Linux VAR HOWTO

Martin Michlmayr, tbm@cyrius.com, http://www.cyrius.com/tbm v1.03, 11 April 1997

This document contains a listing of service companies which do not manufacture hardware or create packaged software, but add value to existing products. It is maintained by Martin Michlmayr <tbm@cyrius.com>.

Contents

1 About this document

This is the Linux VAR HOWTO. It contains a listing of service companies which do not manufacture hardware or create packaged software, but add value to existing products. This added value can take many forms, such as installation of Linux on computer hardware, configuration, or custom applications. It is maintained by Martin Michlmayr <tbm@cyrius.com>.

If you need to know more about the Linux Documentation Project or about Linux HOWTO's, feel free to contact the supervisor Greg Hankins <gregh@sunsite.unc.edu>.

Greg Hankins will post the listing to several national and international newsgroups on a monthly basis. In addition, the Linux VAR HOWTO can be found on the World Wide Web at http://www.cyrius.com/tbm/VAR-HOWTO. New versions of the Linux VAR HOWTO are always placed at this site first, so please be sure to check if the copy you are reading is still up to date!
