Fasteners.

---

**NOTE**

BCM-3 P/N: SEG39128256-303, S/N: 1006

9.1 Loosen BCM-3 fasteners (four) (Ratchet, 3/8" Drive; #2 Long Trq Driver, 3/8" Drive).
Refer to Figure 7.

---

**NOTE**

1. When Clamp Fasteners are tightened, they drive a wedge on the BCM rack structure rail in the overhead direction, which ensures that the BCM is flush with its coldplate for proper cooling.

2. If high running torque is noted during loosening of Clamp Fasteners, they may be too far disengaged and will need to be retightened before BCM can be removed.

3. Ground testing has shown that approximately ten turns should disengage the Clamp Fasteners enough to slide out the BCM.
9.2 Loosen Clamp Fasteners (two) ten turns (or as required) clamping BCM-3 to Housing Assembly Coldplate (Ratchet, 1/4" Drive; 5/16" Socket, 1/4" Drive).
Refer to Figure 7.

9.3 Remove BCM-3 by grasping handle then pulling forward.
Label BCM-3 (Gray Tape, Sharpie).
Temporarily stow.

9.4 Double bag BCM-3 (P/N SEG39128256-303) (24” x 24” Ziplock Bags).
Stow for return.

**NOTE**

BCM-4 P/N: SEG39128256-305, S/N: 1004

9.5 Loosen BCM-4 fasteners (four) (Ratchet, 3/8” Drive; #2 Long Trq Driver, 3/8” Drive).
Refer to Figure 7.

9.6 Loosen Clamp Fasteners (two) ten turns (or as required), clamping BCM-4 to Housing Assembly Coldplate (Ratchet, 1/4” Drive; 5/16” Socket, 1/4” Drive).
Refer to Figure 7.

9.7 Remove BCM-4 by grasping handle then pulling forward.
Label BCM-4 “Removed from BCM-4” (Gray Tape, Sharpie).
Temporarily stow for installation into BCM-1 location.

10. **REMOVING BCM SERIAL JUMPER FROM EMPTY BCM-1 LOCATION**

Figure 8.- FDF Cover for BCM-1 Opening.
1. Remove FDF Cover, Kapton Tape from BCM-1 opening. Refer to Figure 8.

2. Label 6” x 6” Ziplock Bag, “Battery Charger Module Removal Kit: P/N SJG39137954-301.”

3. BCM Serial Data Connector J3 \(\leftrightarrow\) BCM-1 W082-P4
   BCM Connector Cap J1 \(\leftrightarrow\) BCM-1 GW005-P1
   BCM Connector Cap J2 \(\leftrightarrow\) BCM-1 W075-P7
   Stow in Ziplock Bag labeled “Battery Charger Module Removal Kit: P/N SJG39137954-301.”
   Photo document Ziplock Bag (Digital Camera).

4. Remove Kapton Tape from BCM-1 Wire Harnesses (three).

11. INSTALLING BCM-1, BCM-3, BCM-4

11.1 Retrieve BCM removed from BCM-4 location (P/N SEG39128256-305, labeled “Removed from BCM-4”). Position BCM in BCM-1 installation location.

11.2 Tighten, torque Clamp Fasteners (two) to 50 in-lbs [Ratchet, 1/4” Drive; 5/16” Socket, 1/4” Drive; (40-200 in-lbs) Trq Wrench, 1/4” Drive].

11.3 Tighten, torque BCM fasteners (four), to 22 in-lbs [Ratchet, 1/4” Drive; 1/4” to 3/8” Adapter; #2 Long Trq Driver, 3/8” Drive; (10-50 in-lbs) Trq Wrench, 1/4” Drive].

11.4 Repeat steps 11.1 to 11.3 to install new BCM (P/N SEG39128256-306, S/N 1001) in BCM-3 location.

11.5 Repeat steps 11.1 to 11.3 to install new BCM (P/N SEG39128256-306, S/N 1003) in BCM-4 location.

11.6 Doff Static Wrist Tether.

Figure 9.- Final BCM Configuration.
11.7 Verify BCM Configuration per Figure 9.

12. REMATING CABLES TO REAR OF BCM-1, BCM-3, BCM-4

12.1 Rack rotation path unobstructed

Remove any unnecessary equipment.

**CAUTION**

A/L1F1 does not have Pivot Fittings and will be free floating; care must be taken not to damage Rack umbilicals during Rack rotation.

12.2 Slowly rotate Rack down to a controlled stop.
As required, temporarily restrain Rack.

12.3 Mating Cables (three) to BCM-1
GW005-P1 →|← J1
W075-P7 →|← J2
W082-P4 →|← J3
Refer to Figure 6.

12.4 Mating Cables (three) to BCM-3
GW007-P1 →|← J1
W075-P5 →|← J2
W082-P7 →|← J3
Refer to Figure 6.

12.5 Mating Cables (three) to BCM-4
GW008-P1 →|← J1
W075-P4 →|← J2
W082-P7 →|← J3
Refer to Figure 6.

13. INSTALLING RACK ACCESS PANEL

13.1 Photo document rear of BCMs (Digital Camera).

13.2 Check for FOD around work area within 1 m radius.

13.3 Install rack access panel.
Tighten fasteners (forty-four) securing rear access panel to Rack
(Speed Handle Assy; 5/32" Hex Head, 1/4" Drive).

14. ROTATING A/L1F1 UP

14.1 Check Rack rotation path unobstructed.
Remove any unnecessary equipment.

\( \sqrt{No \text{ interference with Lower Launch Restraints}} \)
14.2 Verify Knee Brace Strut Spherical Bearings (two) straight. Refer to Figure 10.

14.3 Slowly rotate Rack up until Knee Brace Strut Spherical Bearings (two) slide inside Rack Upper Attach Mechanism. Refer to Figures 3, 5, 10.

15. ENGAGING LOWER LAUNCH RESTRAINTS
Refer to Figures 3, 4.

15.1 Remove right Locking Screw (Ratchet, 3/8" Drive; 6" Long, 3/8" Hex Head, 3/8" Drive).

15.2 Engage right Lower Launch Restraint 10 to 12 turns until hard stop (Ratchet, 3/8" Drive; 6" Long, 3/8" Hex Head, 3/8" Drive).

15.3 Reinstall, snug right Locking Screw (Ratchet, 3/8" Drive; 6" Long, 3/8" Hex Head, 3/8" Drive).
Verify Locking Screw flush with Rack structure.

15.4 Repeat steps 15.1 to 15.3 for left Lower Launch Restraint.

16. ENGAGING UPPER ATTACH MECHANISMS
Refer to Figures 3, 5.
NOTE
1. Begin with left Upper Attach Mechanism.
2. If Upper Attach Mechanisms cannot be fully engaged, past crews have recommended the following:
   a. Remove Locking Screws.
   b. Disengage left Lower Launch Restraint approximately 2/3 (between 6 and 8 turns).
   c. Disengage right Lower Launch Restraint approximately 1/2 (between 5 and 6 turns).
   e. Retighten Lower Launch Restraints to hard stop and install Locking Screws.

16.1 Verify Locking Screw fully unlocked.

CAUTION
Do not force Upper Attach Mechanism pinions. Mechanism should easily engage Knee Brace Spherical Bearings.

NOTE
To engage left pinion, turn  
To engage right pinion, turn  

16.2 Engage pinion into Knee Brace Spherical Bearing until Shear Pin visible at top of mechanism (Ratchet, 3/8" Drive; 6" Long, 3/8" Hex Head).

16.3 Tighten Locking Screw (Ratchet, 3/8" Drive; 6" Long, 3/8" Hex Head, 3/8" Drive).

16.4 Repeat steps 16.1 to 16.3 for right Upper Attach Mechanism.

17. POST MAINTENANCE
17.1 Update BCM labels for new configuration (Gray Tape, Sharpie). Refer to Figure 9.

17.2 Photo document new BCM configuration (front side) (Digital Camera).

17.3 Stow BCM (one) for return, tools, materials. Stow Ziplock Bag labeled “Battery Charger Module Removal Kit: P/N SJG39137954-301.”

18. REINSTALLING AV RACK CLOSEOUT PANELS
18.1 Check for FOD around work area within 1 m radius.

18.2 Attach UIP Closeout to Rack, 1/4 Turn Fasteners (two).
18.3 Retrieve A/L1OF2 Closeout Panel. Tighten J62 connector fasteners (four) on A/L1OF2 Closeout Panel (Ratchet, 1/4" Drive; 5/32" Hex Head, 1/4" Drive). Refer to Figure 2.

18.4 Reinstall A/L1OF2 Closeout Panel, fasteners (twelve) (Ratchet, 1/4" Drive; 5/32" Hex Head, 1/4" Drive).

Yes

No
1. When possible, connection and disconnection of QDs requires adjoining lines to be at approximately ambient pressure on both sides of the QD.

2. Expect Advisory 'O2 Hi P Supply Pressure Below Normal-A/L'. Associated caution events should be inhibited.
TRANSFER
This Page Intentionally Blank
OBJECTIVE:
This procedure will be used to transfer the frozen HRP Blood vial bags, HRP Urine bags, Rad Silk Egg Cases, Lada VPU samples, Solo and Card science samples from ISS MELFI to Glacier using a Double Coldbag and two Icepac Belts in preparation for Glacier’s descent on ULF-3. This activity is performed by ISS and shuttle crewmembers. The Glacier door will be locked after sample transfer is complete.

IFM Tool Locker (MF28K):
3/16” Hex Head, 3/8” Drive
1/4” - 3/8” adapter
4” Extension, 1/4” Drive
Trq Wrench 1/4” Drive (40 to 200 in-lbs)

PARTS:
Double Coldbag S/N TBD
Light Duty Cryo Gloves (from ISS)
Small Coldplate/Wiretray Cover P/N SEG33111361-301

ITEMS TO UNSTOW WITHIN PROCEDURE:
Icepac Belt -32°C (two)
HRP Urine (nine bags)
HRP Blood (twenty-two bags)
Rad Silk (three egg cases)
SOLO (two bags)
CARD (one bag)
LADA VPU (two ziplocks)

MELFI 1. PACKING MELFI SAMPLES INTO DOUBLE COLDBAG

WARNING
Protective Gloves must be worn when manipulating MELFI trays or samples to prevent injury to exposed skin.

CAUTION
1. Minimize exposure of MELFI trays, frozen Icepacs, and samples to ambient air to prevent increased sample temperatures.
2. Double Coldbag lid should remain closed when the internal volume is not being accessed.

NOTE
60 seconds & 45 minute MELFI Dewar opening rules do not apply during packing of the Coldbag.

1.1 Don Light Duty Cryo Gloves
1.2 Perform Double Coldbag packing per Figure 1.
If Tray is stuck,
Insert Small Coldplate/Wireway Cover completely between Tray and Dewar wall. Firmly holding both Small Coldplate/Wireway Cover and Tray Handle, remove Tray from Dewar.
Reference: 4.010 MELFI REMOVAL OF A STUCK TRAY, (US PODF: MELFI) if needed

5. **TEMPORARY STOW DOUBLE COLDBAG**

5.1 Transfer Double Coldbag to location that allows temporary stowage for dry out (lid open) and protection from kick loads.

5.2 Remove Icepac Belt -32°C (two) from Double Coldbag and place in temporary stowage location to air dry.

5.3 Return Light Duty Cryo Gloves to original location on ISS.

5.4 Notify **MCC-H** that transfer activities completed and temporary stowage locations for Double Coldbags and Icepac.
6. **GROUND UPDATES FOR IMS (GROUND-ONLY)**

| Ground updates IMS for the following parts:  
| Double Cold Bag S/N TBD  TO: per crew call down (step 5.4)  

21 OCT 09
OBJECTIVE:
This procedure will be used for both National Laboratory Pathfinder (NLP) Cells-2 and Vaccine-6 activities.

For NLP-Cells-2 the entire procedure will be executed to access the Group Activation Pack (GAP) inside Commercial Generic Bioprocessing Apparatus (CGBA). This includes powering down CGBA, accessing the internal volume of CGBA, and retrieving and activating of NLP-Cells-2 GAPs. It also contains the proper steps to close CGBA and restore power.

For NLP-Vaccine-6, only steps 2, 6 and 11 of this procedure will be executed because these GAPs are stowed at ambient.

PARTS:
NLP-Cells-2
  Group Activation Packs (GAPs)
  Hand Crank (located in foam on left side of CGBA unit)
  Ziplock Bag (if required)

NLP-Vaccine-6
  Group Activation Packs (GAPs)
  Hand Crank
  Ziplock Bag (if required)

1. If Vaccine-6 activity
    Perform only steps 2, 6, 11.
    If Cells-2 activity, perform all.

2. Check Flight Plan Detail Page or OSTPV Execution Notes for which GAPs to activate.
   Record information in Table 1 in step 6.1.

