

Shree Ram Sharnam App – User Manual

1. Audio Player

We now have a full-fledged inbuilt audio player now. All the controls you need, right in one place.

2. Viewing the audio queue

Shuffle all audio

Repeat current audio or play all songs

1. Tap on a audio name to play it.

The selected audio is in grey coloured background.

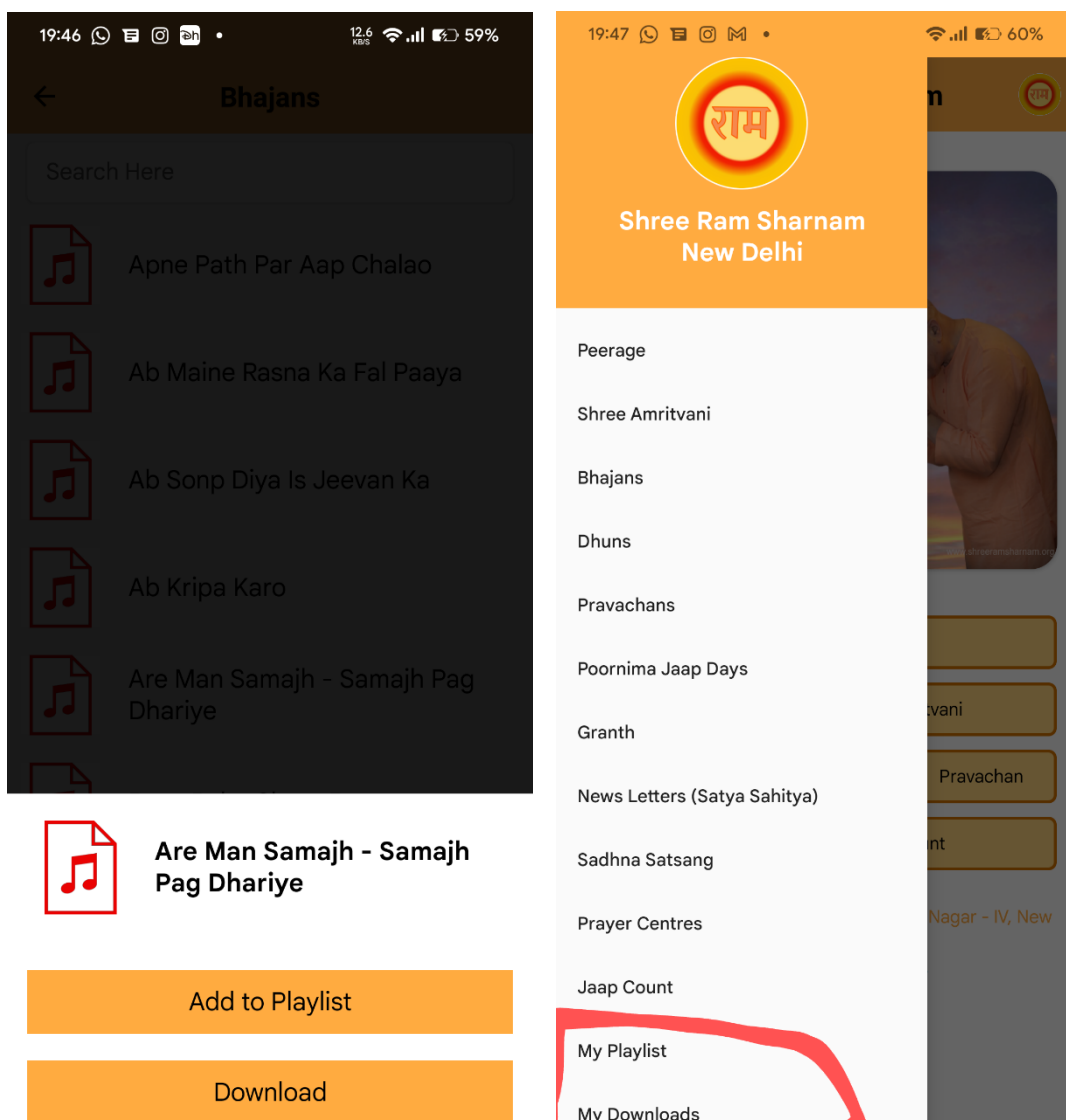

2. Press and hold a audio to reorder the queue

3. Background audio playback

You can safely go to home screen or another app without your favourite audio (bhajan, dhun audio pravachan, granth or amritvani) being interrupted. Also, you can control the playback from either the notification or the play/pause and previous/next buttons of your earphones/smart watches.

