

that an attempt is making to deepen the water on that shoal called the "Wrecks," which, if successful, will contribute much to the easy and safe navigation of that river.

To the ninth interrogatory, I answer: That the best positions for a navy yard in this harbor are at Cock Spur Island, Four Mile Point, and at Fort Jackson.

To the tenth interrogatory, I answer: That the channel opposite to those positions runs close to the present shore.

To the eleventh interrogatory, I answer: That tolerably good water can be obtained at either of those positions, and in any quantity.

To the twelfth interrogatory, I answer: That as to the health of those positions I can only say that there is amongst the inhabitants a diversity of opinion on that subject. They were healthy whilst I was there. The soil, I think, is good.

To the thirteenth interrogatory, I answer: That I had no opportunity to ascertain, from personal observation, anything conclusive with regard to the destructiveness of the worm.

To the fourteenth interrogatory, I answer: That I do not know of anything to prevent wharfing to the channel. The average summit level of the rise of the tide in Savannah is estimated at six feet.

I believe, sir, that you will find in the foregoing report all the information that is necessary to enable you to form a correct opinion of the "practical facilities" of the harbor of Savannah for "naval purposes."