   CAUTION
   To protect science, the CGBA power off time should not exceed 30 minutes.

OBJECTIVE:
Replace Advanced Biological Research System (ABRS) Ascent Air Filter Cartridge with two ABRS Air Filter Cartridges.

PARTS
ABRS Air Filter Cartridge (two) P/N 1020-M-3060-00

TOOLS
#1 Phillips Head Screwdriver
Gray Tape
Scissors

MATERIALS
6x6 Ziplock Bag P/N 528-50000-2
Dry Wipes

1. REMOVE ABRS ASCENT FILTER CARTRIDGE

1.1 Remove Latch Safety Bolts (two) from ABRS door. Tape bolts to door with gray tape. Leave bolts in place until ABRS transfer complete (#1 Phillips screwdriver). Refer to Figure 1.

1.2 Toggle Door latch cw to unlock and open Door.
1.3  Loosen Velcro strap over ABRS Air Ascent Filter Cartridge (see Figure 2).

1.4  Remove ABRS Ascent Air Filter Cartridge by lifting cartridge up along pivoting manifold and pulling until it is unseated (see Figure 3).

Figure 2. Air Filter Cartridge Velcro Straps.
1.5 Insert used ABRS Ascent Air Filter Cartridge into 6x6 Ziplock Bag.

1.6 Label the Ziplock Bag, "ABRS Ascent Air Filter Cartridge".
Place in dry trash

2. INSTALL NEW ABRS AIR FILTER CARTRIDGE

2.1 Loosen Velcro strap that will hold down two ABRS Air Filter Cartridges

2.2 Retrieve ABRS Air Filter Cartridge in sealed plastic bag.

2.3 Carefully inspect unopened plastic bag for loose particles.
If loose particles are seen inside plastic bag containing ABRS Air Filter Cartridge
Do not open bag. ✓MCC-H

2.4 Cut bag between heat seal and zipper to remove heat seal portion of bag (Scissors).
Remove ABRS Air Filter Cartridge from bag.
2.5 Inspect the four connector O-rings on ABRS Air Filter Cartridge (see Figure 4) and the manifold for debris or damage (see Figure 3). Clean with Dry Wipes, if necessary.

If connections cannot be cleared

✓ MCC-H

Figure 4. Connector O-rings on ABRS Air Filter Cartridge.

2.6 Insert ABRS Air Filter Cartridge by lifting manifold upward (see Figure 3) and inserting new Cartridge with transparent filtration module cover facing up, ensuring alignment marks match per Figure 5. Rotate Cartridge downward into place.
2.7 Retrieve second filter from bag and repeat steps 2.5 to 2.6 for second ABRS Air Filter Cartridge.

2.8 Notify MCC-H of the Serial Number and Envir Research Chamber position of each new ABRS Air Filter Cartridge just installed.

2.9 ✓ABRS Air Filter Cartridges are within the inside of the periphery wall (see Figure 6).

Figure 5. Two Views of ABRS Air Filter Cartridge Alignment Marks.
2.10 Tighten strap over the two ABRS Air Filter Cartridges.

**CAUTION**

Ensure that no cables or hoses are protruding when ABRS Door is closed. Pinching or trapping cables or hoses in Door may result in permanent damage.

2.11 Close Door. Toggle latch ccw to lock door.

2.12 Stow parts, tools, materials to proper locations.

3. **GROUND UPDATES TO IMS**

Ground should update IMS for the following parts:

ABRS Air Filter Cartridge P/N 1020-M-3060-00 (two) To: Installed in ABRS (step 2.6)
ABRS TRANSFER MDDK TO ISS
(assy ops/ulf3/fin 1) page 1 of 9 pages

OBJECTIVE:
Transfer Advanced Biological Research System (ABRS) from the shuttle middeck to the
ISS (US LAB, EXPRESS-2 RACK). This activity removes a locker from EXPRESS-2
Rack, retrieves the ABRS payload from the shuttle middeck, removes launch lock bolts,
powers it off, transfers it to the EXPRESS-2 Rack (where the locker was removed) and
powers it to a survival state and then installs it.

LOCATION:
Removed: MF28E
Installed: EXPRESS-2 RACK LAB101_D1

PARTS:
Required at EXPRESS-2 Rack:
- EXPRESS Rack Power Cable (38") (683-44024-2) (JPM1F6_F1)
- EXPRESS Rack Data Cable (38") (683-44267-2) (JPM1F6_F1)
- ABRS MTL Supply Hose (P/N 1020-M-0001-00) with Volume Compensator (P/N
  PCG-F10052-1) (located in ABRS Stowage Bag, see Transfer List)
- ABRS MTL Return Hose P/N 1020-M-0002-00 with Volume Compensator (P/N PCG-
  F10052-1) (located in ABRS Stowage Bag, see Transfer List)
- ABRS Refurbishment Kit P/N 1020-M-6013-00 (located in ABRS Stowage Bag, see
  Transfer List)
  - ABRS AAA Inlet Debris Filter (one) P/N 1020-M1010-00 (filter stowed inside kit)

Required at Shuttle Middeck:
- Vented Payload Mounting Panel (VPMP) Cover (one) P/N (V733-334014-005)
  (stowed in Window Shade Bag)

TOOLS:
Required in shuttle middeck (MF28K):
- Ratchet Wrench, 1/4" Drive
- 1/4" Socket, 1/4" Drive
- 3/8" Socket, 1/4" Drive
- Gray Tape
- High Torque Locker Tool (MD23R - Volume H, taped to inboard wall)

Required at EXPRESS-2 Rack:
- High Torque Locker Tool
- Gray Tape

IVA Toolbox:
- 1/4" Socket, 1/4 " Drive
- (5-35 in-lbs) Trq Driver, 1/4 " Drive

1. EXPRESS RACK 2 LOCKER 2 PREP
LAB101_D1 1.1 Locker door latched, Red Dot not visible (Refer to Figure 1)
Figure 1.- Locker Latches.

1.2 Unfasten Locker fasteners (four) from EXPRESS-2 Rack (High Torque Locker Tool; 1/4” Socket, 1/4” Drive; Ratchet, 1/4” Drive).

1.3 Remove and transfer Locker to temporary stowage location in the JEM near EXPRESS Rack 4.

LAB1O1_A1 1.4 sw LOCKER-2 POWER → OFF

√ LOCKER-2 POWER Lt – Off

1.5 EXPRESS Rack Power Cable (38”) →|← LOCKER-2 POWER-J1

1.6 EXPRESS Rack Data Cable (38”) →|← LOCKER-2 DATA-J2

1.7 Tether cables out of way as required

1.8 √ Transfer path is clear between EXPRESS-2 Rack and middeck

2. REMOVE ABRs FROM MIDDECK

MF28G 2.1 Retrieve ABRs stowage bag and temp stow on front of Middeck lockers
MF28E 2.2 Unfasten ABRS fasteners (four) from Vented Payload Mounting Panel (VPMP) mounted in wire tray (High Torque Locker Tool, 1/4" Socket, 1/4" Drive, Ratchet, 1/4" Drive). Pull out ABRS to access Launch Safety Bolts.
2.3 Remove Launch Safety Bolts (six) three from each side, roll up in gray tape and place in trash (3/8" Socket, 1/4" Drive, Ratchet 1/4" Drive). Refer to Figure 4.
2.4 Temporarily stow all tools

<table>

2.8 DC Jumper (21') ←|→ POWER J1

2.9 Remove payload from middeck location.
3. INSTALL ABRS AAA INLET DEBRIS FILTER

ABRS 3.1 Inspect INLET and OUTLET ducts on rear of ABRS. If debris present, clean using gray tape. Refer to Figure 5.

3.2 Remove ABRS AAA Inlet Debris Filter from ABRS Stowage Bag
Remove backing from ABRS AAA Inlet Debris Filter. Apply ABRS AAA Inlet Debris Filter to INLET duct on the rear of ABRS. Refer to Figure 5.
Place backing in dry trash.

3.3 Remove gray tape with bolts from locker front and place in dry trash.

4. ABRS INSTALL

LAB1O1 4.1 Transfer ABRS and Stowage Bag to US Lab, EXPRESS-2 RACK. Shuttle crew proceed to Step 7, Middeck Closeout

7.4 Notify MCC-H ABRS installation complete and report Power Off, On times from steps 2.6 and 6.4.
ABRS SAFING
(ASSY OPS/ULF3/FIN 1) Page 1 of 3 pages

OBJECTIVE:
Place Advanced Biological Research System (ABRS) in a science safe mode if the front panel status LED is illuminated amber while ABRS is on shuttle.

TOOLS
PGSC

PARTS
ABRS Comm Cable P/N 1020-M-0003-00 (in ABRS Stowage Bag)

1. **PGSC CONNECTION**
   1.1 Remove PGSC from network by disconnecting the RJ-45 cable from back of PGSC

2. **PGSC RECONFIG FOR ABRS**
   2.1 Power up PGSC, if PGSC not already powered, and locate Shuttle Applications Icon
   2.2 Double click ‘Shuttle Apps’ > ‘ABRS’ > ‘ABRS RJ-45 Network Setup’ icon to run the ABRS Network Setup script
   2.3 Enter “1” in the dialog and click OK button, click OK button again on the next window when prompted
   ✓ Msg: ‘RJ-45 Port Configured for ABRS Ops’ appears on Desktop

3. **ABRS APPLICATION LOAD AND CONFIGURATION CHECK**
   3.1 Double click ‘Shuttle Apps’ > ‘ABRS’ > ‘ABRS’ icon to run the ABRS application
   ✓ Msg: ‘ABRS APPLICATION LOADING’
   ✓ Health & Status display appears

   3.2 Advanced Biological Research System (ABRS)
   Note which parameters have background field colors that are amber (see Figure 1)
If either 'Chamber 1(2) - Temperature Control' parameter background color is amber, proceed to step 3.3 and continue Safing experiment.

If neither 'Chamber 1(2) - Temperature Control' parameter is amber, note which other parameters are amber and report ✓ MCC-H.

### 3.3 Advanced Biological Research System (ABRS)

**cmd** Safe Experiment

**Confirm Safe Experiment**

'This will put the payload into a limited operations mode and deviate from Chamber 1 and Chamber 2 experiment protocols. Are you sure you want to continue?'

**cmd** Yes

### 3.4 Health and Status

'Chamber 1'

**cmd** Ack LED

'Chamber 2'
**ABRS SAFING**

**(ASSY OPS/ULF3/FIN 1)**

---

**cmd Ack LED**

</table>

**sel Exit**

✓Msg: "This will close the ABRS Laptop Software. Are you sure you want to exit?"

**sel Yes**

4. **PGSC RECONFIG TO NETWORK**

4.1 Disconnect ABRS Ethernet Cable from PGSC and return to ARBS Stowage Bag
   ABRS Comm Cable ←|→ DATA J2
   ABRS Comm Cable ←|→ PGSC Ethernet

4.2 Reconnect PGSC to Network by reconnecting RJ-45 cable

4.3 Double click ‘Shuttle Apps’ > ‘ABRS’ > ‘ABRS RJ-45 Network Setup’ icon to restore the nominal configuration

4.4 Enter "2" in the dialog and click OK button. Click the OK button again on the next window when prompted

✓Msg: 'RJ-45 Port Configured for ABRS Ops' disappears on Desktop

4.5 ✓**MCC-H** and report amber parameters noted from step 3.2
OBJECTIVE:
This procedure defines the steps needed for an operator to correctly set-up an Anthropometer Base and D2Xs Camera, correctly measure subject data, and then correctly take down and stow Anthropometer Base and D2Xs Camera for the Spinal Elongation investigation.

PARTS:
Spinal Elongation Kit

TOOLS:
12-24mm Lens
4GB EVA Flash Card (empty)
CF Card Adapter
D2Xs Camera
Multi-Use Arm (Shuttle)
SB-800 Flash
Shutter Release Cable (labeled Remote Cord Assembly)

1. UNSTOW HARDWARE
   1.1 If first session for Spinal Elongation,
       Unstow from ISS (consult stowage notes):
       Spinal Elongation Kit
       Retrieve from Shuttle Location:
       Multi-Use Arm

   If subsequent session for Spinal Elongation,
   Retrieve from tmpry stow location on Shuttle:
   Spinal Elongation Kit
   Multi-Use Arm

   1.2 Retrieve from Shuttle:
       12-24mm Lens
       CF Card Adapter
       D2Xs Camera
       SB-800 Flash

2. SETUP SPINAL ELONGATION HARDWARE ON CREW SEAT
   2.1 CDR SEAT PWR BUS SEL - AC 2 (up)

   2.2 Remove parachute from CDR seat (attached by velcro strap) and tmpry stow.

   2.3 Configure CDR seat back in entry configuration and move seat all the way forward.
2.4 Wrap shoulder harness around back of CDR seat and tie. Remove seat pan cushion and place on top of tied shoulder harness to line up with Velcro on back of seat. Refer to Figure 1.