4. Playlist and Download

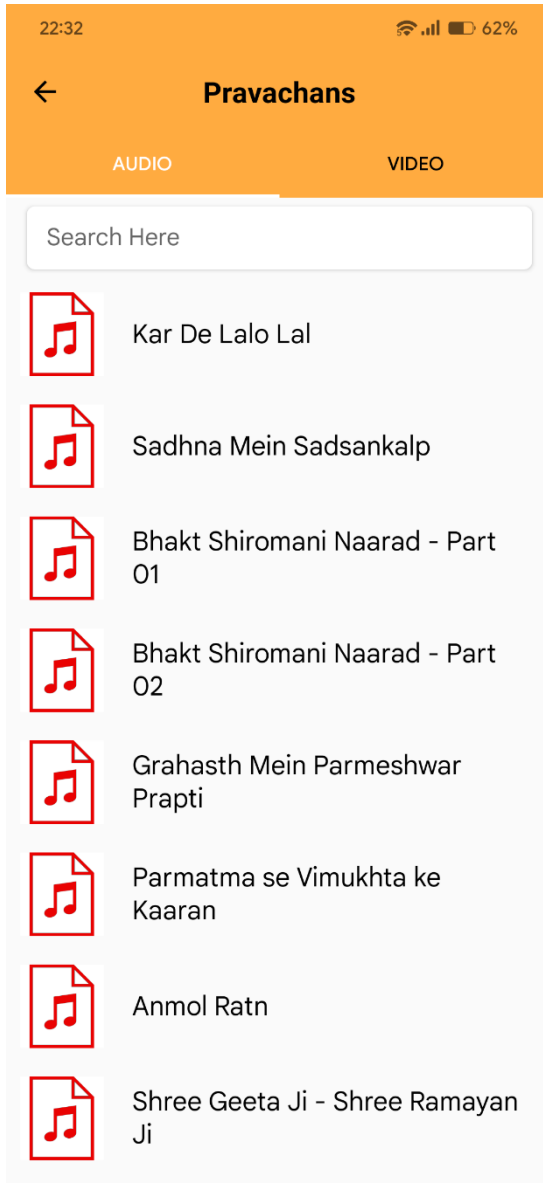

You can long press a song/video in any section to either add to playlist or download. You can download a book or newsletter by long pressing the item. Download status can be tracked in the notification panel of your smartphone.

Playlist and downloads can be accessed from the side menu on the main screen.

