

IV. JOINT AIRCRAFT MEASURES

8. *Arrival and departure procedure, aircraft.*—During joint exercises, alert periods, and combat, and at such other times as the Commanding General Hawaiian Department and the Naval Base Defense Officer (Commandant, Fourteenth Naval District) may agree upon, all Army and Navy aircraft approaching Oahu or leaving airfields or air bases thereon will conform to the Arrival and Departure Procedure prescribed in Inclosure A. This procedure will not be modified except when a departure therefrom is essential due to combat (real or simulated during exercises) or due to an emergency.

9. *Balloon barrages.*—Reports from abroad indicate the successful development and use of balloon barrages by European belligerents both British and German. Although detailed information is not available, the possibilities of balloon barrages in the Oahu area are recognized. Further investigation and study is necessary both locally and by the War and Navy Departments in order to determine the practicability of this phase of local defense.

10. *Marine Corps anti-aircraft artillery.*—When made available by the Naval Base Defense Officer, (Commandant, 11th Naval District), Marine Corps units manning anti-aircraft artillery present on Oahu will be placed under the tactical control of the Commanding General, Hawaiian Separate Coast Artillery Brigade.

11. *Aircraft Warning Service.*—The Army will expedite the installation and placing in operation of an Aircraft Warning Service. During the period prior to the completion of the AWS installation, the Navy, through use of RADAR and other appropriate means, will endeavor to give such warning of hostile attacks as may be practicable.

[5]

V. MUNITIONS, JOINT USE OF

12. Army and Navy Officers charged with the storage and issue of ammunition and bombs will exchange information concerning the types, quantities, and locations of these munitions which are suitable for use by the other service. Studies will be instituted and plans prepared for the prompt transfer of ammunition from one service to the other. No such transfer of munitions will be made without specific authority granted by the commander concerned for each transfer.

VI. SMOKE SCREENS

13. Smoke screens will not be employed for screening the Pearl Harbor-Hickam Field area from air attacks.

VII. HARBOR CONTROL POST

14. A joint harbor control post, as described in Inclosure B, will be established without delay. This system will be actively manned during joint exercises, alert periods, and combat and for such other periods as may be agreed upon by the Commanding General Hawaiian Department and the Naval Base Defense Officer (Commandant, 14th Naval District).

Approved: 2 April 1941.

(Signed) C. C. Bloch

C. C. BLOCH,

Rear Admiral, U. S. Navy,
Commandant,
Fourteenth Naval District.

(Signed) Walter C. Short