2.5 Remove head rest from top of CDR seat and tmpry stow.

2.6 Unstow:

- Anthropometer Base
- Slider Post
- Head Bar

Place hardware in CDR seat for setup.

**WARNING**

Pinch point is possible between Anthropometer Base and top of seat during insertion of the Anthropometer Base.

2.6.1 Remove seat cover enough that Anthropometer Base will lay flat against the top of the seat.
2.6.2 To setup Anthropometer Base, hold Anthropometer Base by the anchor point, sliding the legs of the Anthropometer Base into the head rest holes on top of the seat. Refer to Figure 2.

2.6.3 ✓ Anthropometer leg with the hole is oriented closest to the headrest release knob.

2.6.4 ✓ Anthropometer Base label and lanyard face aft.

Figure 2. Anthropometer Base on CDR Seat.
2.6.5 Remove pin from Anthropometer Base.

2.6.6 Attach Slider Post onto anchor point of Anthropometer Base (ensure numbers face forward toward PLT seat).

2.6.7 Reinstall pin to secure Slider Post.

2.6.8 Insert Head Bar into slot on Slider Post (loosen adjustment screw if necessary to insert Head Bar). Refer to Figure 3.

Figure 3. Final Assembly of Anthropometer Base on CDR Seat.

3. LAP BELT SETUP

3.1 Lengthen lap belt straps and wrap lap belt straps around the joint between the seat and the seat back (black metal frame) by wrapping from the inside of the frame then around the joint (point A to point B in Figure 4).

3.1.1 Ensure that lap belt adjustment is accessible and possible. Refer to Figures 4 and 5.
4. **D2XS CAMERA SETUP AND CONFIGURE**

4.1 Install SB-800 Flash onto D2XS Camera (if not installed).
Install 12-24mm Lens onto D2XS Camera (if not installed).

4.2 Install Shutter Release Cable onto D2XS Camera (if not installed).
4.3 Check memory of 4GB EVA Flash Card in D2Xs Camera is empty.
If memory of 4GB EVA Flash Card in D2Xs Camera is not empty, 
   Remove 4GB EVA Flash Card from D2Xs Camera and tmpry 
   stow. 
   Retrieve 4GB EVA Flash Card with empty memory and install in 
   D2Xs Camera.

4.4 D2Xs Camera settings should be as follows:
   Lens - 12-24mm Lens, set at 15mm
   Lens Focus Mode – M/A
   Body Focus Mode - S
   ✓Batt installed
   ✓Flash Card installed
   Pwr - ON
   Top LCD:
   ✓Batt
   ✓Frames remaining sufficient
   Exp Comp - 0.0
   Exp Mode - A
   f/stop - 11
   Meter - Matrix
   Diopter - Adjust
   Frame Rate - S
   ✓BKT disabled – 0F
   Rear LCD:
   ✓ISO – 100
   ✓QUAL – RAW
   ✓WB – 0, A
   AF Area Mode - [ [] ]
   ✓Focus Area – Center
   ✓Focus Selector Lock – L
   SB-800 Flash Settings:
   ✓Diffuser Dome installed
   pb ON/OFF – ON
   ✓MODE – TTL BL
   ✓Exp Comp – 0 EV
   Tilt - Direct

   NOTE
   Multi-Use Arm may have to be adjusted to achieve the correct angle.

4.5 Position D2Xs Camera on Multi-Use Arm in a vertical orientation (SB-
   800 Flash towards forward) and install Multi-Use Arm to R6 camera 
   shoe (forward towards window as seen in Figure 6).

   Mount D2Xs Camera on Multi-Use Arm such that D2Xs Camera is 
   orthogonal to CDR seat. Refer to Figure 6.
4.6 Autofocus on CDR seat (specifically on the side of the seat with the circle as seen in Figure 7).

**NOTE**
Body Focus Mode - M will eliminate the possibility of the focus shifting to another subject.

4.7 After autofocusing on the seat, change Body Focus Mode - M.

**NOTE**
Ensure D2Xs Camera is parallel to R6 wall and not pitched forward or backward.

4.8 Take a test photograph. Entire profile of the CDR seat should appear in the picture. Refer to Figure 7 for an example.
5. SUBJECT POSITIONING

---

**CAUTION**

Do not take nominal Spinal Elongation measurements within one hour of compression exercise or countermeasures (Penguin Suit, EVA, weight exercises, ARED, IRED, etc.) as exercise would adversely affect the measurements being taken in this activity.

---

5.1 Before proceeding with this step,
subject should wear light-weight clothing.

5.2 Remove and tmpry stow Head Bar.

<table>
<thead>
<tr>
<th>CAUTION</th>
</tr>
</thead>
<tbody>
<tr>
<td>There must be sufficient clearance for the Slider Post from the ceiling. Be careful not to extend Slider Post to where it can come in contact with cabin ceiling.</td>
</tr>
</tbody>
</table>

5.3 Subject should sit in CDR seat and fasten lap belt and crotch strap ensuring a tight fit (ensure positive contact between buttocks and seat pan).

Ensure seat height is high enough that subject’s thighs are at a 90 degree angle (feet touching the floor).

5.4 Operator will ensure subject sits erect and gazes directly ahead (head lines up, not looking at an angle) at the HUD reference object. Operator should also ensure subject is centered between the left and right sides of the seat.

5.5 Retrieve Head Bar from tmpry stow and insert into slot on Slider Post, ensuring that numbers on the Head Bar and slot on the Slider Post are facing the D2Xs Camera. Refer to Figure 8.
Figure 8. Head Bar Connected to Slider Post.

5.6 Ensure Head Bar is in firm contact with the top of subject's head.

6. DATA COLLECTION

6.1 Record measurement on SPINAL ELONGATION LOG. Measurements should be taken as the number between the marks on the viewing window of the Slider Post.

6.2 Operator should take photograph of subject using D2Xs Camera.

6.3 Remove Head Bar and temporarily stow.

6.4 Subject should exit CDR seat and stretch. Subject should then return to seat.

6.5 Repeat step 5.3 through step 6.3 to complete the second measurement (for a total of two measurements per subject).

6.6 Repeat step 5.3 through step 6.5 for each additional subject (ensure new subjects wear light-weight clothing).

7. DISASSEMBLY
7.1 Remove D2Xs Camera from Multi-Use Arm.
Remove Multi-Use Arm with D2Xs Camera attached from R6 camera shoe.
Put away Multi-Use Arm to original location.

7.2 Remove 4GB EVA Flash Card from D2Xs Camera.
Retrieve CF Card Adapter.
Insert 4GB EVA Flash Card into CF Card Adapter.
Insert CF Card Adapter into any networked PGSC.
✓MCC-H (specify which PGSC file resides on)

7.3 Disassemble Spinal Elongation hardware from CDR seat.

7.3.1 Remove pin from Anthropometer Base and remove Slider Post from anchor point. Install pin back into Anthropometer Base.

7.3.2 Retrieve Head Bar from tmpry stow.

7.3.3 Remove Anthropometer Base from top of the seat. Restore seat cover to original placement on the top of the seat.

7.4 Reconfigure CDR seat to nominal configuration.

7.4.1 Retrieve head rest and seat pan cushion from tmpry stow.

7.4.2 Install head rest on top of CDR seat

7.4.3 Put seat pan cushion back in place. Untie and unwrap shoulder harness from back of CDR seat. Return lap belt to nominal configuration.

7.4.4 Retrieve parachute from tmpry stow and install on back of CDR seat.

7.4.5 CDR SEAT PWR BUS SEL - OFF (ctr)

8. CONCLUDING OPERATIONS

8.1 Remove SPINAL ELONGATION LOG from Payloads section of the Assembly Operations book, place in manilla envelope, and place envelope in FDF.

8.2 Stow:

Spinal Elongation Kit

Anthropometer Base
Slider Post
Head Bar

If Spinal Elongation Kit is being tmpry stowed on Shuttle for subsequent sessions,
Crew should inform ground of tmpry stow location.

8.3 When all sessions for this mission are concluded,
Spinal Elongation Kit must be restowed on ISS prior to undocking (consult Stowage Notes).

OBJECTIVE:
This procedure will be used to unlock the Glacier door, unpack the ascent items from the
unpowered Glacier, and activate the Glacier unit.

STS IFM Toolbox (MF28K):
- 3/16” Hex Head, 3/8” Drive
- 4” Extension, 1/4” Drive
- 1/4” to 3/8” Adapter (1/4” Drive)
- Ratchet, 1/4” Drive

PARTS:
- MELFI Desiccant Kit (contains 4 dessicant packs) (JPM1F6_B2)

ITEMS TO UNSTOW WITHIN PROCEDURE:
- APEX Cambium KFTs (17 qty) (unstow in Step 1)

1. UNLOCK GLACIER DOOR

MA16F/G
(GLACIER) 1.1 Unlock Glacier Door Captive Locks (two) (3/16” Hex Head, 3/8” Drive,
1/4” to 3/8” Adapter, 1/4” Drive, 4” Extension, 1/4” Drive, Ratchet,
1/4” Drive) (see Figure 1)
1.2 Open Glacier door and remove all Apex Cambium KFTs (qty 17) from trays A, B, and C and transfer per Transfer List.

1.3 Place loose Desiccant from each tray back into Glacier Tray A.

1.4 Retrieve and open MELFI Dessicant Kit and place Dessicant Packs (4) into Glacier Tray D. Discard Humidity Indicator Cards.

1.5 Replace each Glacier tray and close inner and outer doors.

2. GLACIER POWER UP

2.1 ✓ cb POWER Open (lt off)

2.2 ✓ sw BATTERY OFF (lt off)

2.3 ✓ SHUTTLE PAYLOAD DC PWR CABLE →|← POWER J1
GLACIER UNPACK AND POWER UP
(ASSY OPS/ULF3/FIN 1)

ML85E 2.4 ✓SHUTTLE PAYLOAD DC PWR CABLE →|--|← DC 20 AMP J11
ML86B:E 2.5 cb MNB MAR 1 → Close

**NOTE**
System initialization may take up to 3 minutes. Initialization complete once Line 1 of front panel display reads 'HOME'.

MF16F/G (GLACIER) 2.6 cb POWER → Close (lt on)
2.7 sw BATTERY → ON (lt on)
2.8 ✓Display 'HOME'

******************************************************************************
If 'HOME' not shown, Perform GLACIER FAIL TO REPOWER (SODF: ASSY OPS: PAYLOADS), then:
******************************************************************************
******************************************************************************
If Display - ‘**Error Pending**’ Perform GLACIER ERROR MESSAGE (SODF: ASSY OPS: PAYLOADS), then:
******************************************************************************

2.9 Record the following from the front panel:
CURR TEMP _______.______°C
GPS _______:_______:_______

✓Display Line 3 – IDLE MODE

2.10 Notify MCC-H GLACIER UNPACK AND POWERUP complete and data recorded in step 2.9.
OBJECTIVE:
This procedure will perform a manual reconfigure of the Glacier System setting it to Set Point mode using the front panel and display buttons.

1. Display (Line 1) – ‘HOME’
   ************************************************************************************
   * If display —’**Error Pending**’
   * Perform GLACIER ERROR MESSAGE, all (SODF: ASSY OPS: PAYLOADS), then:
   * If ’HOME’ not shown:
   * pb Right (EXIT) → Press until ’HOME’ appears
   ************************************************************************************

2. Open Glacier door and remove dessicant packs from trays A and D. Return trays and close inner and outer doors. Discard dessicant packs in trash.