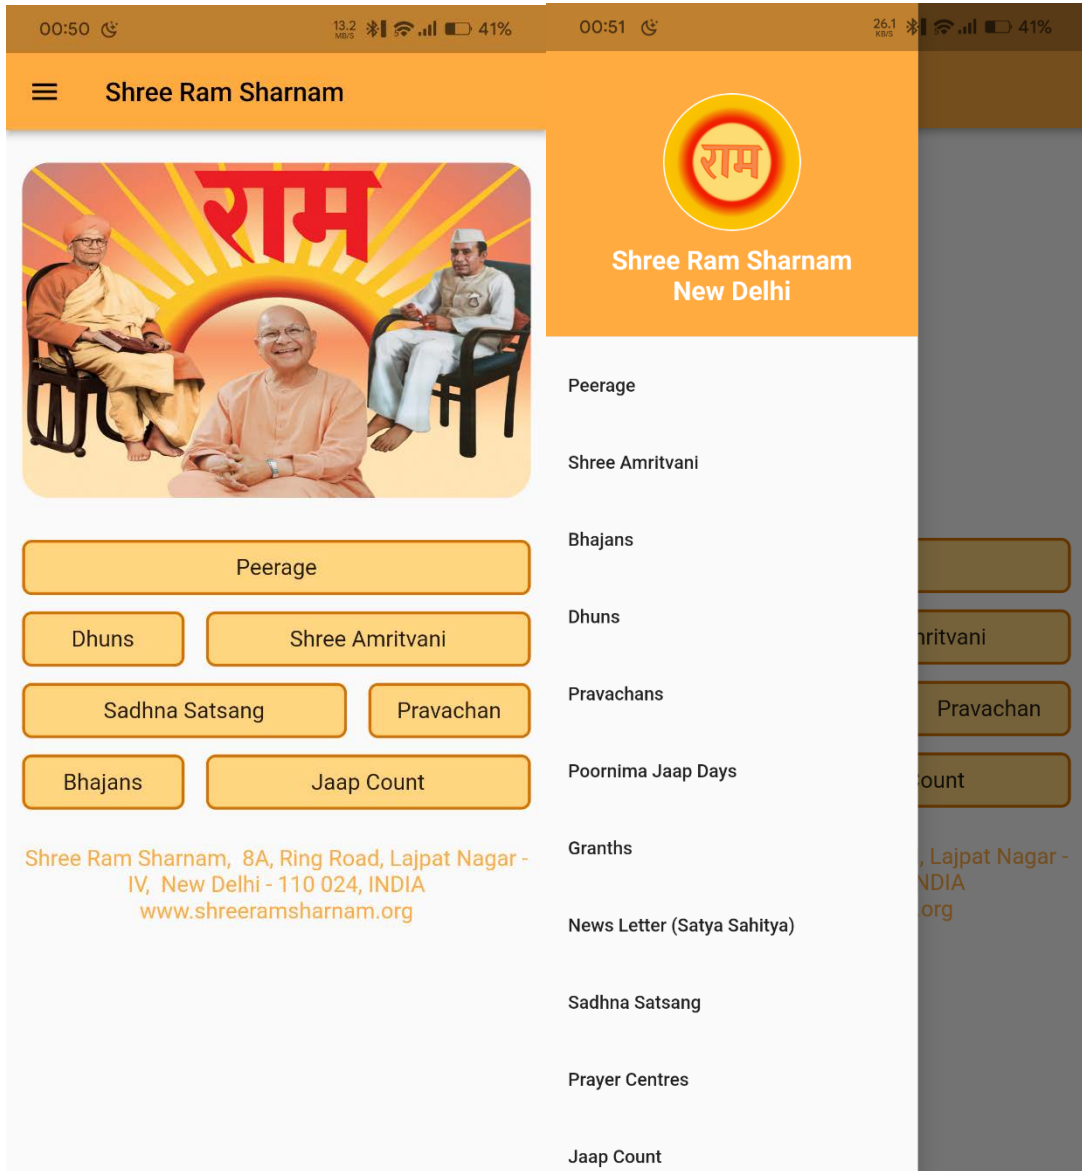

5. Multiple sections: -

You can either swipe or tap on the 'audio' or 'video' text to change the tab.

