LETTER OF TRANSMITTAL.

DEPARTMENT OF COMMERCE,
BUREAU OF NAVIGATION,

Washington, July 1, 1924.

Sir: In compliance with the provisions of the act of Congress approved July 5, 1894, directing the Commissioner of Navigation to "annually prepare and publish a list of vessels of the United States belonging to the commercial marine, specifying the official number, signal letters, name, rig, tonnage, home port, and place and date of building of every vessel, distinguishing sailing vessels from such as are propelled by steam or other motive power," the fifty-sixth annual list of such vessels has been submitted, it being the forty-first annual list prepared by the Bureau of Navigation, and bringing the record of the merchant vessels of the United States down to June 30, 1924.

This volume constitutes Part VI, and is designed specially for the use of signal stations and masters of seagoing vessels. It contains the names of vessels having distinguishing signal letters, classed as follows:

Seagoing merchant vessels of the United States.

Yachts.

Seagoing merchant vessels, arranged according to names of owners.

Vessels belonging to the Navy, the Quartermaster Corps, the Engineer Corps, the Coast Guard, the Lighthouse Service, the Coast and Geodetic Survey, the Bureau of Fisheries, and the Bureau of Navigation.

Information relating to merchant vessels is arranged as follows:

1. Official number of the vessel.
2. Signal letters.
3. Rig (*with decks and masts*).
4. Name.
5. Tonnage (*gross and net*).
6. Register dimensions (*length, breadth, and depth*).
7. Year of building.
8. Place of building.
9. Home port (*where permanent document issues*).
10. Name of the managing owner.

Signal letters are assigned to seagoing vessels of the United States, and upon application, made through a collector of customs, they will be granted to yachts, and, in particular cases, to other vessels, if necessary. Such letters afford the means of recognition by signals at sea.

Respectfully,

D. B. CARSON,
Commissioner.

To Hon. HERBERT HOOVER,
Secretary of Commerce.

SEMAPHORES.

There are many semaphores established on the French, Italian, Portuguese, and some on the Spanish and Austrian coasts, where only the International Code of Signals is now used. Where practicable these semaphores have means of communicating by telegraph with

each other and with the chief metropolitan lines and foreign stations.

Passing ships are able to exchange communication with the semaphores, and when required their messages are forwarded to their destination according to the fixed tariff. On the coasts of Great Britain there are signal stations which offer the same facilities to passing vessels.

DISTRESS SIGNALS.

(SEE ARTICLE 31 OF INTERNATIONAL RULES.)

When a vessel is in distress and requires assistance from other vessels or from the shore the following shall be the signals to be used or displayed by her, either together or separately, namely:

In the daytime—

- (1) A gun or other explosive signal fired at intervals of about a minute.
- (2) The International Code signal of distress indicated by NC.
- (3) The distant signal, consisting of a square flag, having either above or below it a ball or anything resembling a ball.

RULES FOR MANEUVERING A VESSEL IN THE PRESENCE OF CYCLONIC STORMS

[Pilot Chart, Hydrographic Office, U. S. Navy.]

NORTHERN HEMISPHERE.

Right or dangerous semicircle.—Steamers: Bring the wind on the starboard bow, make as much way as possible, and if obliged to heave to, do so head to sea. Sailing vessels: Keep close hauled on the starboard tack, make as much way as possible, and if obliged to heave to, do so on the starboard tack.

Left or navigable semicircle.—Steam and sailing vessels: Bring the wind on the starboard quarter, note the course and hold it. If obliged to heave to, steamers may do so stern to sea; sailing vessels on the port tack.

On the storm track, in front of center.—Steam and sailing vessels: Bring the wind two points on the starboard quarter, note the course and hold it, and run for the left semicircle, and when in that semicircle maneuver as above.

On the storm track, in rear of center.—Avoid the center by the best practicable route, having due regard to the tendency of cyclones to recurve to the northward and eastward.

SOUTHERN HEMISPHERE.

Left or dangerous semicircle.—Steamers: Bring the wind on the port bow, make as much way as possible, and if obliged to heave to, do so head to sea. Sailing vessels: Keep close hauled on the port tack, make as much way as possible, and if obliged to heave to, do so on the port tack.

Right or navigable semicircle.—Steam and sailing vessels: Bring the wind on the port quarter, note the course and hold it. If obliged to heave to, steamers may do so stern to sea; sailing vessels on the starboard tack.

On the storm track, in front of center.—Steam and sailing vessels: Bring the wind two points on the port quarter, note the course and hold it, and run for the right semicircle, and when in that semicircle maneuver as above.

On the storm track, in rear of center.—Avoid the center by the best practicable route, having due regard to the tendency of cyclones to recurve to the southward and eastward.

The above rules depend, of course, upon having sea room. In case land interferes, a vessel should heave to, as recommended for the semicircle in which she finds herself.

COAST GUARD SIGNALS.

The following signals, recommended by the International Marine Conference for adoption by all institutions for saving life from wrecked vessels, have been adopted by the United States Coast Guard.

1. Upon the discovery of a wreck by night, the station crew will burn a red pyrotechnic light or a red rocket to signify, "You are seen; assistance will be given as soon as possible."

2. A red flag waved on shore by day, or a red light, red rocket, or red Roman candle displayed by night, will signify, "Haul away."

3. A white flag waved on shore by day, or a white light slowly swung back and forth, or a white rocket or white Roman candle fired by night, will signify, "Slack away."

4. Two flags, a white and a red, waved at the same time on shore by day, or two lights, a white and a red, slowly swung at the same time, or a blue pyrotechnic light burned by night, will signify, "Do not attempt to land in your own boats; it is impossible."

5. A man on shore beckoning by day, or two torches burning near together by night, will signify, "This is the best place to land."

NOTE.—It is desirable, to prevent confusion, that the pennants used should be at least twice as long as the burgees and square flags.

To open communication by the Code, show the ensign with the following pennant under it, thus:

When hoisted under the ensign, the Code Pennant denotes a signal taken from the International Code. When hoisted by itself at the masthead, or where it can best be seen, it is the Answering Pennant.

Communication may then be commenced, and any message following in this paper, or found under the heading "Danger or Distress" in the International Code Signal Book, may be exchanged, strictly following the INTERNATIONAL COMMERCIAL CODE and the instructions given below.

The above signal, asking to open communication, should be shown in every case of distress by the shore station, for it may be that the vessel has the INTERNATIONAL CODE, but, until seeing this signal, will not know she can use it.