3. TEMPERATURE CONTROL MODE
   3.1 pb Left (MENU) → Press (one time), following appears:
       ‘MAIN MENU’
       ‘QUICK STATUS 1/5’
   3.2 pb Left (NEXT) → Press (three times), following appears:
       ‘MAIN MENU’
       ‘SETUP 4/5’
   3.3 pb Center (SELECT) → Press (one time), following appears:
       ‘SETUP’
       ‘Temp Control 1/3’
   3.4 pb Center (SELECT) → Press (one time), following appears:
       ‘Temp Control’
       ‘Set Point Temp 1/18’
       ‘-095.0 °C’
   3.5 pb Left (NEXT) → Press (one time), following appears:
       ‘Temp Control’
       ‘Control Mode 2/18’
       ‘IDLE’
   3.6 pb Center (SELECT) → Press (one time), following appears:
       ‘Control Mode’

NOTE
1. There are 3 options for setting the Control Mode (IDLE, SET POINT, and MANUAL).
2. The left pushbutton (NEXT) changes the Mode, the center pushbutton (APPLY) selects the Mode, and the right pushbutton (CANCEL) returns to the previous Mode.
'IDLE'

3.7 pb Left (NEXT) → Press as required to select the SET POINT Control Mode

3.8 pb Center (APPLY) → Press (one time)

3.9 ✓ Confirm Temp Control
   'Old: IDLE'
   'New: SETPOINT'

3.10 pb Left (APPLY) → Press (one time), following appears:
   'Temp Control'
   'Control Mode 2/18'
   'SET POINT'

3.11 pb Right (EXIT) → Press until 'HOME' appears

4. AIR MANAGEMENT PROCEED MESSAGE

4.1 pb Left (MENU) → Press (one time), following appears:
   'MAIN MENU'
   'QUICK STATUS 1/5'

4.2 pb Left (NEXT) → Press (three times), following appears:
   'MAIN MENU'
   'SETUP 4/5'

4.3 pb Center (SELECT) → Press (one time), following appears:
   'SETUP'
   'Temp Control 1/3'

4.4 pb Center (SELECT) → Press (one time), following appears:
   'Temp Control'
   'Set Point Temp 1/18'
   '-095.0 °C'

4.5 pb Left (NEXT) → Press (three times), following appears:
   'Temp Control'
   'AirMgmt Proceed 4/18'

4.6 pb Center (SELECT) → Press (one time), following appears:
   'AirMgmt Proceed'
   'PROCEED'

4.7 pb Center (APPLY) → Press (one time)

4.8 ✓ Display line 3 – PROCEED

4.9 pb Right (EXIT) → Press until 'HOME' appears

4.10 Verify by listening – the coolers turn on

5. Record the following from the front panel:
   CURR TEMP __________ °C
SET POINT ______.______ °C
GPS ______:______:______

6. Notify **MCC-H** GLACIER SETPOINT complete and data recorded in step 5.
OBJECTIVE:
The following steps allow the recording of some Glacier data for diagnostic purposes.

*******************************************************************************
* If Display – ‘**Error Pending**’:
*  Perform GLACIER ERROR MESSAGE (SODF: ASSY OPS: PAYLOADS), then:
*******************************************************************************

1. Display – ‘HOME’

*******************************************************************************
* If ‘HOME’ not shown:
*  pb Right (EXIT) → push until ‘HOME’ appears
*******************************************************************************

2. Record from front panel ‘CURR TEMP’, ‘SET POINT’, and ‘GPS’ in TABLE 3 GLACIER DIAGNOSTIC LOG FILE (SODF: ASSY OPS: PAYLOADS).

3. pb Left (MENU) → push (one time), following appears:
   ‘MAIN MENU’
   ‘QUICK STATUS 1/5’

4. pb Center (SELECT) → push (one time), following appears:
   ‘QUICK STATUS’
   ‘Cold Head 1A 1/16’

   **NOTE**
   1. The center pushbutton (NEXT) moves to next status display.
   2. The left pushbutton (PREV) moves to previous status display.

5. Record Quick Status data in TABLE 3 GLACIER DIAGNOSTIC LOG FILE (SODF: ASSY OPS: PAYLOADS).

6. pb Center (NEXT) → push until Quick Status data items 1 through 7 have been recorded.

7. pb Right (EXIT) → push until ‘HOME’

8. Notify MCC-H to report log values from TABLE 3 GLACIER DIAGNOSTIC LOG FILE (SODF: ASSY OPS: PAYLOADS).
This Page Intentionally Blank
OBJECTIVE:
The following steps will perform a reboot of Glacier Systems.

1. ✓Display 'HOME'
   ****************************
   *
   *
   * If 'HOME' not shown:
   *
   *
   * pb Right (EXIT) → Press until 'HOME' appears
   *
   ****************************

2. Log from Glacier front panel:
   ** GPS: ______:______:______
   **
   ** CURR TEMP: _____.____°C
   **

3. pb Left (MENU) → Press (one time), following appears:

   'MAIN MENU'
   'QUICK STATUS 1/5'

4. pb Left (NEXT) → Press (four times), following appears:

   'MAIN MENU'
   'SHUTDOWN 5/5'

5. pb Center (SELECT) → Press (one time), following appears:

   'SHUTDOWN'
   'SHUTDOWN 1/2'

6. pb Left (NEXT) → Press (one time), following appears:

   'SHUTDOWN'
   'REBOOT 2/2'

7. pb Center (SELECT) → Press (one time), following appears:

   'Confirm Shutdown'
   'REBOOT'

8. pb Left (APPLY) → Press (one time), following appears:

   'Glacier'
   'System'
   'Shutting Down'
   'Please wait...'

9. Verify Display—

   'Glacier'
   'System'
   'Rebooting'
   'Please wait...'

06 NOV 09
NOTE
System initialization may take up to 3 minutes. Initialization is complete once Line 1 of front panel display reads 'HOME'.

10. ✓Display 'HOME'

* * *
* If 'HOME' not shown:
  * ✓MCC-H

* *
* If Display - **Error Pending**
  * Perform GLACIER ERROR MESSAGE (SODF: ASSY OPS: PAYLOADS), then:

* *

OBJECTIVE:
The following steps will perform a shutdown of Glacier Systems. Commanded shutdowns prevent loss of data and system errors and are the desired nominal method of shutdown.

**CAUTION**
Due to possible loss of experiment payload(s), Glacier should not be shutdown for more than 30 minutes, unless necessary for Orbiter contingency operations.

Glacier

1. ✓ Display 'HOME'

2. Log Glacier front panel:
   - GPS: _____ : ____ : _____
   - CURR TEMP: _____ : ____ °C

3. pb Left (MENU) → Press (one time), following appears:
   - 'MAIN MENU'
   - 'QUICK STATUS 1/5'

4. pb Left (NEXT) → Press (four times), following appears:
   - 'MAIN MENU'
   - 'SHUTDOWN 5/5'

5. pb Center (SELECT) → Press (one time), following appears:
   - 'SHUTDOWN'
   - 'SHUTDOWN 1/2'

6. pb Center (SELECT) → Press (one time), following appears:
   - 'Confirm Shutdown'
   - 'SHUTDOWN'

7. pb Left (APPLY) → Press (one time), following appears:

13 OCT 09
8. Verify—
   'Glacier'
   'System'
   'Shutting Down'
   'Please wait...'

8. Verify—
   'Glacier'
   'System'
   'Shutting Down Complete'
   'TURN POWER OFF'

   **NOTE**
   Power light can take up to 2 minutes to fully extinguish. OK to proceed
   without waiting.

9. Wait 5 seconds before proceeding.

10. sw BATTERY → OFF (lt off)

11. cb POWER → Open (lt off)

ML86B 12. cb MNB MAR 1 → Open

13. Notify **MCC-H** of recorded data and time in **step 2**.
OBJECTIVE:
This procedure checks the state of the Glacier and changes the system's power draw limit from ISS to Shuttle Configuration.

MA16F/G 1. GLACIER CHECK
   1.1 ✓ cb POWER – Close (lt on)
   1.2 ✓ sw BATTERY – ON (lt on)
   1.3 ✓ Display – 'HOME'
      * If Display - "**Error Pending**"
      * Perform GLACIER ERROR MESSAGE, all (SODF: ASSY
      * OPS: PAYLOADS), then:
      * If 'HOME' not shown:
      * pb Right (EXIT) → push until 'HOME' appears

NOTE
After door openings and/or power off events, CURR TEMP may be out of range ramping toward set point. CURR TEMP may be as warm as -70 °C.

1.4 ✓ Display – 'CURR TEMP' is ramping toward -95.0°C.
✓ Display – 'SET POINT' is -95.0 °C.

1.5 Log from Glacier front panel the start 'GPS' and 'CURR TEMP' in Table 1 Glacier Log.

2. MAX POWER RECONFIGURATION
   2.1 pb Left (MENU) → Press (one time), following appears:
      'MAIN MENU'
      'QUICK STATUS 1/5'

   2.2 pb Left (NEXT) → Press (three times), following appears:
      'MAIN MENU'
      'SETUP 4/5'

   2.3 pb Center (SELECT) → Press (one time), following appears:
      'SETUP'
      'Temp Control 1/3'

   2.4 pb Center (SELECT) → Press (one time), following appears:
      'Temp Control'
      'Set Point Temp 1/18'

   2.5 pb Left (NEXT) → Press (twelve times), following appears:
'Temp Control'
'Max Power Draw 13/18'
'220 W'

2.6 pb Center (SELECT) → Press (one time), following appears:
'Max Power Draw'
'XXX W'
'000 to 420'

NOTE
1. The left pushbutton (CURSOR) moves cursor between fields. The default cursor position will be blinking.
2. The center pushbutton (PLUS) increases selected digit field by 1.

2.7 Using the PLUS and CURSOR pushbuttons, enter Max Power Draw value of 160 W.

2.8 pb Right (DONE) → Press (one time)

2.9 ✓ Confirm New Max Power = 160

2.10 pb Left (APPLY) → Press (one time), following appears:
'Temp Control'
'Max Power Draw 13/18'
'160 W'

2.11 pb Right (EXIT) → Press until 'HOME' appears

3. Log from Glacier front panel the end ‘GPS’ and ‘CURR TEMP’ in Table 1 Glacier Log.

4. ✓ MCC-H with data recorded in Table 1 Glacier Log and any off-nominal conditions.

Table 1. Glacier Log.

‘MAIN MENU’
‘SHUTDOWN 5/5’

3.5 pb Center (SELECT) → Press (one time), following messages appear:
‘SHUTDOWN’
‘SHUTDOWN 1/2’

3.6 pb Center (SELECT) → Press (one time), following messages appear:
‘Confirm Shutdown’
‘SHUTDOWN’

3.7 pb Left (APPLY) → Press (one time), following messages appear:
‘Glacier’
‘System’
‘Shutting Down’
‘Please wait...’

3.8 ✓ Display shows the following messages
‘Glacier’
‘Shutdown Complete’
‘TURN POWER OFF’

3.9 Wait 5 seconds.
### NOTE

1. Power off should be no longer than 30 minutes in order to preserve optimum science.
2. Power down begins when Glacier POWER cb is open.
3. Power light can take up to 2 minutes to fully extinguish.
4. BATTERY sw is left on to power data logger during transfer.

#### 3.10 ✓ sw BATTERY ON

12. Notify MCC-H Glacier Transfer to Shuttle is complete. Report power-off time from step 3.2; power-on time from step 6.6; and CURR TEMP, SET POINT and GPS time from step 7.5.

13. GROUND UPDATES FOR IMS

Ground to update IMS for the following:
EXPRESS Rack Power Cable 24” P/N 683-44024-1 To: Stow
EXPRESS Rack Data Cable 24” P/N 683-44267-1 To: Stow
Glacier Water Return Line P/N CBSE-F10066-1 with Volume Compensator attached To: Stow
Glacier Water Supply Line P/N CBSE-F10065-1 with Volume Compensator attached To: Stow
Volume Compensators B/C GLCR 1000J, GLCR 1001J To: Stow
1. Contact MCC-H before proceeding.

2. Operator can always exit sub menus by pressing Right (EXIT) pb until ‘HOME’ display is reached.

3. ERROR HANDLING: display will identify Event on Line 2 and Status on Line 3. ‘ACTIVE/PENDING’ indicates that error is still occurring and should be acknowledged. ‘INACTIVE/PENDING’ indicates the Error is no longer occurring and can be Reset.

4. Menus are circular. If a display is passed, operator can keep pressing the button until desired display is reached.

5. GPS is only visible in HOME display. Record GMT from wristwatch.
GLACIER RECORD DIAGNOSTIC DATA procedure may be performed to capture states of key data elements per MCC-H direction.

Power cycle requires MCC-H approval. Note: Set Point temperature control mode will require initialization upon restart.

Software Errors may not reset or may be persistent due to:
- Frequent intermittent power failure.
- Single Event Upset.
- Electromagnetic interference.

Internal voltage takes approximately 2 min to dissipate. Power LED will remain dimly illuminated.

Are there more Acknowledged messages to process?

Is Error Status 'ACTIVE/PENDING'?

Is Error Status 'INACTIVE/PENDING'?
Software Errors may not reset or may be persistent due to: Frequent intermittent power failure. Single Event Upset. Electromagnetic interference.

Initialization takes approximately 3 minutes and is complete when LCD Line 1 reads ‘HOME’.

Contact MCC-H with Log Data recorded.

- MCC-H Perform GLACIER SHUTDOWN (SODF: ASSY OPS: PAYLOADS)
GLACIER FAIL TO HOLD SET POINT
( Assy Ops/ULF3/FIN) 

Page 1 of 9 pages

OBJECTIVE:
This procedure is required when the Glacier fails to hold set point. It performs a check of some critical parameters then directs the manual reconfiguration of some key controls as required.