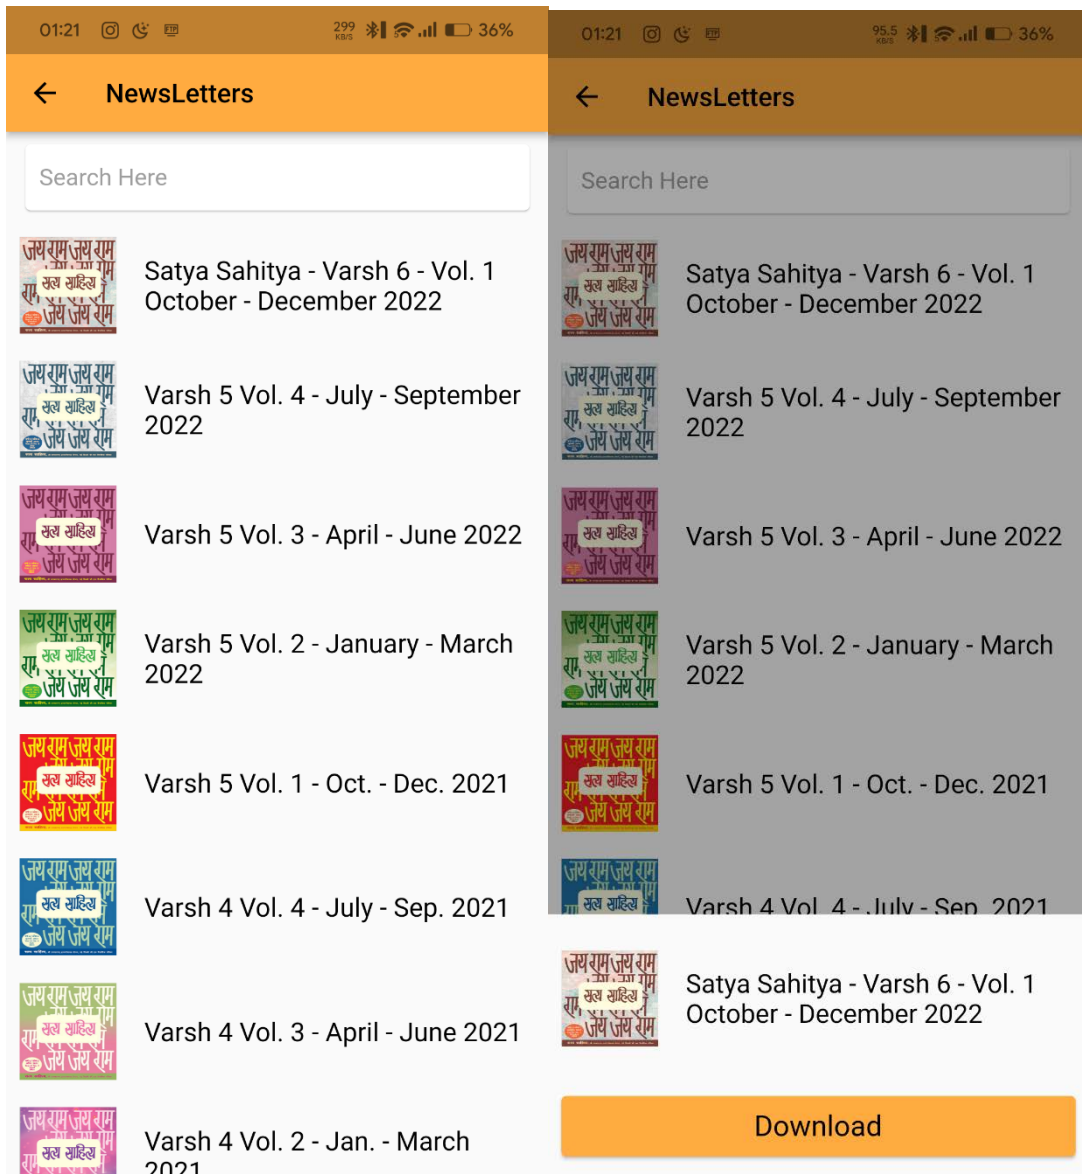

6. Home Screen

Classical, easy-to-use and all features in a side menu to keep the app clean and minimalistic.

7. Newsletters

You can press and hold a particular newsletter to download it.

Tapping on the download button begins your download and the progress can be tracked in notification panel of your smartphone.

Downloaded pdfs can be viewed in the My Downloads section of side menu.

8. Jaap Counter

Graphically represents your tracked jaaps.

Looks too blank. Let's set a Sankalp.

