INTRODUCTION

The Apollo Engineering and Technology Index (AETI) is a computer printout listing a majority of the pertinent design and development reports published by the Apollo spacecraft contractors and the National Aeronautics and Space Administration. This index was designed to aid an engineer searching for pertinent reports that relate to engineering developments, decisions, design approaches, and problems encountered in the evolution of his project.

The complete AETI consists of three volumes: Volume I, Corporate Author Index, is an alphabetical listing, by corporate source, of contractor reports; Volume II, Systems Index, separates the published engineering reports by systems with a further breakdown into subsystems and major equipment groups; Volume III, Configurations Index, is a listing of documents grouped by configuration. A configuration is an equipment group assembled for a unique mission. Examples are: Boilerplates (BP-1), Missions (AS-201), NAA Air Frames (AF-001), Grumman Configurations (LTA-8), or NAA Spacecraft (SC 008).

The documents listed in this index (Volume III) can be obtained for reference from the MSC library which is located on the first floor of building 45. To locate and obtain a document, either the MSC accession number or the contractor's report number can be used. Since the MSC accession number quickly gives the location of the document, it will be used whenever possible.

Permanent loan copies of any document listed in this index can be obtained on approval of Mr. Herbert L. Tash, Apollo Data Manager, Code PP3, Manned Spacecraft Center, Houston, Texas. All requests for documents will be via a Request for Apollo Documentation (RAD) form or by memo. Additional copies of this index may also be obtained from the Apollo Data Manager. MSC personnel and their local support contractor personnel can obtain additional information by calling extension 2198.

This index, Volume III, is a complete listing of all currently indexed Apollo documents pertaining to a particular configuration. All previous issues of this index will be discarded. In the future, the index will be compiled quarterly and will contain only those documents received during that quarter.

INSTRUCTIONS

To use the Apollo Configurations Index, the following procedure is recommended:

- A. Using the Apollo Configurations list on page 2, locate the desired configuration (or configurations and page number).
- B. Note the MSC accession number of the report.
- C. Give the MSC accession number to the librarian who will locate the report. (If possible give the entire citation to the librarian to aid her in locating similar reports for you.)

A typical document citation is as follows:

TYPICAL CITATION

- ① **Configuration**: A collection of hardware items to achieve specific project milestones.
- ② **The MSC accession number** indicates to the librarian the shelf position of the report. This number should be used to obtain a report from the MSC library.
- ③ **The corporate source** is the contractor or government agency that published the report.
- ④ **The issue date** is the date the report was printed. (Revised reports are assigned new issue dates.)