Glacier 1. RECORD DATA

1.1 ✓ Display – 'HOME'

1.2 Record from front panel start 'CURR TEMP', 'SET POINT', 'GPS' in TABLE 3 GLACIER DIAGNOSTIC LOG FILE (SODF: Assy Ops: Payloads: GLACIER)

2. CHECK STATUS OF KEY PARAMETERS

2.1 pb Left (MENU) → push (one time), following appears: 'MAIN MENU' 'QUICK STATUS 1/5'

2.2 pb Center (SELECT) → push (one time), following appears: 'QUICK STATUS' 'Cold Head 1A 1/16'

NOTE
1. The center pushbutton (NEXT) moves to next status display.
2. The left pushbutton (PREV) moves to previous status display.

2.3 Record Cold Head 1A, Cold Head 1B, Cold Head 2A, Cold Head 2B, and CircFan Speed in TABLE 3 GLACIER DIAGNOSTIC LOG FILE (SODF: Assy Ops: Payloads: GLACIER)

2.4 pb Center (NEXT) → push until all data has been recorded.

2.5 pb Right (EXIT) → push until 'HOME'

2.6 ✓MCC-H to report log values from Table 3 and get direction.

2.7 Record any ground supplied data in TABLE 2 GLACIER RESET LOG FILE (SODF: Assy Ops: Payloads: GLACIER)
3. SET TEMPERATURE CONTROL MODE TO IDLE

3.1 pb Left (MENU) → push (one time), following appears:
   'MAIN MENU'
   'QUICK STATUS 1/5'

3.2 pb Left (NEXT) → push (three times), following appears:
   'MAIN MENU'
   'SETUP 4/5'

3.3 pb Center (SELECT) → push (one time), following appears:
   'SETUP'
   'Temp Control 1/3'

3.4 pb Center (SELECT) → push (one time), following appears:
   'Temp Control'
   'Set Point Temp 1/18'

3.5 pb Left (NEXT) → push (one time), following appears:
   'Temp Control'
   'Control Mode 2/18'

   **NOTE**
   1. There are 3 options for setting the Control Mode (IDLE, SET POINT and MANUAL).
   2. The left pushbutton (NEXT) changes the Mode, the center pushbutton (APPLY) selects the mode and the right pushbutton (CANCEL) returns to the previous mode.

3.6 pb Center (SELECT) → Press (one time), following appears:
   'Control Mode'
   'XXXX'

3.7 pb Left (NEXT) → press as required to select desired Temperature Control Mode to IDLE

3.8 pb Center (APPLY) → push (one time)

3.9 ✓ Confirm New Control Mode = IDLE

3.10 pb Left (APPLY) → Press (one time), following appears:
   'Temp Control'
   'Control Mode 2/18'

3.11 ✓ Control Mode = IDLE

3.12 pb Right (EXIT) → Press until 'HOME' appears

4. SET SETPOINT TEMP

4.1 pb Left (MENU) → push (one time) following appears:
   'MAIN MENU'
   'QUICK STATUS 1/5'
GLACIER FAIL TO HOLD SET POINT
(ASY OP/ULF3/FIN) Page 3 of 9 pages

4.2 pb Left (NEXT) → push (three times) following appears:
'MAIN MENU'
'SETUP 4/5'

4.3 pb Center (SELECT) → push (one time) following appears:
'SETUP'
'Temp Control 1/3'

4.4 pb Center (SELECT) → push (one time) following appears:
'Temp Control'
'Set Point Temp 1/18'

4.5 pb Center (SELECT) → push (one time) following appears:
'Set Point Temp'
'XXXX.X °C'
'-160.0 to +004.0'

NOTE
1. The left pushbutton (CURSOR) moves cursor between New Set Point Temp fields. The default cursor position will be blinking.
2. The center pushbutton (PLUS) increases New Set Point Temp selected digit field value by 1.

4.6 Enter desired Set Point temperature per MCC-H.

4.7 pb Right (DONE) → push (one time)

4.8 ✓Confirm New Set Point = desired Set Point

4.9 pb Left (APPLY) → Press (one time), following appears:
'Temp Control'
'Set Point Temp 1/18'

4.10 ✓Set Point Temp = desired Set Point

4.11 pb Right (EXIT) → push until 'HOME' appears

5. SET TEMP CONTROL SENSORS

5.1 pb Left (MENU) → push (one time) following appears:
'MAIN MENU'
'QUICK STATUS 1/5'

5.2 pb Left (NEXT) → push (three times) following appears:
'MAIN MENU'
'SETUP 4/5'

5.3 pb Center (SELECT) → push (one time) following appears:
'SETUP'
'Temp Control 1/3'

5.4 pb Center (SELECT) → push (one time) following appears:
'Temp Control'
'Set Point Temp 1/18'

5.5 pb Left (NEXT) → push (two times) following appears:
   'Temp Control'
   'Control Sensors 3/18'

5.6 pb Center (SELECT) → push (one time) following appears
   'Control Sensors'
   'INNER OUTLET INLET'

   NOTE
   1. The left pushbutton (CURSOR) moves cursor between Control Sensor fields. The default cursor position will be blinking.
   2. The center pushbutton (PLUS) changes the values of the Control Sensor fields from 0 to 1 or vice versa.

5.7 Enter desired combination of Temp Control Sensors per MCC-H.

5.8 pb Right (DONE) → push (one time)

5.9 ✓ Confirm New Control Sensors = desired Control Sensors

5.10 pb Left (APPLY) → Press (one time), following appears:
   'Temp Control'
   'Control Sensors 3/18'

5.11 ✓ Control Sensors = desired Control Sensors

5.12 pb Right (EXIT) → Press until 'HOME' appears

6. SET TEMPERATURE CONTROL BANDWIDTH

6.1 pb Left (MENU) → push (one time) following appears:
   'MAIN MENU'
   'QUICK STATUS 1/5'

6.2 pb Left (NEXT) → push (three times) following appears:
   'MAIN MENU'
   'SETUP 4/5'

6.3 pb Center (SELECT) → push (one time) following appears:
   'SETUP'
   'Temp Control 1/3'

6.4 pb Center (SELECT) → push (one time) following appears:
   'Temp Control'
   'Set Point Temp 1/18'

6.5 pb Left (NEXT) → push (four times) following appears:
   'Temp Control'
   'Bandwidth 5/18'
   'XX.X°C'

6.6 pb Center (SELECT) → push (one time) following appears:
'Bandwidth'
'XX.X°C'
'00.1 TO 25.5'

**NOTE**
1. The left pushbutton (CURSOR) moves cursor between Bandwidth fields. The default cursor position will be blinking.
2. The center pushbutton (PLUS) increases Temperature Control Bandwidth selected digit field value by 1.

6.7 Enter desired Temperature Control Bandwidth per **MCC-H**

6.8 pb Right (DONE) → push (one time)

6.9 ✓ Confirm New Bandwidth = desired Bandwidth

6.10 pb Left (APPLY) → Press (one time), following appears:

'Temp Control'
'Bandwidth 5/18'

6.11 ✓ Bandwidth = desired Bandwidth

6.12 pb Right (EXIT) → Press until 'HOME' appears

7. **SET PRIMARY COOLER**

7.1 pb Left (MENU) → push (one time) following appears:
'MAIN MENU'
'QUICK STATUS 1/5'

7.2 pb Left (NEXT) → push (three times) following appears:
'MAIN MENU'
'SETUP 4/5'

7.3 pb Center (SELECT) → push (one time) following appears:
'SETUP'
'Temp Control 1/3'

7.4 pb Center (SELECT) → push (one time) following appears:
'Temp Control'
'Set Point Temp 1/18'

7.5 pb Left (NEXT) → push (five times) following appears:
'Temp Control'
'Primary Cooler 6/18'
'COOLER X'

7.6 pb Center (SELECT) → push (one time) following appears:
'Primary Cooler'
'COOLER X'
NOTE
1. There are 2 options for Primary Cooler (COOLER 1 and COOLER 2).
2. The left pushbutton (NEXT) changes the Primary Cooler to either COOLER 1 or COOLER 2, the center pushbutton (APPLY) selects the presently displayed Primary Cooler and the right pushbutton (CANCEL) returns to the previous display.

7.7 pb Left (NEXT) → push as required to select desired Primary Cooler per MCC-H

7.8 pb Center (APPLY) → push (one time)

7.9 ✓ Confirm New Primary Cooler = desired Cooler

7.10 pb Left (APPLY) → Press (one time), following appears:
'Temp Control'
'Primary Cooler 6/18'

7.11 ✓ Primary Cooler = desired Cooler

7.12 pb Right (EXIT) → Press until 'HOME' appears

8. SET MAXIMUM POWER DRAW SETTING

8.1 pb Left (MENU) → push (one time) following appears:
'MAIN MENU'
'QUICK STATUS 1/5'

8.2 pb Left (NEXT) → push (three times) following appears:
'MAIN MENU'
'SETUP 4/5'

8.3 pb Center (SELECT) → push (one time) following appears:
'SETUP'
'Temp Control 1/3'

8.4 pb Center (SELECT) → push (one time) following appears:
'Temp Control'
'Set Point Temp 1/18'

8.5 pb Left (NEXT) → push (twelve times) following appears:
'Temp Control'
'Max Power Draw 13/18'
'XXX W'

8.6 pb Center (SELECT) → push (one time) following appears:
'Max Power Draw'
'XXX W'
'000 to 420'
NOTE

1. The left pushbutton (CURSOR) moves the cursor between Maximum Power Draw fields. The default cursor position will be blinking.
2. The center pushbutton (PLUS) increases the Maximum Power Draw selected digit field value by 1.

8.7 Enter desired Maximum Power Draw per **MCC-H**.
8.8 pb Right (DONE) → push (one time)
8.9 ✓ Confirm New Max Power = desired Max Power Draw
8.10 pb Left (APPLY) → Press (one time), following appears:
   'Temp Control'
   'Max Power Draw 13/18'
8.11 ✓ Max Power Draw = desired Max Power Draw
8.12 pb Right (EXIT) → push until 'HOME' appears

9. **SET OVER CURRENT**

9.1 pb Left (MENU) → push (one time) following appears:
   'MAIN MENU'
   'QUICK STATUS 1/5'
9.2 pb Left (NEXT) → push (three times) following appears:
   'MAIN MENU'
   'SETUP 4/5'
9.3 pb Center (SELECT) → push (one time) following appears:
   'SETUP'
   'Temp Control 1/3'
9.4 pb Center (SELECT) → push (one time) following appears:
   'Temp Control'
   'Set Point Temp 1/18'
9.5 pb Left (NEXT) → push (thirteen times) following appears:
   'Temp Control'
   'Over Current 14/18'
   'XX.X A'
9.6 pb Center (SELECT) → push (one time) following appears:
   'Over Current'
   'XX.X W'
   '00.0 to 30.0'
NOTE
1. The left pushbutton (CURSOR) moves the cursor between Over Current fields. The default cursor position will be blinking.
2. The center pushbutton (PLUS) increases the Maximum Power Draw selected digit field value by 1.

9.7 Enter desired Over Current Limit per MCC-H.

9.8 pb Right (DONE) → push (one time)

9.9 ✓ Confirm New Over Current = desired Over Current

9.10 pb Left (APPLY) → push (one time), following appears:
   'Temp Control'
   'Over Current 14/18'

9.11 ✓ Over Current = desired Over Current

9.12 pb Right (EXIT) → Press until 'HOME' appears

10. SET TEMPERATURE CONTROL MODE

10.1 pb Left (MENU) → push (one time) following appears:
   'MAIN MENU'
   'QUICK STATUS 1/5'

10.2 pb Left (NEXT) → push (three times) following appears:
   'MAIN MENU'
   'SETUP 4/5'

10.3 pb Center (SELECT) → push (one time) following appears:
   'SETUP'
   'Temp Control 1/3'

10.4 pb Center (SELECT) → push (one time) following appears:
   'Temp Control'
   'Set Point Temp 1/18'

10.5 pb Left (NEXT) → push (one time) following appears:
   'Temp Control'
   'Control Mode 2/18'

10.6 pb Center (SELECT) → push (one time), following appears:
   'Control Mode'
   'XXXX'

NOTE
1. There are 3 options for setting the Control Mode (IDLE, SET POINT and MANUAL).
2. The left pushbutton (NEXT) changes the Mode, the center pushbutton (APPLY) selects the mode and the right pushbutton (CANCEL) returns to the previous mode.
10.7 pb Left (NEXT) → push as required to selected desired Temperature Control Mode per MCC-H.

10.8 pb Center (APPLY) → push one time

10.9 ✓ Confirm New Control Mode = desired Control Mode

10.10 pb Left (APPLY) → push (one time), following appears:
   'Temp Control'
   'Control Mode 2/18'

10.11 ✓ Control Mode = desired Control Mode

10.12 pb Right (EXIT) → push until 'HOME' appears.