← Jaap Counter

Enter jaap to add Done

1000 Done

Clear All Data

1 2 3 -

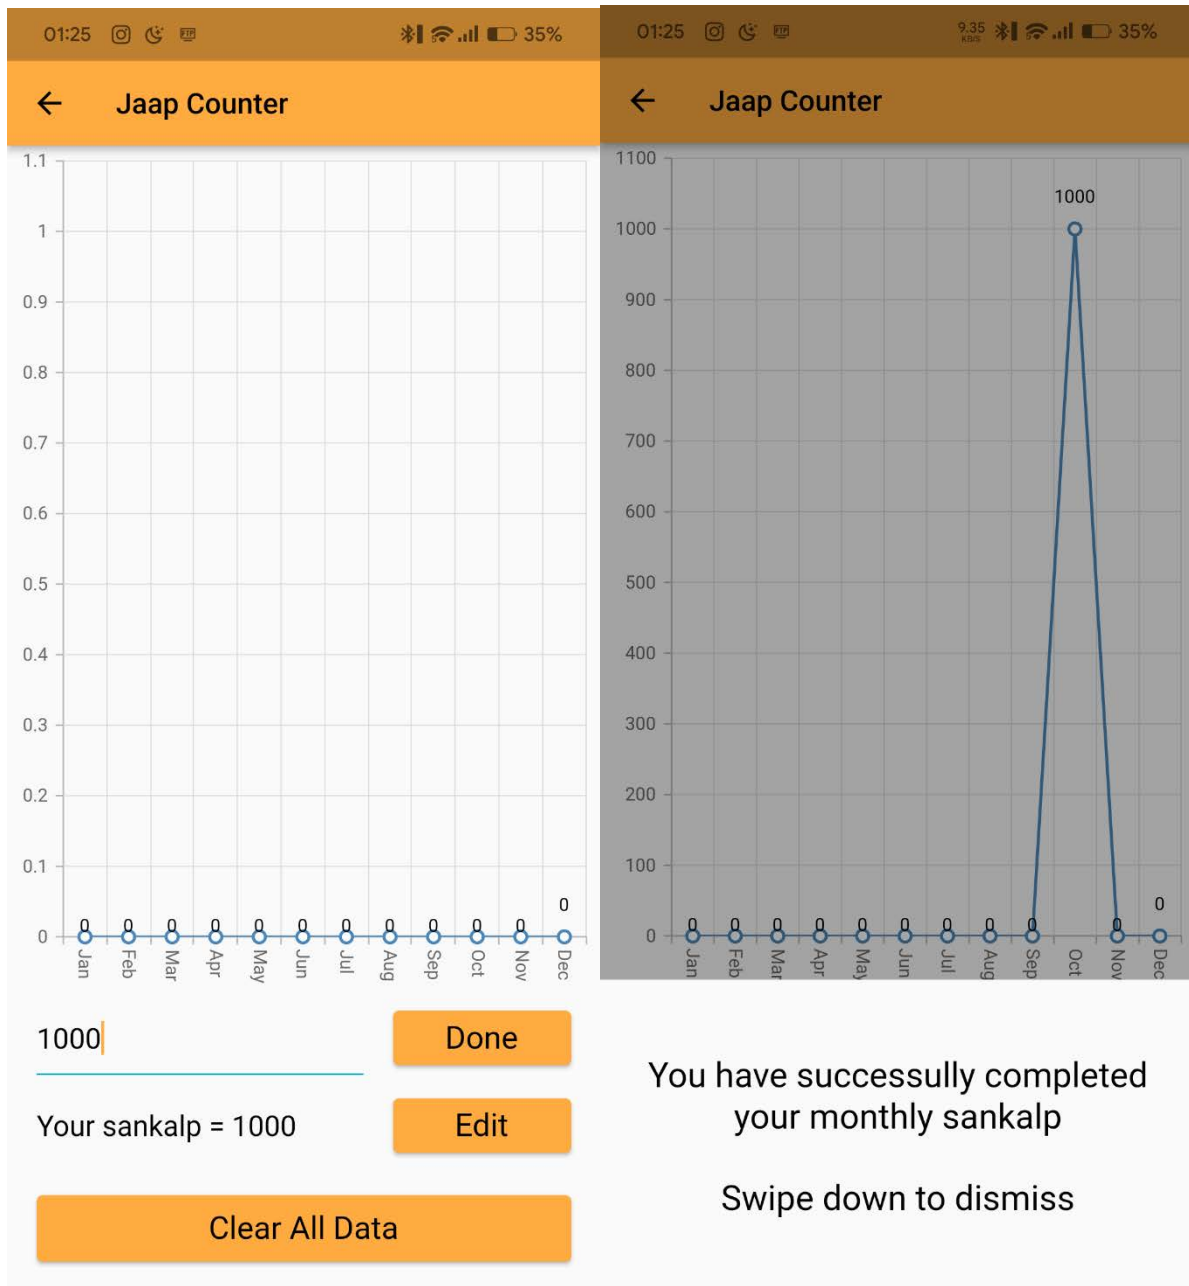

4 5 6]

7 8 9 [x]

, 0 . ✓

Now we have set a Sankalp of 1000 jaaps per month.

Now, what if we track 1000 jaaps now?

9. Search Bar

Instantly find your required content by just typing the name of it. Almost every section has a search bar.
