

2002

800 Collections

3 million ftp+www/day

1 terabyte of data

1 large server
4 radio stations

2006 (early)

1500+ Collections

12+ million ftp+www/day

8 terabytes of data (full!)

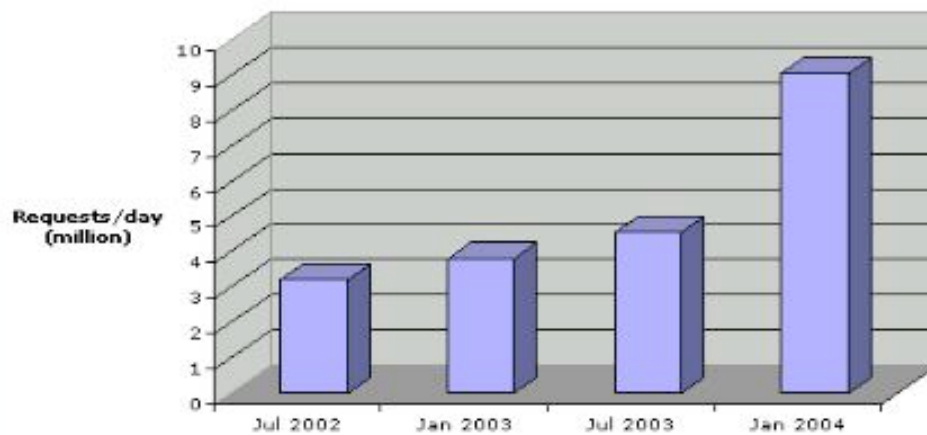

22 www/vhost, 4 database servers
7 radio stations

Selected Projects

Osprey: Osprey is a peer-to-peer enabled content distribution system. A metadata management system for software and document collections enables local and distributed searching of materials. Items are available for download directly via URL or indirectly via the peer-to-peer network BitTorrent. For software, the result is a FreshMeat-like application that adds a direct link to BitTorrent for distributed downloading.