11. CHECK GLACIER STATUS

11.1 ✓ cb POWER – Close (lt on)

11.2 ✓ sw BATTERY – ON (lt on)

11.3 ✓ Display – 'HOME'

* If Display–’**Error Pending**’
   * Perform GLACIER ERROR MESSAGE (SODF: ASSY OPS: PAYLOADS: GLACIER), then:

* If 'HOME' not shown:
   * pb Right (EXIT) → push until 'HOME' appears

11.4 ✓ Display – 'CURR TEMP: XXXX.X °C' ±5.0°C or ramping toward expected temperature.

12. RECORD END DATA

12.1 Record from front panel end 'CURR TEMP', 'SETPOINT', 'GPS' in TABLE 3 GLACIER DIAGNOSTIC LOG FILE (SODF: ASSY OPS: PAYLOADS: GLACIER)

12.2 Notify MCC-H of logged values in TABLE 3 GLACIER DIAGNOSTIC LOG FILE (SODF: ASSY OPS: PAYLOADS: GLACIER)
Glacier initialization not successfully completed when power applied during Glacier POWER UP procedure.

Nominal Config:
(MA16F/G)
cb POWER → Close (lt on)
sw BATTERY → ON (lt on)
(ML86B:E)
cb MNB MAR 1 → Close

Switch to Alternate Power Source

   'Temp Control'
   'Primary Cooler 6/18'

8.6 pb Center (SELECT) → Press (one time), following appears:
   'Primary Cooler'
   'COOLER X'

13 OCT 09
NOTE

1. There are 2 options for Primary Cooler (COOLER 1 and COOLER 2).
2. The left pushbutton (NEXT) changes the Primary Cooler, the center pushbutton (APPLY) selects the Primary Cooler, and the right pushbutton (CANCEL) returns to the previous display.

8.7 pb Left (NEXT) → Press as required to select desired Primary Cooler per MCC-H

8.8 pb Center (APPLY) → Press (one time)

8.9 ✓Confirm New Primary Cooler = desired Cooler

8.10 pb Left (APPLY) → Press (one time), following appears:
   'Temp Control'
   'Primary Cooler 6/18'

8.11 ✓Primary Cooler = desired Cooler

8.12 pb Right (EXIT) → Press until 'HOME' appears

9. COOLER 1 STROKE

9.1 pb Left (MENU) → Press (one time), following appears:
   'MAIN MENU'
   'QUICK STATUS 1/5'

9.2 pb Left (NEXT) → Press (three times), following appears:
   'MAIN MENU'
   'SETUP 4/5'

9.3 pb Center (SELECT) → Press (one time), following appears:
   'SETUP'
   'Temp Control 1/3'

9.4 pb Center (SELECT) → Press (one time), following appears:
   'Temp Control'
   'Set Point Temp 1/18'

9.5 pb Left (NEXT) → Press (six times), following appears:
   'Temp Control'
   'Cooler 1 Stroke 7/18'

9.6 pb Center (SELECT) → Press (one time), following appears:
   'Cooler 1 Stroke'
   'XX'
   '03 to 63'
NOTE
1. The left pushbutton (CURSOR) moves cursor between Stroke fields. The
default cursor position will be blinking.
2. The center pushbutton (PLUS) increases Cooler Stroke selected digit
field by 1.

9.7 Enter desired Cooler 1 Stroke value per MCC-H
9.8 pb Right (DONE) → Press (one time)
9.9 ✓ Confirm New Cooler 1 Stroke = desired Cooler 1 Stroke
9.10 pb Left (APPLY) → Press (one time), following appears:
   'Temp Control'
   'Cooler 1 Stroke 7/18'
9.11 ✓ Cooler 1 Stroke = desired Cooler 1 Stroke
9.12 pb Right (EXIT) → Press until 'HOME' appears

10. COOLER 1 STATE
10.1 pb Left (MENU) → Press (one time), following appears:
   'MAIN MENU'
   'QUICK STATUS 1/5'

   'SETUP'
   'Temp Control 1/3'
10.4 pb Center (SELECT) → Press (one time), following appears:
   'Temp Control'
   'Set Point Temp 1/18'
10.5 pb Left (NEXT) → Press (seven times), following appears:
   'Temp Control'
   'Cooler 1 State 8/18'
10.6 pb Center (SELECT) → Press (one time), following appears:
   'Cooler 1 State'
   'XX'

NOTE
1. There are 2 options for Cooler 1 State (ON and OFF).
2. The left pushbutton (NEXT) changes the Cooler 1 State, the center
pushbutton (APPLY) selects the State, and the right pushbutton
(CANCEL) returns to the previous display.
10.7  pb Left (NEXT) → Press as required to select desired Cooler 1 State per MCC-H

10.8  pb Center (APPLY) → Press (one time)

10.9  ✓Confirm New Cooler 1 State = desired State

10.10 pb Left (APPLY) → Press (one time), following appears:
   'Temp Control'
   'Cooler 1 State 8/18'

10.11 ✓Cooler 1 State = desired Cooler 1 State

10.12 pb Right (EXIT) → Press until 'HOME' appears

11.  COOLER 2 STROKE

11.1  pb Left (MENU) → Press (one time), following appears:
   'MAIN MENU'
   'QUICK STATUS 1/5'

11.2  pb Left (NEXT) → Press (three times), following appears:
   'MAIN MENU'
   'SETUP 4/5'

11.3  pb Center (SELECT) → Press (one time), following appears:
   'SETUP'
   'Temp Control 1/3'

11.4  pb Center (SELECT) → Press (one time), following appears:
   'Temp Control'
   'Set Point Temp 1/18'

11.5  pb Left (NEXT) → Press (eight times), following appears:
   'Temp Control'
   'Cooler 2 Stroke 9/18'

11.6  pb Center (SELECT) → Press (one time), following appears:
   'Cooler 2 Stroke'
   'XX'
   '03 to 63'

   NOTE

1. The left pushbutton (CURSOR) moves cursor between Stroke fields. The default cursor position will be blinking.

2. The center pushbutton (PLUS) increases Cooler Stroke selected digit field by 1.

11.7  Enter desired Cooler 2 Stroke value per MCC-H

11.8  pb Right (DONE) → Press (one time)

11.9  ✓Confirm New Cooler 2 Stroke = desired Cooler 2 Stroke
11.10 pb Left (APPLY) → Press (one time), following appears:
   'Temp Control'
   'Cooler 2 Stroke 9/18'

11.11 ✓ Cooler 2 Stroke = desired Cooler 2 Stroke

11.12 pb Right (EXIT) → Press until 'HOME' appears

12. COOLER 2 STATE

12.1 pb Left (MENU) → Press (one time), following appears:
   'MAIN MENU'
   'QUICK STATUS 1/5'

   'Glacier'
   'System'
   'Shutting Down'
   'Please wait...'

9. Verify –
   'Glacier'
   'Shutdown Complete'
   'TURN POWER OFF'

10. Wait 5 seconds.
NOTE
Power light can take up to 2 minutes to fully extinguish. Once main power has been removed, the battery light will start to flash.

9. ✓BATTERY – ON (lt on)
10. cb POWER → Open (lt off)
11. Wait 1 minute. (No need to wait for POWER light to extinguish)
12. cb POWER → Close (lt on)

NOTE
System Initialization may take up to 3 minutes. Initialization complete once Line 1 of front panel display reads 'HOME'.

13. ✓Display 'HOME'

* * *  
* If 'HOME' not shown,
  * Perform GLACIER FAIL TO REPOWER (SODF: ASSY OPS: PAYLOADS), then:
*  
* * *  
* If Display ——*Error Pending*—
  * Perform GLACIER ERROR MESSAGE (SODF: ASSY OPS: PAYLOADS), then:
*  
* * *  

14. Log from Glacier front panel:

  CURR TEMP: _______ .____ °C

  GPS: ______/_____ :____

OBJECTIVE:
The following steps allow the recording of some Glacier data for diagnostic purposes.

1. RECORDING DATA
   1.1 ✓MCC-H for parameters to record in TABLE 3 GLACIER DIAGNOSTIC LOG FILE (SODF: ASSY OPS: PAYLOADS).

   Glacier
   1.2 ✓DISPLAY – 'HOME'

2. RECORDING CRYOGENIC STATUS
   2.1 Record from front panel 'CURR TEMP', 'SET POINT', and 'GPS' in TABLE 3 GLACIER DIAGNOSTIC LOG FILE (SODF: ASSY OPS: PAYLOADS).

   2.2 pb Left (MENU) → push (one time), following appears:
       'MAIN MENU'
       'QUICK STATUS 1/5'

   2.3 pb Left (NEXT) → push (one time), following appears:
       'MAIN MENU'
       'STATUS 2/5'

   2.4 pb Center (SELECT) → push (one time), following appears:
       'STATUS'
       'Cryogenic 1/3'

   2.5 pb Center (SELECT) → push (one time), following appears:
       'Cryogenic'
       'Cooler 1 Stroke 1/21'
       'XX'
NOTE
1. The center pushbutton (NEXT) moves to next status display.
2. The left pushbutton (PREV) moves to previous status display.

2.6 Record Cryogenic data per **MCC-H** direction in **TABLE 3 GLACIER DIAGNOSTIC LOG FILE** (SODF: ASSY OPS: PAYLOADS).

2.7 pb Center (NEXT) → press until all Cryogenic Status data has been recorded per **MCC-H** direction

2.8 pb Right (EXIT) → push until 'HOME'

2.9 Notify **MCC-H** to report log values from **TABLE 3 GLACIER DIAGNOSTIC LOG FILE** (SODF: ASSY OPS: PAYLOADS).
OBJECTIVE:
The following steps allow the recording of some Glacier data for diagnostic purposes.

*******************************************************************************
* * If Display – ‘**Error Pending**’:
* Perform GLACIER ERROR MESSAGE (SODF: ASSY OPS: PAYLOADS), then:
*******************************************************************************

1. RECORDING DATA

1.1 ✓MCC-H for parameters to record in TABLE 3 GLACIER DIAGNOSTIC LOG FILE (SODF: ASSY OPS: PAYLOADS).

2. RECORDING QUICK STATUS

2.1 Record from front panel ‘CURR TEMP’, ‘SET POINT’, and ‘GPS’ in TABLE 3 GLACIER DIAGNOSTIC LOG FILE (SODF: ASSY OPS: PAYLOADS).

2.2 pb Left (MENU) → push (one time), following appears:

‘MAIN MENU’
‘QUICK STATUS 1/5’

2.3 pb Center (SELECT) → push (one time), following appears:

‘QUICK STATUS’
‘Cold Head 1A 1/16’

NOTE
1. The center pushbutton (NEXT) moves to next status display.
2. The left pushbutton (PREV) moves to previous status display.

2.4 Record Quick Status data per MCC-H direction in TABLE 3 GLACIER DIAGNOSTIC LOG FILE (SODF: ASSY OPS: PAYLOADS).

2.5 pb Center (NEXT) → push until all Quick Status data has been recorded per MCC-H direction.
2.6 pb Right (EXIT) → push until 'HOME'

2.7 Notify MCC-H to report log values from TABLE 3 GLACIER DIAGNOSTIC LOG FILE (SODF: ASSY OPS: PAYLOADS).
OBJECTIVE:
The following steps allow the recording of some Glacier data for diagnostic purposes.

1. RECORDING DATA
   1.1 ✓MCC-H for parameters to record in TABLE 3 GLACIER DIAGNOSTIC LOG FILE (SODF: ASSY OPS: PAYLOADS).

   1.2 ✓DISPLAY – ‘HOME’

   2. RECORDING RESOURCES STATUS
   2.1 Record from front panel ‘CURR TEMP’, ‘SET POINT’, and ‘GPS’ in TABLE 3 GLACIER DIAGNOSTIC LOG FILE (SODF: ASSY OPS: PAYLOADS).

   2.2 pb Left (MENU) → push (one time), following appears:

       'MAIN MENU'
       'QUICK STATUS 1/5'

   2.3 pb Left (NEXT) → push (one time), following appears:

       'MAIN MENU'
       'STATUS 2/5'

   2.4 pb Center (SELECT) → push (one time), following appears:

       'STATUS'
       'Cryogenic 1/3'

   2.5 pb Left (NEXT) → push (one time), following appears:

       'STATUS'
       'Resources 2/3'

   2.6 pb Center (SELECT) → push (one time), following appears:

       'Resources'
'AAA Outlet 1/8'
'XX.X° C'

NOTE
1. The center pushbutton (NEXT) moves to next status display.
2. The left pushbutton (PREV) moves to previous status display.

2.7 Record Resource data per MCC-H direction in TABLE 3 GLACIER DIAGNOSTIC LOG FILE (SODF: ASSY OPS: PAYLOADS).

2.8 pb Center (NEXT) → push until all Resource data has been recorded per MCC-H direction.

2.9 pb Right (EXIT) → push until 'HOME'

2.10 Notify MCC-H to report log values from TABLE 3 GLACIER DIAGNOSTIC LOG FILE (SODF: ASSY OPS: PAYLOADS).
OBJECTIVE:
The following steps allow the recording of some Glacier data for diagnostic purposes.

1. RECORDING DATA

   1.1 ✓MCC-H for parameters to record in TABLE 3 GLACIER DIAGNOSTIC LOG FILE (SODF: ASSY OPS: PAYLOADS).

   1.2 ✓DISPLAY – 'HOME'

2. RECORDING SYSTEM STATUS

   2.1 Record from front panel 'CURR TEMP', 'SET POINT', and 'GPS' in TABLE 3 GLACIER DIAGNOSTIC LOG FILE (SODF: ASSY OPS: PAYLOADS).

   2.2 pb Left (MENU) → push (one time), following appears:

      'MAIN MENU'

      'QUICK STATUS 1/5'

   2.3 pb Left (NEXT) → push (one time), following appears:

      'MAIN MENU'

      'STATUS 2/5'

   2.4 pb Center (SELECT) → push (one time), following appears:

      'STATUS'

      'Cryogenic 1/3'

   2.5 pb Left (NEXT) → push (two times), following appears:

      'STATUS'

      'System 3/3'
2.6 pb Center (SELECT) → push (one time), following appears:

'System'

'CPU 1/9'

'XX.X° C'

**NOTE**

1. The center pushbutton (NEXT) moves to next status display.
2. The left pushbutton (PREV) moves to previous status display.

2.7 Record System Status data per MCC-H direction in TABLE 3 GLACIER DIAGNOSTIC LOG FILE (SODF: ASSY OPS: PAYLOADS).

2.8 pb Center (NEXT) → push until all System Status data has been recorded per MCC-H direction.

2.9 pb Right (EXIT) → push until 'HOME'

2.10 Notify MCC-H to report log values from TABLE 3 GLACIER DIAGNOSTIC LOG FILE (SODF: ASSY OPS: PAYLOADS).

Is airflow detectable?
Possible high cabin temperature.
Airflow system failure.
Clean air Inlet and Outlet with Gray Tape.
Wait 1 hour.
Is Temperature = Set Temp ± 2°C
Air Inlet / Outlet was clogged.
Notify MCC-H with CGBA status.
OBJECTIVE:
This procedure removes an ISS Locker from the Shuttle middeck in prep for MDS transfer. The locker is transferred to the EXPRESS-4 Rack and stowed. Then MDS is powered down, removed from EXPRESS-4 Rack, transferred inside the Double Payload Container to Shuttle where it is installed in the middeck, cabled and powered back on. The Mice Drawer System (MDS) Installation Brackets, vent closeout and tape are removed from the back wall of the EXPRESS Rack. Finally, two ISS lockers (one from the ABRS transfer and one from middeck) are retrieved and installed where MDS was removed.

TOOLS:
Any EXPRESS Rack Utility Drawer:
  High Torque Locker Tool
Shuttle Middeck:
  High Torque Locker Tool (MD23R - Volume H, taped to inboard wall)
ISS IVA Toolbox:
Drawer 2:
  Ratchet, 1/4" Drive
  1/4" Socket, 1/4" Drive
  (40-200 in-lbs) Trq Wrench, 1/4" Drive
  (5-35 in-lbs) Trq Wrench, 1/4" Drive
IFM Tool Locker:
  Ratchet, 1/4" Drive
  1/4" Socket, 1/4" Drive
  (40-200 in-lbs) Trq Wrench, 1/4" Drive

PARTS:
8.5" Handrail Assembly (two), (if not attached) P/N SEG33117290-301

1. REMOVING LOCKER FROM MIDDECK
MF28G

1.1 Locker door latched, Red Dot not visible, (see Figure 1)

1.2 Unfasten Locker fasteners (four) from Adapter Plate (High Torque Locker Tool; 1/4" Socket, 1/4" Drive; Ratchet, 1/4" Drive). Remove locker and temporary stow in middeck.

Figure 1.- Locker Latches.
1.3 Unfasten Adapter Plate fasteners (four) from Vented Payload Mounting Panel (VPMP) (High Torque Locker Tool; 1/4" Socket, 1/4" Drive; Ratchet, 1/4" Drive). Temporary stow Adapter Plate in with ISS Locker previously removed.

MF28E 1.4 Unfasten VPMP Cover fasteners (four) (1/4" Socket), remove and temp stow.

![MDS descent configuration](image)

Figure 2.- MDS Descent Configuration.

1.5 Remove Air Inlet Plenum Cap by loosening knurled screws (three) (using 5/32" allen driver if needed) from the MF28G location and reinstall the cap (finger tight) in the MF28E location.

1.6 Retrieve ISS Locker from middeck temporary stowage and transfer to EXPRESS-4 Rack in the JEM. Check transfer path is clear for return with MDS.

JPM1F5 1.7 Temporary stow ISS Locker near EXPRESS-4 Rack. Shuttle Crew proceed to Step 5 Middeck Installation.
2. MDS PREP FOR TRANSFER
JPM1F5_G1 (J1) (MDS)

2.1 Retrieve 8.5": Handrail Assembly (two) if not already attached.

2.2 While upper and lower MDS Double Payload Container doors are closed, mount 8.5" Handrail Assembly (two) to the seat track located on the front panel of the MDS facility as shown in Figure 3.

![Handrails](image)

5.8 Record MET: _____/_____:_____  

5.9 Using a diagonal pattern, partially fasten captive fasteners (four) on
    MDS Double Payload Container to VPMP (High Torque Locker
    Tool; 1/4" Socket, 1/4" Drive; Ratchet, 1/4" Drive).

5.10 Fully torque fasteners (four) to 75 in-lbs using 40-200 in-lbs Trq
     Wrench, 1/4" Drive.

5.11 Remove 8.5" Handrail assembly (two) from the MDS front panel and
     stow.

6. EXPRESS RACK 4 LOCKER INSTALL

JPM1F5_G1 (J1) 6.1 Remove upper and lower MDS Installation Brackets from EXPRESS-4
                 Rack (High Torque Locker Tool; 1/4" Socket, 1/4" Drive; Ratchet,
                 1/4" Drive) and temporarily stow.

               6.2 Remove gray tape (two places) from back plate of rack and dispose
                   of in trash

               6.3 Remove Vent Closeout Panel (four) from back of rack and
                   temporarily stow.

               6.4 Retrieve ISS Locker from temporary stow location (Step 1)

JPM1F5_G1 6.5 Slide MF28E locker into EXPRESS-4 Rack Locker 3 location.
            Tighten, torque fasteners (four) on each locker to 30 in-lbs [High
            Torque Locker Tool; 1/4" Socket, 1/4" Drive; (5-35 in-lbs) Trq
            Driver, 1/4" Drive] in a diagonal pattern.
6.6 Retrieve Locker from temporary stow location near EXPRESS 4 Rack (previously stowed during ABRS transfer)

6.7 Slide MF28G locker into EXPRESS-4 Rack Locker 4 location. Tighten, torque fasteners (four) on each locker to 30 in-lbs [High Torque Locker Tool; 1/4" Socket, 1/4" Drive; (5-35 in-lbs) Trq Driver, 1/4" Drive] in a diagonal pattern.

6.8 Retrieve temporarily stowed Data Cable (in Step 2.5), Water Lines (in Step 3.5) and Power cable (in Step 4.5) and MDS Installation Brackets (in Step 6.1) and Vent Closeout Panel (four) (in Step 6.3) and stow per Stowage notes.

6.9 Notify MCC-H MDS Transfer to Shuttle is complete.

Report MET times from steps 4.2 and 5.8

7. **GROUND TO UPDATE IMS FOR THE FOLLOWING (GROUND-ONLY):**
   - 8.5" Handrail Assembly (two) (if attached) P/N GF11F5200-3 To: Stow
   - MDS Y Data Cable P/N 750980195-01C To: Stow
   - EXPRESS Rack P/L TCS Supply Line (60") P/N 683-46094-8 To: Stow
   - EXPRESS Rack P/L TCS Return Line (60") P/N 683-46094-9 To: Stow
   - EXPRESS Rack Power Cable 38" P/N 683-44024-2 To: Stow
   - MDS Installation Brackets (two) P/N 750600510-01D To: Stow
   - Vent Closeout Panel (four) P/N 683-46111-1 To: Stow
OBJECTIVE:
Check the status of the Mice Drawer System (MDS) and visually monitor mice well-being.

TOOLS:
8.5'' Handrail Assembly (two) P/N SEG33117290

MF28E/G

1. ✓ sw OPERATING MODE – SURVIVAL
   * If OPERATING MODE not in SURVIVAL mode,
   * Turn power off on payload before correcting switch position:
   * cb POWER cb → OPEN
   * Verify MDS POWER LED – Off
   * sw OPERATING MODE → SURVIVAL
   * cb POWER cb → CLOSE
   * Verify MDS POWER LED – On

2. ✓ sw MAINTENANCE – NOMINAL

3. ✓ cb POWER cb – CLOSE
   Verify MDS POWER LED – On
   Verify PRIMARY POWER LED – On

4. Verify SYSTEM FAILURE LED – OFF
   * If SYSTEM FAILURE LED — On or Blinking, (yellow),
   * Power Cycle:
   * cb POWER cb → OPEN
   * Verify MDS POWER LED – Off
   * cb POWER cb → CLOSE
   * Verify MDS POWER LED – On
   * ✓ MCC-H if SYSTEM FAILURE LED still on or blinking.

5. ✓ FOOD BAR STATUS LEDs (six) – Off

WARNING
A high temperature has occurred if all 6 FOOD BAR STATUS LEDs are blinking.
If all 6 FOOD BAR STATUS LEDs are blinking, indicating a high temperature:
- Turn MDS off:
  - cb POWER cb → OPEN
- Verify MDS POWER LED – Off
- Remove power at the MUP (ML85E):
  - DC 10 AMP MNB S4 – OFF
  - cb DC 10 AMP MNB CB4 → op
  - ✓MCC-H

6. Destow 8.5” Handrail Assembly (two).

7. Open the upper and lower Double Payload Container doors as shown in Figure 1.

8. Mount 8.5” Handrail Assembly (two) to the seat track located on the front panel of the MDS facility as shown in Figure 2.
NOTE
Power Harness remains connected to the MDS front panel.

9. Extend the MDS facility from the Double Payload Container as far as allowed by the restraining tethers (approximately 33 cm).

10. Visually check mice through lexan windows on the cage doors.

   - Yes: Select B/U DECOM Config (If Required)
   - No: Continue nominal operations.

12. DECOM still indicating fail (?)?
   - Yes: OIU to PDI I/F failure or OIU failure.
   - No: Continue nominal operations.

15. Select B/U DECOM Config (If Required)
   - For all PDI configuration, perform LOAD PDI DECOM FORMAT, all ( FDF: ORB OPS, COMM/INST), then:
   - B/U DECOM indicating fail (?)?
     - Yes: Continue nominal operations.
     - No: PDI DECOM failure.

17. OIU to PDI I/F failure or OIU failure.
   - Yes: Continue nominal operations.
   - No: PDI DECOM failure.

Nominal Config:
(A1L)
PL DATA INTLVR
PWR – ON
(R1)
PL CAB – MNA(MNB)
PL AUX – ON
(SSP1)
OIU PWR – OIU 1(2)
ON tb-UP(DN)

TCS and SSV not addressed in MAL;
FDA not nominally enabled.
Alternate (OIU 1) requires PSP 1.

For ground commanding of PL COMM system, SPEC 62 must not be loaded.

MCC-H can perform all PL COMM reconfig, except OIU PWR cycle and swap steps.

---

18 Load ALT PDI and PCMMU Configuration

- For all PDI configuration, complete LOAD PDI DECOM FORMAT (FDF: ORB OPS, COMM/INST), then:
- For all TFL, perform LOAD PCMMU FORMAT, all (FDF: ORB OPS, COMM/INST), then:

19 Zero Out Original DECOM Source

- SM 62 PCMMU/PL COMM
  - sel DECOM – ITEM 9 +X EXEC
  - sel INPUT – ITEM 12 +0 EXEC
  - LOAD – ITEM 13 EXEC
- Notify MCC-H.
- Continue nominal operations.

20 Reconfigure to Nominal PDI DECOM FORMATS (If Required)

- Perform LOAD PDI DECOM FORMAT (FDF: ORB OPS, COMM/INST), then:

21 Cycle OIU 1(2) Power

(SSP1)
- OIU PWR – ctr (tb-bp)
- OIU PWR – OIU 1(2) ON (tb-UP(DN))

- Perform LOAD OIU FMT/CONFIG, all (FDF: ORB OPS, COMM/INST), then:

PDI DECOM lock?

Yes → 22 OIU power transient.
- Continue nominal operations.

No → 24 Switch to OIU 2(1)

(SSP1)
- OIU PWR – OIU 2(1) ON (tb-DN(UP))

AOS with MCC-H?

Yes → 25 Prepare for Ground Commanding
  - SPEC 62 not loaded
  - MCC-H for further actions

No → 26
Configure for OIU 2(1)

- S-BD PL CNTL - CMD
- S-BD PL PSP OUTPUT - PL UMB
- S-BD PL PWR SYS - 2(1)
- S-BD PL SEL - PSP
- S-BD PL CNTL - PNL_CMD

Expect 'S62 BCE BYP PSP 1(2)' message

SM 62 PCMMU/PL COMM
- I/O RESET PSP 2(1) - ITEM 7(6) EXEC (*)

Config PDI for OIU 2(1)
- sel DECOM - ITEM 9 +X EXEC
- sel INPUT - ITEM 12 +2(1) EXEC
- LOAD - ITEM 13 EXEC

Perform LOAD OIU FMT/CONFIG, all (FDF: ORB OPS, COMM/INST), then:

PDI DECOM lock?

- Yes
  - OIU 1(2) to PDI interface failed.
  - MCC-H for possible PDI replacement
  - Continue nominal operations.

- No
  - PDI failure.
This Page Intentionally Blank

   APCU 1(2) CONV – OFF
   √ tb APCU 1(2) CONV – bp
   √ tb APCU 1(2) OUTPUT RLY – bp

2. **OPENING APCU OUTPUT RELAY**

   APCU 1(2) OUTPUT RLY – OP
APCU 2 provides power to LCS when OBSS is on the RMS.

MCC will determine between a transducer shift and a real single converter failure.

Total output for each APCU must be maintained less than 14.7 amps and each CONV output must be maintained less than 8.5 amps.
Loss of APCU 2 results in loss of orbiter 120 V power to LCS/IDC.

MCC will determine between a transducer shift and a real circuitry failure.
APCU TRIP
(ASSY OPS/ULF3/FIN 2) Page 1 of 4 pages

1. Determine which condition applies:
   - APCU TEMP ▲▼, block 2 (SODF: ASSY OPS: MALFUNCTION: APCU MALFUNCTION)
   - APCU VOLTS ▲▼, block 2 (SODF: ASSY OPS: MALFUNCTION: APCU MALFUNCTION)
   - APCU AMPS ▲, block 2 (SODF: ASSY OPS: MALFUNCTION: APCU MALFUNCTION)

2. MCC will determine cause of interruption of power or signal to the APCUs.

2. MCC will coordinate recovery of the PRI PL bus and equipment.

If APCU TRIP > -4.4

√APCU TRIP STATUS TABLE

Nominal Config:

**NOTE**

OV: Output Overvoltage  
OUV: Output Undervoltage  
OC: Output Overcurrent  
IUV: Input Undervoltage  

Tolerance for all reported voltages is ± 0.20 V
SPEC voltage for APCU is 122 to 126.5 volts. If APCU volts are outside this range but stable and usable, consideration will be given to continuing APCU operation.

Nominal Config:
R1
PRI PL MNC – ON (tb-ON)
PL CAB – MNA(MNB)
PL AUX – ON
L12 (SSP 1)
cb SW PWR 1 – cl

Nominal APCU Activated Config:
L12 (SSP 1)
APCU 1,2 CONV (two) – ON (tb-gray)
APCU 1,2 OUTPUT RLY (two) – CL (tb-gray)
There is a single point failure that will cause both the HIGH and LOW RES VOLTS to read low (broken wire).

**APCU VOLTS ↑↓ (ASSY OPS/ULF3/FIN 1)**

1. **APCU 1(2) CONV amps + CONV B amps < 14.7 and Single CONV amps < 8.5 and not OSL?**
   - Yes: **Telemetry failure.**
     - Continue nominal operations.
   - No: **Affected APCU Switches to OFF**
     - APCU 1(2) CONV - OFF (L12/SSP 1)
     - APCU 1(2) OUTPUT RLY - OP (tb-bp)

2. **APCU 1 Converter OFF**
   - APCU 1 CONV - OFF (L12/SSP 1)
   - APCU 1 CONV volts, amps
   - APCU 1 OUT VOLTS (two) - OSL?
     - Yes: **APCU overload.**
       - APCU 1 Converter OFF
       - APCU 1 CONV - OFF (L12/SSP 1)
       - APCU 1 CONV volts, amps
       - APCU 1 OUT VOLTS (two) - OSL?
     - No: **Transient failure.**
       - Continue nominal operations.

3. **APCU 1 Converter OFF**
   - APCU 1 Converter OFF
   - APCU 1 CONV - OFF (L12/SSP 1)
   - APCU 1 CONV volts, amps
   - APCU 1 OUT VOLTS (two) - OSL?
     - Yes: **APCU overload.**
       - APCU 1 Converter OFF
       - APCU 1 CONV - OFF (L12/SSP 1)
       - APCU 1 CONV volts, amps
       - APCU 1 OUT VOLTS (two) - OSL?
     - No: **Transient failure.**
       - Continue nominal operations.
Loss of APCU 2 results in loss of 120 V orbiter power to LCS/IDC.

1. Are both APCU converters on?
   - Yes
     - APCU 1(2) CONV – OFF (tb-bp)
     - APCU 1(2) CONV volts STATUS
     - APCU 1(2) OUT VOLTS (two) > 121 and < 127?
       - Yes
         - Continue nominal operations.
       - No
         - Continue nominal operations.
   - No
     - APCU 1(2) CONV – OFF (tb-bp)

*NOTE: Procedure does not call out PL/DPS RECONFIG, Secure
**NOTE: Procedure does not call out PL/DPS RECONFIG, Recovery

**ACTION A**

If ‘I/O ERROR PL1’ message:
- Loss of ground and orbiter MCDS command interface to ISS via PSP 1/OIU 1
- For additional impacts, refer to ORBITER MDM LOSS IMPACTS (SODF: ASSY OPS: MALFUNCTION: CRITICAL EQUIPMENT LOSS)

If failure at IOP XMTR/RCVR at SM GPC:
- If PL2 interface with SM GPC failed:
  - **MCC** for SM GPC reassignment
  - PF1 interface can be recovered by port moding PL 1/2 buses

If ‘I/O ERROR PL2’ message:
- Loss of ground and orbiter MCDS command interface to ISS via PSP 2/OIU 2
- For additional impacts, refer to ORBITER MDM LOSS IMPACTS (SODF: ASSY OPS: MALFUNCTION: CRITICAL EQUIPMENT LOSS)

If failure at IOP XMTR/RCVR at SM GPC:
- If PL1 interface with SM GPC failed:
  - **MCC** for SM GPC reassignment
  - PF2 interface can be recovered by port moding PL 1/2 buses
PL/DPS RECONFIGURATION  
(ASSY OPS/ULF3/FIN 1)  

ACTION B  
If SM GPC affected:  
- Note PL/ISS commanding via SM GPC (ground and orbiter MCDS) not possible until SM machine is restored and PL 1(2) MDM I/F is restored  
If GNC GPC affected:  
- Ground commanding not possible until GNC machine is restored  

ACTION C  
If PSP I/O reset not previously performed  
- SM 62 PCMMU/PL COMM  
  \[ I/O\text{ } \text{RESET}\text{ }PSP\text{ }1(2)\text{ }-\text{ }ITEM\text{ }6(7)\text{ }\text{EXEC} \]  
  
  Notify MCC when complete  

ACTION D  
Reload PDI DECOM FORMAT (FDF: ORB OPS FS, COMM/INST)  
As required, reenable PDI DECOM FDA  
Resume SPEC 62  

ACTION E  
Reload PCMMU TFLs, load PCMMU FORMAT (FDF: ORB OPS, COMM/INST)

OBJECTIVE:  
This display monitors health and status of the two APCUs and is available in SM OPS 2. The APCUs are used to power OBSS heaters. The display is generic and has been used on several missions. Figure 1 is a view of this display.

REMARKS

[1] OUT VOLTS LOW displays the measurements from the low-resolution voltage sensor. OUT VOLTS HIGH displays the measurements from the high-resolution voltage sensor.

[2] APCU TRIP indicates the status of the APCU shutdown logic. This status can be interpreted using Table 2.

NOTES

OV: Output Overvoltage
OUV: Output Undervoltage
OC: Output Overcurrent
IUV: Input Undervoltage

Tolerance for all reported voltages is 0.20 V.

[3] The parameter status field for all parameters will be blank for normal operation or will display an “M” for missing data. For analog parameters, this field will also display an “H” or “L” for offscale data. Some parameters displayed will be limit-sensed for SM alerts or C&W alarms. For discretes that are limit-sensed, the undesirable state is defined in the FDA low limit field and the FDA high limit field is left blank. Satisfaction of the undesirable state triggers a “↓” indication. For analogs that are limit-sensed, an “↑” or a “↓” will be displayed when the parameter exceeds either an upper or lower limit. The symbols driven in the parameter status field have the following display priority from highest to lowest: “M”, “H”, “L”, “↑”, “↓”. All symbols driven in the parameter status column will be displayed four times the normal intensity.
This Page Intentionally Blank
OBJECTIVE:
The following steps will perform a status check on the Commercial Generic Bioprocessing Apparatus (CGBA) and verify Advanced Biological Research System (ABRS) LED Status on the front panel.

MF28E 1. **ABRS STATUS CHECK**
   1.1 √ Status lt – green
   1.2 √MCC-H of status

2. **CGBA STATUS CHECK**

   **NOTE**
   1. MENU Option will time out after 30 seconds and return to status display.
   2. Keypad goes into sleep mode if not pressed within 10 minutes. Pressing any key when display is in sleep mode will reactivate keypad to receive input.

MF71E 2.1 √LED-MAIN POWER – On (green)

   ******************************************************
   * If no LED
   * Perform **CGBA INCORRECT (NO) DISPLAY**, all (SODF:
   * ASSY OPS: PAYLOADS: CGBA: MALFUNCTION), then:
   ******************************************************

   2.2 √CGBA fan running and airflow at AIR OUTLET
   2.3 Clean Air Inlet Screen with Gray Tape, as required.
   2.4 pb ENTER → Press (to disable screen saver)
   2.5 √CGBA display indicates the following:

   ******************************************************
   * If data incorrect or no display
   * Perform **CGBA INCORRECT (NO) DISPLAY**, all (SODF:
   * ASSY OPS: PAYLOADS: CGBA: MALFUNCTION), then:
   ******************************************************

   2.6 √Temp = Set Temp ± 2° C
2.7 Time is incrementing

2.8 Record MET and Temp in Table 1 (CGBA Log).

2.9 Notify MCC-H of data recorded in Table 1 and any off-nominal conditions.

GLACIER STATUS CHECK

OBJECTIVE:
The following steps will perform a status check on the Glacier.

1. GLACIER STATUS CHECK

   MA16F/G
   (Glacier)

   1.1 √cb POWER – Close (lt on)
   1.2 √sw BATTERY – ON (lt on)
   1.3 √Display – ‘HOME’

   ************************************************************
   * If Display – ‘**Error Pending**’
   * Perform GLACIER ERROR MESSAGE, all (SODF: ASSY
     * OPS: PAYLOADS: GLACIER: MALFUNCTION), then:
   *
   * If ‘HOME’ not shown
   * pb Right (EXIT) → Press until ‘HOME’ appears
   *******************************************************

   NOTE
   After door openings, CURR TEMP may be out of range ramping
   toward set point.

   1.4 If ascent Glacier
   √Display – ‘CURR TEMP:’ is +4.0° C ± 5.0° C

   If descent Glacier
   √Display – ‘CURR TEMP:’ is -95.0° C ± 5.0° C

   1.5 Record from Glacier front panel ‘GPS’, ‘CURR TEMP’ in Table 1
      (Glacier Log).

   1.6 Notify MCC-H of data recorded in Table 1 and any off-nominal
      conditions.

SPINAL ELONGATION STANDING HEIGHT LOG

1) Velcro cue card to the farthest right column of the middeck lockers ensuring that the top of the page lines up with the top of the middeck locker.
2) Subject holds self with his/her back against the middeck lockers and holds self down.
3) Operator helps to ensure feet are flush with the ground.
4) Operator marks height of subject using a cue card as a flat edge on paper with a pen and labels with Subject ID and date.
5) Repeat steps 2-4 for each subject.
6) After all subjects have been completed, remove Spinal Elongation Height Log from middeck lockers and place in the Spinal Procedure manila envelope for return.
